Research Methods in Education** Cheryl E. Matias,2021-05-12 The Handbook of Critical Theoretical Research Methods in  
Education approaches theory as a method for doing research rather than as a background framework Educational research  
often reduces theory to a framework used only to analyze empirically collected data In this view theories are not considered  
methods and studies that apply them as such are not given credence This misunderstanding is primarily due to an empiricist  
stance of educational research one that lacks understanding of how theories operate methodologically and presumes  
positivism is the only valid form of research This limited perspective has serious consequences on essential academic  
activities publication tenure and promotion grants and academic awards Expanding what constitutes methods in critical  
theoretical educational research this edited book details 21 educationally just theories and demonstrates how theories are  
applied as method to various subfields in education From critical race hermeneutics to Bakhtin s dialogism each chapter

explicates the ideological roots of said theory while teaching us how to apply the theory as method This edited book is the first of its kind in educational research To date no other book details educationally just theories and clearly explicates how those theories can be applied as methods With contributions from scholars in the fields of education and qualitative research worldwide the book will appeal to researchers and graduate students      **The Mississippi State Sovereignty Commission**
