Building Rural Community Resilience Through Innovation and Entrepreneurship Charlie French, 2022-02-27. Drawing from empirical analyses, case studies and a synthesis of best practices, this book explores how innovation manifests itself in rural places and how it contributes to entrepreneurial development and resilience. Innovation in rural places may come about as a result of new forms of collaboration, policies that leverage rural assets and address critical service or product gaps, novel strategies for accessing financial capital, infusion of arts into aspects of community life and cultivation of networks that bridge entrepreneurs, organizations and institutions. The chapters illustrate how a number of innovation-related characteristics relate to economic vibrancy in rural places, such as a strong connection to the arts, adaptive and sustainable use of natural resources, value chain, integrated food systems, robust bridging social capital, networks, creative leveraging of technology and presence of innovation-focused entrepreneurs. Through exploration of these and other topics, this book will provide insights and best practices for rural community and economic development scholars and practitioners seeking to strengthen the rural innovation ecosystem.
