Planetary Systems: Formation, Evolution, and Detection Bernard F. Burke, Jürgen H. Rahe, Elizabeth E. Roettger, 2012-12-06 Are there other planetary systems like ours Other planets like ours Is there life elsewhere in the Universe So asks Dr Lew Allen Jr in the Foreword In December of 1992 theorists observers and instrument builders gathered at the California Institute of Technology to discuss the search for answers to these questions The International Conference entitled Planetary Systems Formation Evolution and Detection and supported through NASA's newly formed TOPS Toward Other Planetary Systems program was the first of a series of conferences uniting researchers across disciplines and political boundaries to share thoughts and information on planetary systems The conference was sponsored by NASA hosted by JPL at Caltech and endorsed by the 1992 International Space Year Association These proceedings include discussions of topics ranging from stellar disk and planetary formation to new ways of searching for other stellar systems containing planets The authors represent a wide range of nationalities disciplines and points of view The second international conference took place in December of 1993

Origins of Universal Systems Alexander Alan Scarborough, 2008-09-19 When the right answers are found they will be simple and beautiful Einstein Paraphrasing Thomas Kuhn in his *Structure of Scientific Revolutions* there can be no change in direction of scientific thought unless there is a viable alternative Now after 35 years of persistent research the author's plethora of substantiated evidence offers science a valid alternative to the Big Bang the LB FLINÉ BEC model of universal origins one that fulfills Einstein's prediction and meets Kuhn's criteria In fulfilling both predictions the new model reveals a plethora of impossibilities comprising the Big Bang myth while forming powerful arguments for relegating the Big Bang to the ashes of history The revolutionary model a macroscopic theory of everything is ideal for a microscopic Theory of Everything Thomas Huxley stated it best The microcosm repeats the macrocosm a connection placing science in a favorable position for attaining the long sought Theory of Everything As long as the Big Bang Accretion hypotheses remain in vogue comprehending universal origins and functions will remain impossible In sharp contrast the new model alternative opens floodgates to definitive evidence of universal origins and functions Why in the Big Bang perspective substantiated solutions to universal anomalies will always remain unattainable while in the LB FLINÉ BEC perspective substantiated solutions to universal anomalies are readily attainable Three simple and beautiful examples out of many The dynamic fiery geometrical spacing of planets in elliptical orbits Why Pluto was originally the tenth planet in our Solar System and now is the ninth planet Why extra solar systems are weirdly different from our geometrically spaced Solar System
