Paleoethnobotany Deborah M Pearsall, 2016-06-16 This new edition of the definitive work on doing paleoethnobotany brings the book up to date by incorporating new methods and examples of research while preserving the overall organization and approach of the book to facilitate its use as a textbook In addition to updates on the comprehensive discussions of macroremains pollen and phytoliths this edition includes a chapter on starch analysis the newest tool in the paleoethnobotanist's research kit Other highlights include updated case studies expanded discussions of deposition and preservation of archaeobotanical remains updated historical overviews new and updated techniques and approaches including insights from experimental and ethnoarchaeological studies and a current listing of electronic resources Extensively illustrated this will be the standard work on paleoethnobotany for a generation

Paleoethnobotany Deborah M. Pearsall, 2013-10-22 This book describes the approaches and techniques of paleoethnobotany the study of the interrelationships between human populations and the plant world through the archaeological record Its purpose is twofold First it assembles in one volume the three major methods of paleoethnobotany the analysis of macroremains pollen analysis and phytolith analysis for the student or professional

interested in the field Second it presents on paleoethnobotanist s view of the discipline its past present and future its strengths and weaknesses and its role in modern archaeology A comprehensive reference work for archaeologists and paleobotanists interested in reconstructing interrelationships between humans and plants from the archaeological record The first general of work theory and methods to emerge from this subdiscipline which has developed during the past twenty years Makes the approaches and techniques of this field more accessible to the general anthropological and botanical audiences Offers archaeologists a handbook of field sampling and flotation techniques as well as an introduction to methods of analysis and interpretation in paleoethnobotany *Paleoethnobotany, Third Edition* Deborah M Pearsall,2015-09 This new edition of the definitive work on doing paleoethnobotany brings the book up to date by incorporating new methods and examples of research while preserving the overall organization and approach of the book to facilitate its use as a textbook In addition to updates on the comprehensive discussions of macroremains pollen and phytoliths this edition includes a chapter on starch analysis the newest tool in the paleoethnobotanist s research kit Other highlights include updated case studies expanded discussions of deposition and preservation of archaeobotanical remains updated historical overviews new and updated techniques and approaches including insights from experimental and ethnoarchaeological studies and a current listing of electronic resources Extensively illustrated this will be the standard work on paleoethnobotany for a generation

Current Paleoethnobotany Christine A. Hastorf, Virginia S. Popper, 1988 Paleoethnobotany offers powerful tools for reconstructing past cultures by examining the interaction of human populations with the plant world Plant remains from archaeological sites can provide information for a number of disciplines archaeologists may use such remains to examine how plants were used how agriculture changed over time or how plant offerings in burials signaled social status ecologists and botanists may use them to study morphological changes in plants due to domestication Combining case studies and theoretical discussions Current Paleoethnobotany presents the first full discussion of the major stages and problems of paleoethnobotanical research from designing and testing equipment such as flotation machines to quantification and interpretation The volume explores a wide range of issues concerning collection techniques analytical procedures and interpretive models that will provide accurate information about past human societies from plant remains The contributors offer data on specific regions as well as more general background information on the basic techniques of paleoethnobotany for the nonspecialist Throughout they explicitly examine the assumptions underlying paleoethnobotanical methods and the ways in which those assumptions affect anthropological and ecological research questions Based on a symposium presented at the 1985 meeting of the Society for American Archaeology Current Paleoethnobotany moves beyond a technique oriented view of paleoethnobotany to successfully integrate current thinking about both procedures and research goals The contributors demonstrate the potential value of the field of paleoethnobotany and open the way for further discussion and improvement **Ethnomedicine and Drug Discovery** M.M. Iwu, J. Wootton, 2002-03-01 Approx 344 pages

