*Natural Theology* Kelly Cherry, 1988      *Literature and Natural Theology in Early Modern England* Katherine Calloway, 2023-10-19 Katherine Calloway explores the relationship between science and religion through a wide ranging selection of early modern English poets      *Natural Theology in the Scientific Revolution* Katherine Calloway, 2015-10-06 In the seventeenth century scientific discoveries called into question established Christian theology It has been claimed that contemporary thinkers contributed to this conflict model by using the discoveries of the natural world to prove the existence of God Calloway challenges this view by close examination of five key texts of the period      **The Oxford Handbook of Natural Theology** Russell Re Manning, 2013-01-17 The Oxford Handbook of Natural Theology is the first collection to consider the full breadth of natural theology from both historical and contemporary perspectives and to bring together leading scholars to offer accessible high level accounts of the major themes The volume embodies and develops the recent revival of interest in natural theology as a topic of serious critical engagement Frequently misunderstood or polemicized natural theology is an under studied yet persistent and pervasive presence throughout the history of thought about ultimate reality from the classical Greek theology of the philosophers to twenty first century debates in science and religion Of interest to students and scholars from a wide range of disciplines this authoritative handbook draws on the very best of contemporary scholarship to present a critical overview of the subject area Thirty eight new essays trace the transformations of natural theology in different historical and religious contexts the place of natural theology in different philosophical traditions and diverse scientific disciplines and the various cultural and aesthetic approaches to natural theology to reveal a rich seam of multi faceted theological reflection rooted in human nature and the environments within which we find ourselves      **The World in the Shadow of God** Ephraim Radner, 2010-06-01 In *The World in the Shadow of God* Ephraim Radner argues for a vigorous Christian natural theology and insists that such a theology must of necessity be performed poetically The peculiar character of such a theology is found in its disclosing of the natural limits that indicate indirectly the impinging and more fundamental reality of the divine life Natural theology represents the encounter between created reality and the shadow of God s creative and revelatory grace However the encounter is a morally demanding task for the Christian church if it is to be held accountable to the truth on which its life is based The first portion of the book offers an extended critical essay on the nature of this sort of natural theology while the second provides a developed set of examples through poems that display the natural world in light of the truths articulated in the Apostles Creed Those interested in the intersection of theology literature history and the natural world will be challenged by this attempt to renew a basic element of Christian knowledge and culture      *A Natural Theology of the Arts* Anthony Monti, 2017-07-05 *A Natural Theology of the Arts* contends that the arts are theological by their very nature and not simply when they are explicitly religious thereby constituting a distinctive kind of natural theology Borrowing from science the stance of critical realism to justify truth claims

in art and theology it argues that works of art are complex metaphors that convey the real presence of God even when not labelled as such Citing numerous examples from literature painting and music including Shakespeare s King Lear Vermeer s Young Woman with a Water Jug Rembrandt s Return of the Prodigal Son and Stephen Cleobury s experiences performing Bach s St Matthew Passion and Britten s Rejoice in the Lamb the author concludes that works of art anticipate the new creation thereby suggesting a Trinitarian account of the God present in the creation and reception of such works

Holder, 2020-10-15 This book offers a rationale for a new ramified natural theology that is in dialogue with both science and historical critical study of the Bible Traditionally knowledge of God has been seen to come from two sources nature and revelation However a rigid separation between these sources cannot be maintained since what purports to be revelation cannot be accepted without qualification rational argument is needed to infer both the existence of God from nature and the particular truth claims of the Christian faith from the Bible Hence the distinction between bare natural theology and ramified natural theology The book begins with bare natural theology as background to its main focus on ramified natural theology Bayesian confirmation theory is utilised to evaluate competing hypotheses in both cases in a similar manner to that by which competing hypotheses in science can be evaluated on the basis of empirical data In this way a case is built up for the rationality of a Christian theist worldview Addressing issues of science theology and revelation in a new framework this book will be of keen interest to scholars working in Religion and Science Natural Theology Philosophy of Religion Biblical Studies Systematic Theology and Science and Culture **Translation as Transformation in Victorian Poetry** Annmarie

Drury, 2015-05-05 Explores how Victorian poetry and translation dynamically influenced one another in an age of empire

**Poetry Realized in Nature** Trevor H. Levere, Trevor Harvey Levere, 2002-08-08 This volume establishes the fundamental importance of science in Coleridge's intellectual development Poetry, Philosophy and Theology in Conversation

