Natural Logic and the Greek Moods David Lightfoot, 2017-12-04 No detailed description available for Natural Logic and the Greek Moods Natural Logic and the Greek Moods David Lightfoot, 1975 No detailed description available for Natural Logic and the Greek Moods New Testament Text and Language Stanley E. Porter, Craig A. Evans, 1997-02-01 The Sheffield Reader series collects the best articles on a specific topic from the Journal for the Study of the New Testament The range of each volume reflects the breadth of the journal itself Hence the reader will find groundbreaking studies that introduce new critical questions and move into fresh areas of enquiry surveys of the state of play in a particular topic and articles that engage with each other in specific debates For undergraduates these books offer an invaluable critical introduction to a particular subject More advanced students and scholars can use the volumes to find background material for their own area of interest or to gain an overview of the research in an area outside their speciality *Verbal Syntax in the Greek Pentateuch* Trevor Vivian Evans, 2001 Addressing the entire Greek Pentateuch this study of the Greek verb investigates the value of these translations evidence for the history of the Greek language The nature and influence from the underlying Hebrew are comprehensively analysed **Negation and Nonveridicality in the History of Greek** Katerina Chatzopoulou, 2019 This book provides a thorough investigation of the expression of sentential negation in the history of Greek based on extensive data from major stages of the language It also provides a new semantic interpretation of Jespersen's cycle that explains the Greek developments and those in other languages *Verbal Aspect and Non-indicative Verbs* Constantine R. Campbell, 2008 Constantine R Campbell continues the work begun in his previous volume *Verbal Aspect the Indicative Mood and Narrative Soundings in the Greek of the New Testament* In this book he investigates the function of verbal aspect in non indicative Greek verbs which are of great significance for the translation and exegesis of Biblical texts Campbell demonstrates that the model developed in his first volume provides strong power of explanation for the workings of non indicative verbs and challenges some of the conclusions reached by previous scholarship The Greek Verb Revisited Steven E. Runge, Christopher J. Fresch, 2016-11-02 For the past 25 years debate regarding the nature of tense and aspect in the Koine Greek verb has held New Testament studies at an impasse The Greek Verb Revisited examines recent developments from the field of linguistics which may dramatically shift the direction of this discussion Readers will find an accessible introduction to the foundational issues and more importantly they will discover a way forward through the debate Originally presented during a conference on the Greek verb supported by and held at Tyndale House and sponsored by the Faculty of Divinity of Cambridge University the papers included in this collection represent the culmination of scholarly collaboration The outcome is a practical and accessible overview of the Greek verb that moves beyond the current impasse by taking into account the latest scholarship from the fields of linguistics Classics and New Testament studies In the Footsteps of Raphael Kühner A. Rijksbaron, H.A. Mulder, G.C. Wakker, 2023-12-11 This volume contains twenty articles

