Neos is that first brave soul who dares write where others keep silent He is anything but timid or apologetic Although he looks at Thelema in light of the 21st century he stays true to the original ideas of Crowley Da Neos writes about how he came to write this book in spiritual terms He describes how he came to dedicate himself to a spiritual life and the various systems of belief that he examined and lived through before coming to Thelema It is a story of becoming including the ramifications for holding certain ideas He is the first Thelemic author to fully write about the Three Aeons a subject that has been left in pitiful shape for many years Da Neos examines the current of spiritual development that has advanced through history and how this spiritual current has been materialized through exoteric belief systems Da Neos describes what conversation with the Holy Guardian Angel is truly like Even Crowley himself only hints at it He describes in a gripping narrative of how he came to find his True Self and the results of that finding This is only a small sampling of the many areas Da Neos covers He goes on to write in detail on Thelemic ritual the entire development of the Kabbala examinations of the true force behind Christianity and much more *The Demons of Tiamat, the New Gods and the Exploration of the Nightside* Ardashir

Esoteric Transfers and Constructions Mark Sedgwick, Francesco Piraino, 2021-02-27 Similarities between esoteric and mystical currents in different religious traditions have long interested scholars This book takes a new look at the relationship between such currents It advances a discussion that started with the search for religious essences archetypes and universals from William James to Eranos The universal categories that resulted from that search were later criticized as essentialist constructions and questioned by deconstructionists An alternative explanation was advanced by diffusionists that there were transfers between different traditions This book presents empirical case studies of such constructions and of transfers between Judaism Christianity and Islam in the premodern period and Judaism Christianity and Western esotericism in the modern period It shows that there were indeed transfers that can be clearly documented and that there were also indeed constructions often very imaginative It also shows that there were many cases that were neither transfers nor constructions but a mixture of the two

that Sabhapati claimed would lead to an experience of being like a tree universally spread The practical method of having this experience in technical terms called the samadhi or composure of sivarajayoga or the Royal yoga for siva was published in English and multiple Indic languages and lavishly illustrated in diagrams on subtle and physical bodies This book is the first book length treatment on Sabhapati Swami scholarly or otherwise and uses critically edited sources printed in Tamil Devanagari and Bengali scripts to reveal the expansion of his literature across South Asia and globally the vast majority of which has never before been considered in any scholarly work to date The book shows how intertwined Sabhapati s yoga is with historical Tamil saiva and Siddha movements including the mythos of the rishi Agastya and also with Hathayoga and mantra based ritual It also takes into account his and his followers wrestling with the Victorian scientific worldview and their rationalization of Hindu philosophical discourses in the colonial period Finally the book demonstrates the extent to which Sabhapati s teachings were integrated into esoteric religious movements such as the Theosophical Society the Thelema of Aleister Crowley and New Thought and suggests that a reappraisal of scholarship on the roots of yoga in these movements is long overdue
