Sayer,2021-05-30 This informative illustrated guide to the British Railways locomotive series covers its full production lifespan from 1962 1965 In the early 1960s the Bo Bo diesel electric locomotive known as The Clayton was conceived as the new standard for British Railways superseding other Type 1 classes While the early classes suffered from poor driver visibility the Claytons were highly successful and popular with operating crews However the largely untested high speed flat Paxman engines proved to be highly problematic As a result the Claytons were eventually withdrawn from BR service by December 1971 Anthony Sayer draws on considerable amounts of archive material to tell the full story of these Standard Type 1 locomotives and the issues surrounding their rise and fall Further sources provide insights into the effort and money expended on the Claytons in a desperate attempt to improve their reliability Supported by over 280 photographs and diagrams dramatic new insights into this troubled class have been assembled for both historians and modelers alike *Railway Workshops of Britain, 1823-1986* Edgar J. convert from woodworking lathes to ones that were capable of machining metal. Craftsmen needed precise machines that could shape metal gears, cut metal screws and stamp shapes out of metal, thus enabling others to assemble their products.

The B T H and North British Type 1 Bo-Bo Diesel-Electric Locomotives - British Railways Classes 15 and 16

Anthony P. Sayer, 2021-12-30. The British Railways Pilot Scheme orders of 1955 included ten BTH and ten NBL Type 1 locomotives, these being introduced during 1957-61 for use in East London and on the Great Eastern and London Tilbury Southend lines. The BTH fleet subsequently expanded to forty-four as a consequence of their light axle loading and the availability of spare manufacturing capacity which BR chose to exploit in their quest to eliminate steam traction. Further construction of these two classes ceased after the fifty-four units, with preference being given to the highly reliable English Electric product which by mid-1962 had proliferated to 128 examples. The NBL fleet survived until 1968, being withdrawn after ten years of indifferent performance. The BTH locomotives followed by 1971, although four lingered on as carriage pre-heating units. Dramatic reductions in goods traffic during the 1960s-70s, particularly impacted local trip and transfer freight duties, the bread and butter work for the Type 1s, and it was inevitable that the less successful classes were retired from traffic first. This book looks at the short history of these two classes, making extensive use of archive sources combined with the primary observations of numerous enthusiasts. Previously unpublished information covering the introduction, appearance, design and performance issues of the locomotives form a central focus, and allocations, works histories, storage and disposals, liveries and detail differences are covered in the same level of detail as previous volumes in the Locomotive Portfolio series.

British Rail Christian Wolmar, 2022-06-09. The authoritative and fascinating history of the rise and fall of the state-owned British Rail. Wolmar's book is impeccably organised and makes a fast, enjoyable read. THE TIMES Literary Supplement _____ British Rail wasn't how we're asked to remember it. From ancient rolling stock to patchy service, stale sandwiches to the wrong kind of snow. British Rail, our last great state-owned organisation to be privatised, has received a terrible press. But after its controversial 1948 creation, British Rail was actually an innovative powerhouse that over five decades transformed the UK, creating one of the fastest regular rail services in the world. Award-winning journalist Christian Wolmar takes us from promise to punchline, exploring British Rail's birth into post-war austerity, the many battles and struggles to evolve what many considered to be a dinosaur, and how, at the height of its success, the service was misunderstood and unfairly maligned, ruthlessly broken up and privatised. _____ Praise for Christian Wolmar: Wolmar is the high priest of railway studies. Literary Review. The greatest expert on British trains. Guardian. Our most eminent transport journalist. Spectator. If the world's railways have a laureate, it is surely Christian Wolmar. Boston Globe. Christian Wolmar is in love with the railways. He writes constantly and passionately about them. He is their wisest, most detailed historian and a constant prophet of their rebirth. If you love the hum of the wheels and of history, then Christian Wolmar is your man. Observer. British Rail Tanya Jackson, 2013-10-01. British Rail was a success. British Rail is a contentious company as controversial as Dr Beeching and his

axe However this examination of BR's passenger services shows just how vital the organisation was. It successfully carried millions of commuters to and from their jobs every day, organised its trunk route services to yield a profit under the brand name Inter City and pioneered world beating research and technological development through its own research centre and engineering subsidiary. It transformed the railway system of Britain from a post Second World War state of collapse into a modern technologically advanced railway. And it did all this despite being starved of cash and being subjected to the whims of ever fickle politicians. *British Rail: The Nation's Railway* is a story expertly weaved by Tanya Jackson of how all this was achieved against the odds. Complemented by stunning black and white and colour images, this is certainly a volume that no rail enthusiast should be without. **Railway Age**, 1936 *British Railways in Transition* Derek H. Aldcroft, 1968-06-18

English Electric Type 2 Bo-Bo 'Baby Deltic' Locomotives Anthony P Sayer, 2025-03-30 The British Railways Pilot Scheme orders of 1955 included ten English Electric Type 2 diesel electric locomotives deploying Napier Deltic engines. These locomotives, more colloquially known as the Baby Deltics, were introduced into traffic during 1959 for use on the Eastern Region of British Railways. This book looks at the history of the Class 23s, making extensive use of available but previously unpublished archive material covering their introduction, technical idiosyncrasies, appearance, design and performance. Issues with the original Deltic engines were ultimately dealt with via a major rehabilitation exercise during the 1963-65 period, whilst various re-engining options were considered, including a new U-series English Electric high speed engine design. The original Napier engines were ultimately retained. The work involved in the whole rehabilitation process is discussed in detail using internal English Electric archive material and forms a central focus of research. The fleet survived intact until 1968 when withdrawal commenced as a direct result of declining traffic levels across the UK, with successive National Traction Plans progressively selecting the less successful, non-standard and numerically challenged classes for removal from traffic. All ten locomotives were withdrawn by March 1971. Individual locomotive histories, allocations, fire and accident incidents, liveries and detail differences, storage and disposals are provided for each locomotive.