devoted to Ancient Greek syntax and semantics A wide range of subjects is covered tense and aspect voice the cases notably the accusative the moods conditionals and purpose clauses verbal complementation and prepositional phrases The approach is mostly but not exclusively synchronic concentrating on the Mycenaean Homeric Classical and Hellenistic periods of the Greek language Generative Grammar without Transformations Peter J. Text in a Whirlwind J.M. Holmes,2000-05-01 Holmes examines four exegetical devices employed by all sides in the debate on 1 Tim 2 9 15 proposing that together they create a whirlwind effect which obscures the text s meaning She concludes that 1 the immediate context is general not ecclesial 2 background often reconstructed from passages elsewhere in the Pastorals is misleading 3 comparison with 1 Cor 14 34 35 can similarly mislead and 4 the conjunction gar for has been allowed unduly to dominate interpretation The writer of the letter it is argued has been misunderstood since very early in the Christian era his intention having been simply to moderate women s everyday behaviour in ways that parallel the behaviour he requires of men Linguistic essays G. H. R. Horsley,1989-01-01 New Documents Illustrating Early Christianity G. H. R. Horsley,Stephen Llewelyn,1997-12-02 This fifth volume of New documents illustrating early Christianity is different in conception from its predecessors It focuses on several questions concerning the linguistic analysis of the New Testament from the particular perspective of the usefulness of the documentary sources for such study Back cover *Introduction to Indo-European Linguistics* Oswald Szemerényi,Oswald John Louis Szemerényi,1999 Professor Szemerenyi s Einf hrung in die vergleichende Sprachwissenschaft first published in 1970 remains the standard introduction to comparative Indo European linguistics Updated and revised for its English translation it appears here in a new paperback format The introductory section presents a general survey of the principles of diachronic comparative linguistics and the remainder of the book is a thorough and detailed analysis according to those principles of the phonological and morphological structure of the Indo European group of languages Each section of the book has a detailed bibliography so that the student can progress from the general overview to a more detailed examination of particular topics Papers from the 4th International Conference on Historical Linguistics Elizabeth Closs Traugott,Rebecca Labrum,Susan Shepherd,1980-01-01 The studies in this volume are revised versions of a selection from the papers presented at the Fourth International Conference on Historical Linguistics held at Stanford University on 26 30 March 1979 Papers at this conference and in this volume treat aspects of all current topics in historical linguistics including topics that are only recently considered relevant such as acquisition structure and language use **Papers from the Fourth International Conference on Historical Linguistics, Stanford, March 26-30 1979** Elizabeth Closs Traugott,Rebecca Labrum,Susan C. Shepherd,1980-01-01 The studies in this volume are revised versions of a selection from the papers presented at the Fourth International Conference on Historical Linguistics held at Stanford University on 26 30 March 1979 Papers at this conference and in this volume treat aspects of all current topics in

historical linguistics including topics that are only recently considered relevant such as acquisition structure and language use

Universal Grammar in the Reconstruction of Ancient Languages Katalin É. Kiss, 2011-12-22 Philologists aiming to reconstruct the grammar of ancient languages face the problem that the available data always underdetermine grammar and in the case of gaps possible mistakes and idiosyncracies there are no native speakers to consult The authors of this volume overcome this difficulty by adopting the methodology that a child uses in the course of language acquisition they interpret the data they have access to in terms of Universal Grammar more precisely in terms of a hypothetical model of UG Their studies discussing syntactic and morphosyntactic questions of Older Egyptian Coptic Sumerian Akkadian Biblical Hebrew Classical Greek Latin and Classical Sanskrit demonstrate that descriptive problems which have proved unsolvable for the traditional inductive approach can be reduced to the interaction of regular operations and constraints of UG The proposed analyses also bear on linguistic theory They provide crucial new data and new generalizations concerning such basic questions of generative syntax as discourse motivated movement operations the correlation of movement and agreement a shift from lexical case marking to structural case marking the licensing of structural case in infinitival constructions the structure of coordinate phrases possessive constructions with an external possessor and the role of event structure in syntax In addition to confirming or refuting certain specific hypotheses they also provide empirical evidence of the perhaps most basic tenet of generative theory according to which UG is part of the genetic endowment of the human species i e human languages do not develop parallel with the development of human civilization Some of the languages examined in this volume were spoken as much as 5000 years old still their grammars do not differ in any relevant respect from the grammars of languages spoken today

Semantics John Lyons, 1977 This book which can be read independently deals with more specifically linguistic problems in semantics and contains substantial original material

The Word Order of the Gospel of Luke Ivan Shing Chung Kwong, 2005-12-09 This work studies the word order of the Gospel of Luke and some of its prominent messages with consideration of systemic functional linguistic theories The first part of the work focuses on the relative positions of four constituents subject predicate complement and circumstantial adjunct of different types of Lukan clauses independent dependent infinitival participial and embedded clause The result gives some unmarked typical or common word order patterns and some marked word order patterns of all Lukan clauses The second part traces the foregrounded messages of the Gospel based on their related marked word order patterns incorporated with functional linguistic phenomena The result highlights the messages of Jesus disciples and his parents failure in understanding him Pilate's crime of handing over Jesus and Jesus predictions of his future sufferings and Peter's future failure JSNTS and Studies in New Testament Greek series
