Mind and Nature Hermann Weyl, 2009-03-31 Hermann Weyl 1885 1955 was one of the twentieth century's most important mathematicians as well as a seminal figure in the development of quantum physics and general relativity He was also an eloquent writer with a lifelong interest in the philosophical implications of the startling new scientific developments with which he was so involved Mind and Nature is a collection of Weyl's most important general writings on philosophy

mathematics and physics including pieces that have never before been published in any language or translated into English or that have long been out of print Complete with Peter Pesic's introduction notes and bibliography these writings reveal an unjustly neglected dimension of a complex and fascinating thinker In addition the book includes more than twenty photographs of Weyl and his family and colleagues many of which are previously unpublished Included here are Weyl's exposition of his important synthesis of electromagnetism and gravitation which Einstein at first hailed as a first class stroke of genius two little known letters by Weyl and Einstein from 1922 that give their contrasting views on the philosophical implications of modern physics and an essay on time that contains Weyl's argument that the past is never completed and the present is not a point Also included are two book length series of lectures *The Open World* 1932 and *Mind and Nature* 1934 each a masterly exposition of Weyl's views on a range of topics from modern physics and mathematics Finally four retrospective essays from Weyl's last decade give his final thoughts on the interrelations among mathematics philosophy and physics intertwined with reflections on the course of his rich life

Human Nature, Mind and the Self in Adam Smith's Moral Philosophy Riccardo

Bonfiglioli,2024-04-24 This book investigates the problematisation in Adam Smith's moral philosophy of a classical question what makes us human beings from a moral standpoint To do this Riccardo Bonfiglioli explores the relationship between the concepts of human nature mind and the self in order to reconstruct Smith's theory of subjectivity After providing a systematic reconstruction of Adam Smith's conceptions of human nature mind and the self exploring some aspects of Smith's philosophy nature philosophy of history sympathy and imagination and their empirical expressions education conduct and character Bonfiglioli argues that in Adam Smith's work the meaning of moral human beings would depend on the human being's effort to live in harmony with oneself and the others According to Bonfiglioli in Smith's moral theory this harmony with oneself and the others would be achieved in relation to a certain kind of awareness that can be possible when human beings try to judge the conduct and try to act according to the impartial spectator Specifically this impartial spectator is reinterpreted by the author in the light of the concept of immediacy