Ethnobiology E. N. Anderson, Deborah Pearsall, Eugene Hunn, Nancy Turner, 2012-02-14 The single comprehensive treatment of the field from the leading members of the Society of Ethnobiology The field of ethnobiology the study of relationships between particular ethnic groups and their native plants and animals has grown very rapidly in recent years spawning numerous subfields Ethnobiological research has produced a wide range of medicines natural products and new crops as well as striking insights into human cognition language and environmental management behavior from prehistory to the present This is the single authoritative source on ethnobiology covering all aspects of the field as it is currently defined Featuring contributions from experienced scholars and sanctioned by the Society of Ethnobiology this concise readable volume provides extensive coverage of ethical issues and practices as well as archaeological ethnological and linguistic approaches Emphasizing basic principles and methodology this unique textbook offers a balanced treatment of all the major subfields within ethnobiology allowing students to begin guided research in any related area from archaeoethnozoology to ethnomycology to agroecology Each chapter includes a basic introduction to each topic is written by a leading specialist in the specific area addressed and comes with a full bibliography citing major works in the area All chapters cover recent research and many are new in approach most chapters present unpublished or very recently published new research Featured are clear distinctive treatments of areas such as ethnozoology linguistic ethnobiology traditional education ethnoecology and indigenous perspectives Methodology and ethical action are also covered up to current practice Ethnobiology is a specialized textbook for advanced undergraduates and graduate students it is suitable for advanced level ethnobotany ethnobiology cultural and political ecology and archaeologically related courses Research institutes will also find this work valuable as will any reader with an interest in ethnobiological fields Case Studies in Environmental Archaeology Elizabeth Reitz, C. Margaret Scarry, Sylvia J. Scudder, 2008 This book highlights studies addressing significant anthropological issues in the Americas from the perspective of environmental archaeology The book uses case studies to resolve questions related to human behavior in the past rather than to demonstrate the application of methods Each chapter is an original or revised work by an internationally recognized scientist This second edition is based on the 1996 book of the same title The editors have invited back a number of contributors from the first edition to revise and update their chapter New studies are included in order to cover recent developments in the field or additional pertinent topics Research Methods for Anthropological Studies of Food and Nutrition Janet Chrzan, John Brett, 2017-02-01 The dramatic increase in all things food in popular and academic fields during the last two decades has generated a diverse and dynamic set of approaches for understanding the complex relationships and interactions that determine how people eat and how diet affects culture These volumes offer a comprehensive reference for students and established scholars interested in food and nutrition research in Nutritional and Biological Anthropology Archaeology Socio Cultural and Linguistic Anthropology Food Studies and Applied Public Health *Historical Ethnobiology* Maria Franco Trindade Medeiros, 2020-11-20 Historical Ethnobiology

presents a unique approach to analyzing human nature interactions using theoretical and methodological aspects to examine historical scientific knowledge This book disseminates the notion that past local narratives of biodiversity influence the determination of both historical and modern scientific decisions Beginning with a brief history of ethnobiology s development this book delves into conceptual models historical knowledge areas and the theoretical matrix of ethnobiology This book also focuses on the importance of memory including topics of memory production by human in different epochs and how individual memory records contribute to social history and the understanding of the past effects of human interaction with nature Looking ahead it discusses the importance of records such as these for determining future mankind s relationships with nature to preserve biodiversity and ensure conservation Historical Ethnobiology is the first book to focus on past human nature interactions and their interpretations in today s scientific culture This book is an excellent resource for students and researchers in biology ethnobiology and anthropology Presents an inclusive interpretation and use of historical botanical zoological and geographical registers kept in institutions to reconnect the past with modern issues Illuminates documental analysis of past interactions between humans and nature Provides a comprehensive and accessible reference point to provide insights into a rapidly growing field

