Tikal Reports, 1958 *Miscellaneous Investigations in Central Tikal* H. Stanley Loten, 2002 [The Ceramic Sequence of Tikal](#) T. Patrick Culbert, Laura J. Kosakowsky, 2019-09-27 The two volumes of the central Tikal ceramic reports Tikal Reports 25A and 25B present the information gathered from the analysis of all ceramics recovered by the University of Pennsylvania research project at Tikal between 1956 and 1970. Tikal Report 25A Culbert 1993 contains illustrations and brief descriptive captions for all whole vessels recovered from burials, caches and problematical deposits. Because Tikal Report 25A illustrates the often spectacular decorated vessels from major burials, it is of the most general interest for comparative purposes. This volume Tikal Report 25B presents the Tikal sequence of nine ceramic complexes; the analysis of the small sample of Postclassic Caban ceramics was not completed. Describes the ceramics from each complex, presents the data for all counted lots and illustrates the material from sherd collections. It is a specialist volume primarily of interest to those actively involved in research with Maya ceramics. The material is complemented by data in the Tikal Reports devoted to excavations and by the analysis of nonceramic artifactual material in Tikal Reports 27A and 27B. Moholy Nagy and Coe 2008. Substance of the Ancient Maya Kingdoms and Communities Objects and Beings collects twelve essays by top scholars that highlight what is new in research pertaining to the ancient Maya Subjects range from updated political histories of major kingdoms in the southern Maya Lowlands to explorations of the nature of Maya writing and materiality These essays were inspired by the scholarship of Stephen Houston and celebrate his transdisciplinary commitment to research in anthropological archaeology epigraphy and art history The contributions in this volume are organized into two sections that respectively reflect different scales from which to approach the substance of the ancient Maya from hand-held objects to entire kingdoms This dichotomy reflects the breadth of questions central to current research on the Maya It also illustrates how certain themes such as the relationship between the living and the realm of the supernatural are fundamental to both thinking by and about the Maya at all scales A diversity of methods is not only embodied by this assemblage of essays but is also spread equally across the two sections of the book illustrating that archaeologists epigraphers geographers and art historians can equally contribute to the substance of kingdoms and communities as they can to objects and beings Collectively these contributions show how the objects and beings that composed the Classic Maya world were both literal and sacred substances that mediated relations not only among living people but with gods and ancestors A final chapter by Stephen Houston reflects on unfinished projects of the ancient Maya as a metaphor for all of the work yet to be done to move forward in our studies of the past Materializing Ritual Practices Lisa M. Johnson, Rosemary A. Joyce, 2022-07-15

Materializing Ritual Practices explores the deep history of ritual practice in Mexico and Central America and the ways interdisciplinary research can be coordinated to illuminate how rituals create, destroy, and transform social relations Ritual action produces sequences of creation, destruction, and transformation which involve a variety of materials that are active and agential The materialities of ritual may persist at temporal scales long beyond the lives of humans or be as ephemeral as spoken words, music, and scents In this book archaeologists and ethnographers including specialists in narrative music and ritual practice explore the rhythms and materiality of rituals that accompany everyday actions like the construction of houses, healing practices, and religious festivals and that paced commemoration of rulers, ancestor veneration, and relations with spiritual beings in the past Connecting the kinds of observed material discursive practices that ethnographers witness to the sedimented practices from which archaeologists infer similar practices in the past Materializing Ritual Practices addresses how specific materialities encourage repetition in ritual actions and in other circumstances resist changes to ritual sequences The volume will be of interest to cultural anthropologists, archaeologists, and linguists with interests in Central America ritual
