## **Naturalist Pioneers Of Natural History:**

**The Naturalists** Alan C. Jenkins, 1978 From exploitation superstition and prejudice man's attitude to his environment and the other creatures who inhabit it has changed radically over the past two hundred years That it has done so has resulted largely from the work of the naturalist pioneers which first gradually dispelled ignorance and then replaced it with interest and sympathy This book celebrates these figures evaluates the contribution of zoos and National Parks in the cause of both science and humanity and looks at the varied and beautiful art forms which have arisen as a result of new perspectives and respect for the natural world     A Field Guide to Butterflies of the Greater Yellowstone Ecosystem Diane M. Debinski, James Pritchard, 2002-08-30 Yellowstone and Grand Teton National Parks while mostly noted for grizzly bears elk moose and other large mammals also host a high species diversity of butterflies owing to the ecosystem's vast area of pristine habitat Many of the nearly 120 butterflies described can also be found elsewhere in the Northern Rockies making the book useful beyond the artificial borders of the public lands Illustrated with color plates of each species A Field Guide to Butterflies of the Greater Yellowstone Ecosystem also provides basic information on butterfly anatomy and natural history as well as the proper way to catch and release butterflies though with a stern reminder that netting butterflies is not permitted in the national parks

Early American Nature Writers Daniel Patterson, 2007-11-30 At a time when the environment is of growing concern to students and general readers nature writing is especially meaningful This book profiles the literary careers of 52 early American nature writers such as John James Audubon Ralph Waldo Emerson Caroline Stansbury Kirkland Thomas Jefferson Henry David Thoreau and Mabel Osgood Wright Each entry is written by an expert contributor and discusses the writer's life and works Entries close with primary and secondary bibliographies and the encyclopedia ends with suggestions for further reading Global warming pollution and other issues have made the environment a topic of constant discussion these days Many environmental concerns were treated by early American nature writers who recognized the beauty of the natural world in an age of commercial expansion Some of the most famous writers of the 18th and 19th centuries wrote about nature and their works are stylistic masterpieces At a time when students are being encouraged to read and write about nonfiction these masterworks of early American nature writing are all the more important This book gives students and general readers a welcome introduction to early American nature writers     *The English Parson-naturalist* Patrick Armstrong, 2000 These parson naturalists made a significant contribution to the development of British scientific natural history and played an important role in the foundation of the conservation movement and in the origins of organisations such as the Royal Society for the Protection of Birds and the National Trust This book presents a full range of interesting and sometimes eccentric individuals from the early days of the Christian faith in the British Isles to modern times Missionary endeavor and service to the Empire brought the influence of the English parson naturalist to the very ends of the earth A key to the appreciation of the success of the parson naturalist phenomenon is understanding the social milieu in which these men worked Until the

twentieth century clergy were members of a relatively tightly knit social group often related to one another by kinship or marriage a man's clerical colleagues were also his scientific colleagues and his kinsfolk **The Great Naturalists** Robert Huxley, 2019-09-24 The story of natural history as seen through the lives observations and discoveries of the world's greatest naturalists We owe a debt of gratitude to the naturalists who described experimented collected and gave us the means to understand the natural world They came from all over the globe from classical times to the end of the nineteenth century when natural history changed from a mainly amateur pursuit to today's specialized scientific profession Braving dangers including storms pirates and disease in pursuit of cataloging the natural world pioneers such as Alexander von Humboldt and Charles Darwin changed the course of science with their groundbreaking theories This book includes many naturalists who are well known such as the earliest great natural historian Aristotle Carl Linnaeus the man who brought order to nature the ornithologist and painter John James Audubon and Georges Cuvier who established the concept of extinction Others are now given their rightful place Antony van Leeuwenhoek who made his own microscopes and discovered bacteria and Mary Anning the princess of paleontology who had an amazing self taught talent for finding fossils Many of these people were great artists as well as scientists and **The Great Naturalists** is illustrated with a selection of beautiful and precise paintings and drawings of birds animals fossils fish shells and rocks from the unparalleled collections of the Natural History Museum London

**Nature's Holism** Laurence Evans, 1999-08-10 In the association of the bee and the flower is a very advanced reflection of the process of evolution through natural selection Nature's Holism explores the coevolution of long associated species arriving at a holistic view of nature where the compatibility between species is significant In nature there are two interacting forces There is the numerical increase in numbers of a species termed a force of perpetuity Increasing numbers of a single species have an inevitable impact on the environment However as each species survives within an ecological context there is a feedback from the ecosystem as numbers increase requiring a necessary compatibility with the ecosystem Fitness is therefore defined not only by quantitative representation of genes in the next generation perpetuity but also the qualitative condition of compatibility with the habitat or ecosystem that provided the conditions and resources for this success **The**

**Song Of The Dodo** David Quammen, 2012-03-31 Why have island ecosystems always suffered such high rates of extinction In our age with all the world's landscapes from Tasmania to the Amazon to Yellowstone now being carved into island like fragments by human activity the implications of this question are more urgent than ever Over the past eight years David Quammen has followed the threads of island biogeography on a globe encircling journey of discovery **Naturalist's Years in the Rocky Mountains** Howard E. Evans, 2001-03 Twenty elegant essays examine animal behavior from hummingbirds to bumblebees thatcher ants to wrens owls to woodrats to wasps **Scientists of Faith** Dan Graves, The personal stories of

forty eight historic scientists and an overview of their contributions to their field and faith **Science, History and Social Activism** Garland E. Allen, Roy M. MacLeod, 2013-03-14 To earn a degree every doctoral candidate should go out to Harvard

