

A woman with long brown hair, wearing a brown t-shirt and patterned pants, is sitting in a meditative pose on a large orange cushion on a rocky cliff edge. She is looking out over a vast, misty mountain landscape. The background is a mix of dark, rocky terrain and a bright, hazy sky. The text 'Gender Studies' is overlaid in the top right, 'NATURE VS CULTURE' is in the center, and 'Gender Development' is at the bottom right.

### **Gender in the Book of Ben Sira**

Teresa Ann Ellis, 2013-10-30 *Gender in the Book of Ben Sira* is a semantic analysis and also an investigation of hermeneutical pathways for performing such an analysis A comparison of possible Greek and Hebrew gender taxonomies precedes the extensive delineation of the target category gender The delineation includes invisible influences in the Book of Ben Sira such as the author s choices of genre and his situation as a member of a colonized group within a Hellenistic empire When the Book of Ben Sira s genre constrained invectives against women and male fools are excluded the remaining expectations for women and for men are mostly equivalent in terms of a pious life lived according to Torah However Ben Sira says nothing about distinctions at the level of how living according to Torah would differ for the two groups His book presents an Edenic ideal of marriage through allusions to Genesis 1 to 4 and a substantial overlap of erotic discourse for the female figures of Wisdom and the intelligent wife creates tropes similar to those of the Song of Songs In addition Ben Sira s colonial status affects what he says and how he says it by writing in Hebrew he could craft the Greek genres of encomium and invective to carry multiple levels of meaning that subvert Hellenistic Greek claims to cultural superiority

*Gender and Rural*

*Geography* Jo Little, 2017-09-29 Gender and Rural Geography explores the relationship between gender and rurality Feminist theory gender relations and sexuality have all become central concerns of geographical research and significant progress has been made in terms of our understanding of both the broad relationship between gender and geography and the more detailed differences in the lives of men and women over space The development of feminist perspectives and the study of gender relations in geography has however been fairly uneven over the discipline Both theoretical and empirical work on gender has tended to be concentrated within social and cultural geography Moreover it has been directed largely towards the urban sphere

*Seeing Nature Through Gender* Virginia Scharff, 2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender *Seeing Nature through Gender* here reintroduces gender as a meaningful category of analysis for environmental history showing how women's actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd's masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred bunnies Others are dead serious as in a chilling portrait of how endocrine disrupters are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history *Seeing Nature through Gender* bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet

*Gender* Claire Colebrook, 2003-10-20 Why has Western thought been so persistent in its organisation of human bodies and other categories in terms of the binary opposition male and female Is gender nothing more than an ideology or does it have its basis in sexual difference This invaluable introductory guide offers a clear overview of the concept and problem of gender Claire Colebrook places the term in its historical contexts and traces its development from the Enlightenment to the present before moving on to the evolution of the concept of gender from within the various stances of feminist criticism and exploring recent developments in queer theory and post feminism Close analysis of key literary texts including *Frankenstein* *Paradise Lost* and *A Midsummer Night s Dream* shows how specific styles of literature enable reflection on gender
