Indonesia The Anthropology of Extinction offers compelling explorations of issues of widespread concern Dwelling in Political Landscapes Anu Lounela, Eeva Berglund, Timo Kallinen, 2019-05-22 People all over the globe are experiencing unprecedented and often hazardous situations as environments change at speeds never before experienced This edited collection proposes that anthropological perspectives on landscape have great potential to address the resulting conundrums The contributions build on broadly phenomenological structuralist and multi species approaches to environmental perception and experience but they also argue for incorporating political power into analysis alongside dwelling cosmology and everyday practice The book s 13 ethnographically rich chapters explore how the material and the conceptual are entangled in and as landscapes but it also looks at how these processes unfold at many scales in time and space involving different actors with different powers Thus it reaches towards new methodologies and new ways of using anthropology to engage with the sense of crisis concerning environment movements of people climate change and other planetary transformations Dwelling in political landscapes contemporary anthropological perspectives builds substantially upon anthropological work by Tim Ingold Anna Tsing and Philippe Descola and on related work beyond which emphasises the ongoing and open ended yet historically conditioned ways in which humans and nonhumans produce the environments they inhabit In such work landscapes are understood as the medium and outcome of meaningful life activities where humans like other animals dwell This means that landscapes are neither social cultural nor natural but socio natural Protesting against and moving on from the proverbial dualisms of modern Western and maybe capitalist thought is only the first step in renewing anthropology s methodology for the current epoch however The contributions ask how seemingly disconnected temporal representational economic and other systemic dynamics fold back on lived experience that are materialised in landscapes Foremost through studying how socially valued landscapes become irreversibly disturbed commodified or subjected to wilful markings or erasures the book explores a number of approaches to how landscapes are entangled in the ways people gather and organise themselves Mindful of troubling changes in Earth Systems all the authors argue from empirics They show that processes of landscape change are always both habitual and laden with choices That is landscape change is political Undoubtedly landscape politics is bound up not just in how nature has been imagined but in long histories of consumption Today an alarming quest for raw materials and energy continues to change both political and geological formations Meanwhile dominant socio political aspirations mean the exploitation of staggering volumes of cheap resources like fossil fuels in order to sustain economic processes that are as taken for granted as they are unsustainable Like anthropology generally this book attends to the contextual details buried in such planet scale pictures Building on traditional anthropological strengths many authors consider the details of how the past is brought into the present or erased from it in material flows and sensory awareness as well as in narratives that are explicitly linked to particular landscapes Colonial identity formation and the different ways that it links with how landscape is viewed and managed for instance for resource development for a global market whether in Southern Africa Israel Palestine

the Canadian arctic or Indonesia is a particularly striking example of how to talk about landscape is also to talk about past present and future And as the idea that we inhabit the Anthropocene becomes commonplace the discipline can meaningfully discuss the current era as one of disavowed ruins as well as of poorly understood multispecies relations To think of landscape as historically produced across multiple scales does not mean ignoring its sensuous qualities let alone its role in cosmological systems On the contrary the analyses in the collection attend to the ways people s movements through the landscape produce it as a material and conceptual resource Taken together the book s ethnographic analyses take on board the unprecedented conditions under which people everywhere are having to make sense and forge relationships to the worlds they inhabit Since landscapes are not what they used to be neither can anthropology be

Madagascar Daniel Austin,Hilary

Bradt,2017-08-17 A new thoroughly updated 12th edition of Bradt s Madagascar the leading and most comprehensive guide to this unique island nation written by Hilary Bradt who first visited in 1976 and has returned roughly 35 times and Daniel Austin who has visited 12 times and continues to travel there annually Bradt s Madagascar is by far the most thorough guide to the country in English and is written and updated by established experts whose unparalleled knowledge of Madagascar combines with contributions from over 50 experts in a book which has been the most authoritative guide to the country for three decades It covers national parks and protected areas and includes itineraries to suit all interests and budgets plus details of around 1 000 hotels and restaurants Madagascar is like nowhere else on earth It is fascinating not only zoologically and botanically but culturally linguistically historically and geologically This vast island is the fourth largest in the world and also the oldest This is part of the reason why it has evolved into an incredible hotspot for biodiversity with a truly unique flora and fauna that is more than 80% endemic to the island and with new species being described virtually on a daily basis Madagascar is also the only place where you can see wild lemurs Almost a quarter of the world s 450 or so primates exist only here With Bradt s Madagascar you can visit tropical rainforest and seek out its incredible flora and fauna explore the otherworldly eroded limestone spires most famously at Tsingy de Bemaraha National Park Madagascar s most striking landscape discover the beach fringed islands around Nosy Be with their fabulous scuba diving snorkelling kayaking whale watching and fishing opportunities and make the most of a host of adventuring and sporting possibilities including surfing windsurfing kitesurfing rock climbing tree climbing caving river trips mountain biking distance running quad biking trekking and hiking Also covered are the UNESCO World Heritage Site of Ambohimanga the renowned Avenue des Baobabs one of the country s most photographed scenes and information on the best birdwatching spots Madagascar has almost 300 avian species with a high proportion of endemics including five whole endemic families

Primate Anti-Predator Strategies Sharon Gursky-Doyen,K.A.I.

Nekaris,2007-05-31 Since the 1960s primatologists have recognized the impact of predation on the evolution of morphology

the social systems and cognitive behavior of monkeys and apes but few studies considered its impact on the prosimians lemurs lorises galagos and tarsiers This comprehensive volume written by experts in the field narrows this gap by highlighting the effect of predation on the order Primates in general Theoretical approaches to understanding how primates perceive predation threat as well as proximate and ultimate causes to address threat and attack are considered across the primate order Although this volume concentrates on the least known group in this theoretical area the prosimians contributions by researchers on numerous primate taxa across four major geographical regions make this a novel and exciting contribution to students interested in primate evolution and ecology