Square find an audience and explain his or her dissertation Everett Mendelsohn s worldly advice to successive generations of students whether apocryphal or real has for over forty years spoken both to the essence of his scholarship and to the role of the scholar Possibly no one has done more to establish the history of the life sciences as a recognized university discipline in the United States and to inspire a critical concern for the ways in which science and technology operate as central features of Western society This book is both an act of homage and of commemoration to Professor Mendelsohn on his 70th birthday As befits its subject the work it presents is original comparative wide ranging and new Since 1960 Everett Mendelsohn has been identified with Harvard University and with its Department of the History of Science Those that know him as a teacher will also know him as a scholar In 1968 he began and after 30 years has just bequeathed to others the editorship of the *Journal of the History of Biology* among the earliest and one of the most important publications in its field At the same time he has been a pioneer in the social history and sociology of science He has formed particularly close working relationships with colleagues in Sweden and Germany as witnessed by his editorial presence in the *Sociology of Science Yearbook* *The Species Seekers: Heroes, Fools, and the Mad Pursuit of Life on Earth* Richard Conniff, 2011-10-25 Conniff tells the story of bold adventurers who risked death to discover strange life forms in the farthest corners of planet Earth *The Naturalist*, 1911 *The Australian Naturalist*, 1909 *Drawn from Life* Victoria Dickenson, 1998-01-01 An illustrated archeology of the imagination that reveals how artists and writers from the late 16th to the early 19th century most of whom had never seen North America portrayed the natural history and landscape of North America to European readers *Passions for Nature* Rochelle Johnson, 2009 Nineteenth century Americans celebrated nature through many artistic forms including natural history writing landscape painting landscape design theory and transcendental philosophy Although we tend to associate these movements with the nation s dawning environmental consciousness *Passions for Nature* demonstrates that they instead alienated Americans from the physical environment even as they seemed to draw people to it Rather than see these expressions of passion for nature as initiating environmental awareness this study reveals how they contributed to a culture that remains startlingly ignorant of the details of the material world Using as a touchstone the writings of nineteenth century philanthropist Susan Fenimore Cooper the daughter of famed author James Fenimore Cooper *Passions for Nature* reveals that while a generalized passion for nature was intense and widespread in her era cultural attention to the real physical world was quite limited Popular artistic forms represented the natural world through specific metaphors for the American experience cultivating a national tradition of valuing nature in terms of humanity Johnson crosses disciplinary boundaries to demonstrate that anthropocentric understandings of the natural world result not only from the growing gulf between science and imagination that C P Snow located in the early twentieth century but also and surprisingly from cultural productions traditionally viewed as positive engagements with the environment By uncovering the roots of a cultural alienation from nature *Passions for Nature* explains how the United States came to be a nation that simultaneously reveres

the natural world and yet remains dangerously distant from it      **The Selborne Pioneer** Ted Dadswell, 2017-03-02 Gilbert White's name is known universally but as Ted Dadswell insists in this book important aspects of his work have frequently been overlooked even by scholarly editors The Selborne naturalist 1720-1793 has been described as a prince of personal observers but a shrewd analytical questioning and comparing was also typical of his natural knowledge Exceptional even in his general aims White studied the behaviour the manners and conversation of his animals and plants He saw moreover that an animal or plant and indeed a parish such as his own was unitary in operation again and again a cause had numerous effects and an effect numerous causes Observation could go forward in circumstances such as these if one was both sharp eyed and patient but how could true investigation be managed How could a particular cause or effect be isolated or tested Here what Dadswell calls White's comparative habit was put to good use Gilbert White was a careful keeper of records and using these comparatively he appealed to controls while examining his living creatures Questioning and testing even the entirely usual White was brought back repeatedly to the notion of adaptability His zoological findings often concerned changed or changing animals or birds and their social and inter personal relationships Today we can seem particularly well placed to appreciate his methods and factual claims our ethologists and ecologists have seemingly corroborated much of what he did And yet just this corroboration renders him the more mysterious To properly assess White as naturalist we must be able to approach him not only scientifically but also historically He hoped for the emergence of teams of behavioural workers but did not try to pre-empt what would be achieved only by such teams and while he saw with his own eyes as his friend John Mulso says he was substantially affected by certain of his contemporaries and predecessors His journals and notebooks show us the naturalist at work When a perhaps unexpected combination of influences is allowed for his unique activities can be at least partially explained      *Curious About Nature* Tim Burt, D. B. A. Thompson, Des Thompson, 2020-02-20 Proclaims the enjoyment of teaching studying and learning outdoors via the inspirational stories of some remarkable people      James Graham Cooper, Pioneer Western Naturalist Eugene V. Coan, 1982      **Yosemite Nature Notes**, 1953      *In the Nature of Landscape* David Matless, 2015-06-03 In the Nature of Landscape presents regional cultural landscape as a new direction for research in cultural geography Represents the first cultural geographic study of the Norfolk Broads region of eastern England Addresses regional cultural landscape through consideration of narratives of landscape origin debates over human conduct the animal and plant landscapes of the region and visions of the ends of landscape through pollution and flood Draws upon in depth original research spanning almost two decades of archival work interviews and field study Covers a great diversity of topics from popular culture to scientific research folk song to holiday diaries planning survey to pioneering photography and ornithology to children's literature Features a variety of illustrative material including original photographs paintings photography advertising imagery scientific diagrams maps and souvenirs
