invaders of ancient Rome Alexander The Great had reportedly died due to Plasmodium falciparum malaria while returning home after the battle with the Indian king Poru in the malaria infested Punjab region the story of man s struggle to live with the mosquito from the early 19th Century malaria defeat in Mian Mir under direct charge of Dr Samuel Rickard Christophers who advocated to Dr Ronald Ross s theory of environment sanitation to the malaria deaths of hundreds of rural inhabitants living in The Thar Desert s irrigated Command Area under the world famous Indira Gandhi Nahar Pariyojana in the early 1990s and to the recent panic over the chikungunya virus in Kerala as well as many other States and Union Territories crippling thousands of people in 2006 and deaths from dengue all over the country during 2012-14 need to be told to the modern generation of medical entomologists and vector borne disease specialists to relive the moments of victories and defeats in this vicious age old battle between man and mosquito At the end we find that we have only ourselves to be blamed to a great extent for accelerating the spread of mosquitoes and the diseases they transmit with climate change and increased international travel mosquito borne illnesses are flaring up all over the globe Catastrophic failures of mosquito control have ensured that worldwide even now one person dies of malaria every twelve seconds This book describes in a mosquito s eye view how mosquito breeds rests feeds flies mate and dies besides interaction with her natural enemies The book also deals with the current constraints and future control prospects of mosquito control In view of the increasing resistance to insecticides and chemotherapy the book throws light on the subject of greatest promise to ending mosquitoes deadly assault on man by render them impotent by genetic manipulation by replacing them through paratransgenesis involving micro organisms such as bacteria and fungi
