CT and MRI of Skull Base Lesions Igor Pronin, Valery Kornienko, 2018-01-30 This superbly illustrated book offers a comprehensive analysis of the

diagnostic capabilities of CT and MRI in the skull base region with the aim of equipping readers with the knowledge required for accurate timely diagnosis. The authors' vast experience in the diagnosis of skull base lesions means that they are ideally placed to realize this goal with the book's contents being based on more than 10 000 histologically verified cases of frequent uncommon and rare diseases and disorders. In order to facilitate use, chapters are organized according to anatomic region. Readers will find clear guidance on complex diagnostic issues and ample coverage of appearances on both standard CT and MRI methods and newer technologies including especially CT perfusion, susceptibility and diffusion weighted MRI, SWI and DWI and MR spectroscopy. The book will be an ideal reference manual for neuroradiologists, neurosurgeons, neurologists, neuro ophthalmologists, neuro otolaryngologists, craniofacial surgeons, general radiologists, medical students and other specialists with an interest in the subject.

Medical Technology Assessment Directory Institute of Medicine, Council on Health Care Technology, 1988-02-01. For the first time a single reference identifies medical technology assessment programs. A valuable guide to the field, this directory contains more than 60 profiles of programs that conduct and report on medical technology assessments. Each profile includes a listing of report citations for that program and all the reports are indexed under major subject headings. Also included is a cross listing of technology assessment report citations arranged by type of technology, headings, brief descriptions of approximately 70 information sources of potential interest to technology assessors and addresses and descriptions of 70 organizations with memberships, activities, publications and other functions relevant to the medical technology assessment community.
