Clinical Teaching in Nursing Ruth White, Christine E. Ewan, 2013-11-11. This book aims to assist clinical teachers in the practice of clinical teaching. It assumes that clinical teachers will bring to their task a background knowledge of educational principles, experience in a clinical nursing field, knowledge of substantive nursing content, a love of teaching, and a desire to share with their students the joys, tears, challenge, and wonder of learning in the clinical setting. The format is designed around a set of commonly encountered problems and encourages readers, whether on the threshold of a career as a clinical teacher or those who are experienced, to think through their responses to the problem situation before reading on to a disclosure of possible courses of action. In brief, the book is a companion to *Teaching Nursing: A Self-Instructional Handbook* (Ewan and White, 1984). The authors' interest in clinical teaching can be traced through a number of years in a variety of teaching careers with multidisciplinary health professional groups of whom nurses comprise the majority of practitioners. As senior lecturers in the School of Medical Education, the authors were involved in developing and teaching a Master of Health Personnel Education Degree course; the students or Fellows in that programme were all graduates from a broad range of health care disciplines: nursing, medicine, physiotherapy, occupational therapy, nutrition, dentistry, health education, health resources management, radiography, social work, community development, occupational safety and health.

Psychiatric Nursing Peggy Martin, 1987-11-11. In line with the recommendations of Project 2000 and the 1982 RMN syllabus, this is an important new book which takes a fresh look at the requirements of trainee psychiatric nurses and their teachers. The book is divided into two parts. Part One: Concepts establishes the nurses' approach to psychiatric care as an individual and as a member of a team. Part Two: Care explores the application of concepts through numerous patient profiles and care plans based on conceptual models. The text is well illustrated and attractively designed throughout. The author, Peggy Martin, is closely involved in nurse training and, as well as being aware of the needs of the practising nurse, has a strong commitment to Peplau's developmental model, which she has used in this book.

The Routledge Handbook of Paleopathology Anne L. Grauer, 2022-12-30 The Routledge Handbook of Paleopathology provides readers with an overview of the study of ancient disease The volume begins by exploring current methods and techniques employed by paleopathologists as means to highlight the range of data that can be generated the types of questions that can be methodologically addressed our current limitations and goals for the future Building on these

foundations the volume introduces a range of diseases and conditions that have been noted in the fossil archaeological and historical record offering readers a foundational understanding of pathological conditions along with their potential etiologies. Importantly an evolutionary and highly contextualized assessment of diseases and conditions will be presented in order to demonstrate the need for adopting anthropological biological and clinical approaches when exploring the past and interpreting the modern world. The volume concludes with the contextualization of paleopathological research. Chapters highlight ways in which analyses of health and disease in skeletal and mummified remains reflect political and social constructs of the past and present. Health and disease are tackled within evolutionary perspectives across deep time and generationally and the nuanced interplay between disease and behavior is explored. The volume will be indispensable for archaeologists bioarchaeologists and historians and those in medical fields as it reflects current scholarship within paleopathology and the field's impact on our understanding of health and disease in the past the present and implications for our future.

Current Issues in Nursing Peta Allan, Moya Jolley, 2013-11-11 The editors' intention in the production of this book was to provide a realistic picture of the present state of nursing. This has been presented from a number of different but interlinked perspectives. The decades since the inception of the National Health Service have been ones of significant change both in society at large and in the field of health care. The period has witnessed political economic social scientific and technological change taking place ever more rapidly whilst in terms of health care demand and expectations continue to increase apace. Nursing throughout the period has been influenced by and has responded to these prevailing influences and continues to do so. Contributors to this volume have sought to examine in depth some of the current issues in nursing at the present time. Each chapter examines a specific issue in the current nursing context and is therefore capable of standing alone. But considered together the chapters enable many aspects of the current debate on and development of nursing to be seen as a whole. It is hoped that this book will serve two fundamental purposes. First to stimulate debate and activity by all nurses in their particular sphere of influence and in the wider world of nursing. Second it aims to inform those undertaking pre or post registration nursing programmes and thus assist their understanding of the state of nursing.
