

A scenic landscape photograph of a river flowing through a forested valley. In the foreground, a large waterfall cascades over dark, jagged rocks, creating white foam and spray. The river continues into the distance, flanked by steep, forested hillsides. The trees are mostly evergreens, with some deciduous trees showing autumnal colors. The sky is bright and hazy, suggesting a misty or overcast day. The overall mood is serene and natural.

Pantaleon Foundation, 2024-10-08 Kpim of Environment is a superb book crafted from assembled and peer reviewed articles focusing on the fundamental issues that build sustain or degrade the environment There is no doubt the modern world is seriously faced with diverse challenges especially that of having a healthy environment What is it that causes the environment to become a threat The focus of this book is to interrogate what ought to be the core issues and expectations of making our environment our world a better and safer place in the contemporary time or in the era of global heating Established scholars have explored the various aspects of the complex environment in development and highlighted what the underlying issues are through integral reflection intersectionality theory and practice resilience and sustainability in the changing world By working out the issues in their fields of specialization and interest the authors very insightfully

offered instances and strategies to manage the environment in ways that will allow faith reason and action in discerning policy and outcomes of environmental intelligence and care The unique voices of the authors are not only revealing but also irresistible to be ignored on the question of reason faith and environment You will discover how philosophical theological and applied scientific knowledge crisscrossed the weaving of the essays together to strike a meaningful outcome The book is organized in three sections with running chapters for each article including a book review on cutting to die resilience and general conclusion By scrutinizing the meaning of environment for adaptation and growth through technology reason and faith this book offers a glimpse and in depth analysis of what the competing issues are and will keep readers and systematic policy work busy for many years ahead

Caste and nature Mukul Sharma, 2017-09-25 Rarely do Indian environmental discourses examine nature through the lens of caste Whereas nature is considered as universal and inherent caste is understood as a constructed historical and social entity Mukul Sharma shows how caste and nature are intimately connected He compares Dalit meanings of environment to ideas and practices of neo Brahmanism and certain mainstreams of environmental thought Showing how Dalit experiences of environment are ridden with metaphors of pollution impurity and dirt the author is able to bring forth new dimensions on both environment and Dalits without valourizing the latter's standpoint Rather than looking for a coherent understanding of their ecology the book explores the diverse and rich intellectual resources of Dalits such as movements songs myths memories and metaphors around nature These reveal their quest to define themselves in caste ridden nature and building a form of environmentalism free from the burdens of caste The Dalits also pose a critical challenge to Indian environmentalism which has until now marginalized such linkages between caste and nature