Integrating Zooarchaeology and Paleoethnobotany Amber VanDerwarker, Tanya M. Peres, 2010-01-22 In recent years scholars have emphasized the need for more holistic subsistence analyses and collaborative publications towards this endeavor have become more numerous in the literature However there are relatively few attempts to qualitatively integrate zooarchaeological animal and paleoethnobotanical plant data and even fewer attempts to quantitatively integrate these two types of subsistence evidence Given the vastly different methods used in recovering and quantifying these data not to mention their different preservational histories it is no wonder that so few have undertaken this problem Integrating Zooarchaeology and Paleoethnobotany takes the lead in tackling this important issue by addressing the methodological limitations of data integration proposing new methods and innovative ways of using established methods and highlighting case studies that successfully employ these methods to shed new light on ancient foodways The volume challenges the perception that plant and animal foodways are distinct and contends that the separation of the analysis of archaeological plant and animal remains sets up a false dichotomy between these portions of the diet In advocating qualitative and quantitative data integration the volume establishes a clear set of methods for 1 determining the suitability of data integration in any particular case and 2 carrying out an integrated qualitative or quantitative approach Plants And Harappan Subsistence Steven A. Weber, 2019-07-11 This book aims to interpret the archeobotanical remains at the site of Rojdi in northwest India with reference to diet and environment and within a socio economic framework It discusses artifactual material which associates it with the Harappan Cultural Tradition *Nature Wars* Roy Ellen, 2020-11-01

Organized around issues debates and discussions concerning the various ways in which the concept of nature has been used this book looks at how the term has been endlessly deconstructed and reclaimed as reflected in anthropological scientific and

similar writing over the last several decades Made up of ten of Roy Ellen s finest articles this book looks back at his ideas about nature and includes a new introduction that contextualizes the arguments and takes them forward Many of the chapters focus on research the author has conducted amongst the Nuaulu people of eastern Indonesia

Intellectual Property Rights and Biodiversity Conservation Timothy M. Swanson,1995 Provides a detailed analysis of the economic and scientific rationales for biodiversity conservation

Phytomedicine Rouf Ahmad Bhat,Khalid Rehman Hakeem,Moonisa Aslam Dervash,2021-02-20 *Phytomedicine A Treasure of Pharmacologically Active Products from Plants* aims to present updated knowledge of plant based medicines in terms of their research and development production and utilization from the viewpoint of sustainability and by using the latest technologies The book explores different phytometabolites on a mass scale coupled with the efficacy performance and applicability on target organisms to treat curable and fatal diseases Readers will find a coherent package of phytotherapeutic information regarding inclusive assortment of research based scientific amplitude of metabolites from the plant world encompassing various action plans Information is presented sequentially regarding phytochemistry biological activity and the serviceable aspects of bioactive compounds The book also addresses various advancements and achievements of novel drugs from plants using molecular and enzymatic activities and various technological tools in an ecofriendly fashion Discusses phytotherapeutic properties for a wide range of medical conditions including anti pyretic anti infective anti malarial Anti AIDS anti diabetic anti cancerous immune modulatory applications Includes a discussion of synergistic effects of formulations and antagonistic drug interactions Addresses advancements and achievements of novel plant based drugs using molecular enzymatic activities and various technological tools in an eco friendly fashion

Our Knowledge Is Not Primitive Wendy Makoons Geniusz,2022-12-05 Traditional Anishinaabe Ojibwe or Chippewa knowledge like the knowledge systems of indigenous peoples around the world has long been collected and presented by researchers who were not a part of the culture they observed The result is a colonized version of the knowledge one that is distorted and trivialized by an ill suited Eurocentric paradigm of scientific investigation and classification In *Our Knowledge Is Not Primitive* Wendy Makoons Geniusz contrasts the way in which Anishinaabe botanical knowledge is presented in the academic record with how it is preserved in Anishinaabe culture In doing so she seeks to open a dialogue between the two communities to discuss methods for decolonizing existing texts and to develop innovative approaches for conducting more culturally meaningful research in the future As an Anishinaabe who grew up in a household practicing traditional medicine and who went on to become a scholar of American Indian studies and the Ojibwe language Geniusz possesses the authority of someone with a foot firmly planted in each world Her unique ability to navigate both indigenous and scientific perspectives makes this book an invaluable contribution to the field of Native American studies and enriches our understanding of the Anishinaabe and other native communities
