Maier's Cocaine Addiction (Der Kokainismus) Hans Wolfgang Maier, 1987 Maier's Cocaine Addiction (Der Kokainismus) Hans Wolfgang Maier, 1987 *Cocaine* Gregory R. Bock, Julie Whelan, 2008-04-30 Cocaine poses interesting problems for neurophysiologists and neuropharmacologists and there is important new data on the effects of cocaine on the brain its initial site of action at the cellular level now appearing to be the dopamine transporter Includes chapters on the far reaching toxic effects of cocaine on the epidemiology and the economics of drug addiction on the past and present use of cocaine in the U S and in South America and on the moral issues raised by drug use and abuse **Sexual Murder** Louis B. Schlesinger, 2021-03-22 Sexual Murder Catathymic and Compulsive Homicides is the culmination of the author's 45 years of experience with and studying sexually motivated homicide Sexual murders are generally of two types catathymic and compulsive Catathymic homicides are caused by a breakthrough of underlying sexual conflicts They can be unplanned explosive acute attacks or planned murders stemming from a chronic obsession with or disturbed attachment to the victim In compulsive homicides a fusion of sex and aggression results in a powerful internal drive which pushes the offender to seek out victims to kill and the killing itself is sexually gratifying These murders also may be planned or unplanned In compulsive homicides that are unplanned the urge breaks through and disrupts the offender's controls when a victim of opportunity crosses his path The compulsive offender who plans his crimes often eludes law enforcement and as a result he can have multiple serial victims over extended periods of time Both forms of sexual murder the catathymic and the compulsive are presented in this volume from a clinical descriptive perspective encompassing case studies with analysis Recent advances in empirical research in sexual murder including findings from the joint research project between John Jay College of Criminal Justice and the FBI Behavioral Analysis Unit in Quantico has published many important studies These include such topics as necrophilia foreign object insertions in sexual homicide ritual and signature and temporal patterns in serial sexual homicide mass murder crime scene staging in homicide and undoing symbolic reversal at homicide scenes All such research will be included and incorporated into this fully updated Second Edition including approximately fifty new clinical case studies A Brief History of Cocaine Steven B. Karch MD FFFLM, 2017-09-20 A Brief History of Cocaine Second Edition provides a fascinating historical insight into the reasons why cocaine use is increasing in popularity and why the rise of the cocaine trade is tightly linked with the rise of terrorism The author illustrates the challenges faced by today's governments and explains why current anti drug efforts have had only a limited effect on this global market This updated edition reexamines the impact of cocaine production trade and consumption on society beginning in the 16th century It shows how the commercialization of cocaine was driven by cartels of Swiss and German pharmaceutical companies and private enterprises across Europe Asia and the United States The author shows how government policies slowly transformed from trade shipping and manufacturing regulations with little or no success in stemming the flow of drugs The book describes how anti drug laws

treaties and costly initiatives involving crop substitution crop suppression interdiction and international cooperation were first attempted more than 400 years ago and why these strategies failed for Colonial Spain and later backfired on the League of Nations The author shows how economic necessity among growers the environmental impact of pesticides the potential for genetic engineering of coca plants and other loopholes have actually been counterproductive undermining the current efforts to curb the cocaine trade Featuring new and reorganized chapters A Brief History of Cocaine Second Edition contains the latest data and statistics relating drug trafficking to terrorism and explains recent trends in worldwide production consumption cost competition and international transport This book offers a well rounded historical perspective that is ideal for criminal justice practitioners teachers students and anyone interested in this topic

Molecular and Cellular Aspects of the Drug Addictions Avram Goldstein, 2012-12-06 In 1970 I gave up the chairmanship of the Department of Pharmacology at Stanford University School of Medicine to devote full time to basic and clinical research on problems of drug addiction In 1971 I developed the method of radioligand binding that led to the important characterization of opioid receptors in several laboratories The extraordinary specificity of these receptors for morphine and related opiates suggested the likelihood that there were naturally occurring morphine like molecules in the brain and other tissues The systematic search for these molecules culminated in 1979 in the discovery by my group of the dynorphin peptides one of the three families of opioid peptides the first of which the enkephalin family had been discovered in Aberdeen Scotland in 1975 I also became involved in clinical research on the pharmacologic treatment of heroin addicts for which I established the first large methadone maintenance treatment program in California My basic and clinical
