Nature Behavior Of Grain Boundaries:

The Nature and Behavior of Grain Boundaries Anning Hu, 2012-12-06 In view of the dramatically increased interest in the study of grain boundaries during the past few years the Physical Metallurgy Committee of The Institute of Metals Division of The Metallurgical Society AIME sponsored a four session symposium on the NATURE AND BEHAVIOR OF GRAIN BOUNDARIES at the TMS AIME Fall Meeting in Detroit Michigan October 18-19 1971 The main objectives of this symposium were to examine the more recent developments theoretical and experimental in our understanding of grain boundaries and to stimulate further studies in these and related areas This volume contains most of the papers presented at the Symposium It is regrettable that space limitations allow the inclusion of only four of the unsolicited papers in addition to thirteen invited papers The papers are grouped into three sections according to their major content STRUCTURE OF GRAIN BOUNDARIES ENERGETICS OF GRAIN BOUNDARIES and GRAIN BOUNDARY MOTION AND RELATED PHENOMENA Grain boundaries or crystal interfaces have been of both academic and practical interest for many years An early seminar on Metal Interfaces was documented in 1952 by ASM The Fourth Metallurgical Colloquium held in France 1960 had a broad coverage on Properties of Grain Boundaries More recently the Australian Institute of Metals sponsored a conference on interfaces with the proceedings being published by Butterworths in 1969