Francesca Bugliani Knox, Jennifer Reek, 2019-08-05 This volume is a collection of essays that explains how literature philosophy and theology have explored the role of wonder in our lives particularly through poetry Wonder has been an object of fascination for these disciplines from the Greek antiquity onwards yet the connections between their views on the subject are often ignored in subject specific studies The book is divided into three parts Part I opens the conversation on wonder in

philosophy Part II is given to theology and Part III to literary perspectives An international set of contributors including poets as well as scholars have produced a study that looks beyond traditional chronological geographical and disciplinary boundaries both within the individual essays themselves and in respect to one another The volume s wide historical framework is punctuated by four poems by contemporary poets on the theme of wonder An unconventional foray into one of the best known themes of the European tradition this book will be of great interest to scholars of literature theology and philosophy

**Lands of Likeness** Kevin Hart, 2024-05-31 An original and profound exploration of contemplation from philosopher theologian and poet Kevin Hart In Lands of Likeness Kevin Hart develops a new hermeneutics of contemplation through a meditation on Christian thought and secular philosophy Drawing on Kant Schopenhauer Coleridge and Husserl Hart first charts the emergence of contemplation in and beyond the Romantic era Next Hart shows this hermeneutic at work in poetry by Gerard Manley Hopkins Marianne Moore Wallace Stevens and others Delivered in its original form as the prestigious Gifford Lectures Lands of Likeness is a revelatory meditation on contemplation for the modern world

**Natural Religion** Frederick Turner, 2011-12-31 There is widespread belief that the world s religions contradict each other It follows that if one religion is true the others must be false an assumption that implies and may actually create religious strife In Natural Religion acclaimed poet critic and essayist Frederick Turner sets out to show that the natural world offers grounds for stating that all religions are in some respect true Through the ages various ways have been proposed to resolve religious differences Some argue for the destruction of all religions but one s own Others substitute an abstract principle for the real ritual and moral practice of religion Still others doubt all religious truth and consequently all truth Others accept a kind of pluralistic relativism This book explores syncretism whereby all religions are seen as grasping the same strange and complex reality but by very different means and handles The idea that all religions are true raises a supervening question if so what must the real physical universe be like Turner approaches these questions in terms of scientific inquiry There is not enough room in space itself to fit in all theologies but there may be enough room in time if new scientific descriptions of time s nature are to be believed

Turner argues that in the time models of contemporary cosmological and evolutionary science all times may be connected and time may be infinitely branched and causally looped so that both forward in time and backward in time factors may be in operation in the same event Thus the fundamental substance of the universe may be information rather than matter or energy The universe is more like a vast living organism than a vast machine Turner argues that all existing religions can be shown to fit into this model which in turn points to deeper implications of religious doctrines languages and practices There would be plenty of room in such a view of time for a tree of different yet linked religious worlds and poetic language may be the most effective tool for describing the divine      *Thomas Carlyle. Philosophic Thinker, Theologian, Historian, and Poet*

Edwin Paxton Hood,2024-02-01 Reprint of the original first published in 1875 The publishing house Anatiposi publishes historical books as reprints Due to their age these books may have missing pages or inferior quality Our aim is to preserve these books and make them available to the public so that they do not get lost      *Darwinism and the Divine* Alister E. McGrath,2011-02-28 Darwinism and the Divine examines the implications of evolutionary thought for natural theology from the time of publication of Darwin s On the Origin of Species to current debates on creationism and intelligent design Questions whether Darwin s theory of natural selection really shook our fundamental beliefs or whether they served to transform and illuminate our views on the origins and meaning of life Identifies the forms of natural theology that emerged in 19th century England and how they were affected by Darwinism The most detailed study yet of the intellectual background to William Paley s famous and influential approach to natural theology set out in 1802 Brings together material from a variety of disciplines including the history of ideas historical and systematic theology evolutionary biology anthropology sociology and the cognitive science of religion Considers how Christian belief has adapted to Darwinism and asks whether there is a place for design both in the world of science and the world of theology A thought provoking exploration of 21st century views on evolutionary thought and natural theology written by the world renowned theologian and bestselling author      **The**

**Poetical Works of Robert Browning** Robert Inglesfield,2025-05-13 The English first edition of Dramatis Person was published in May 1864 with the American first edition appearing hard on its heels in the following September This was the second of the two great collections of Robert Browning s middle years the first Men and Women having appeared nine years previously The new collection with its inspired general title which Browning seems to have hit upon only weeks before the publication of the English first edition was certainly an extraordinary imaginative and technical achievement the poems are remarkable for their modernity of subject matter and close psychological interest as well as their assertive individuality of conception An outstanding feature is the inventive handling of tone as for example in Apparent Failure Browning seems to have regarded the collection very much as a continuation and development of Men and Women with its varied contrasting dramatic lyrics and dramatic argumentative poems As in the earlier collection the great majority of the poems are essentially dramatic in conception
