Maintenance Et Assurance De La Qualité Guide Pratique:

Guide des bonnes pratiques de l'ingénierie biomédicale en établissement de santé, 2011 La qualité et la sécurité des soins sont des enjeux majeurs dans nos sociétés technologiques où la complexité des systèmes biomédicaux est souvent connexe à leur performance. Le patient ne souhaite plus patienter mais être bien soigné avec les meilleures technologies et le maximum de sécurité le plus rapidement possible et au moindre coût. Il est de plus en plus important d'informer des évolutions de la médecine moderne ou des technologies et accéder facilement aux évaluations publiques des établissements de santé. Avec ce guide, la communauté professionnelle en ingénierie biomédicale hospitalière contribue à assurer cette dynamique sociale volontaire de transparence et de travail collaboratif en réfléchissant à l'amélioration continue de ses pratiques. Cette nouvelle édition 2011 validée après 2 ans de travail collaboratif par près de 90 pairs internationaux est un outil exploitable par tous les services biomédicaux et adaptable dans de nombreuses cultures ou contextes nationaux. La progressivité pour petits ou grands services biomédicaux est assurée par une approche modulaire des bonnes pratiques management organisationnalisation. L'ouverture aux spécificités professionnelles est permise par le nouveau concept d'activités connexes à l'ingénierie biomédicale. L'adossement permanent aux référentiels qualité internationaux est garanti par la structure de toute bonne pratique selon les fondamentaux gérés dans l'amélioration continue : sens soutien suivi par la mesure des performances selon des axes clefs : efficacité, efficience et qualité permanente et par l'évaluation du progrès dans la maîtrise des processus. La créativité est promue, les innovations sont favorisées et la mutualisation est encouragée afin que les services biomédicaux hospitaliers puissent toujours mieux garantir la qualité et la sécurité des dispositifs médicaux en exploitation afin de contribuer dans chaque établissement de santé à la qualité et à la sécurité des soins distribués aux patients.
