older about their grandparents travels and in particular some of which included them Although places visited in the three years since the last book include some return trips to old favorites this book reflects only the new places visited In particular India the Middle East the Far East Eastern Europe and nearer home the beautiful Northeast England it reflects the visits of the grandchildren featured more this time As we now have two grandchildren living in the Costa del Sol as well as the Aussie part of the family Spain and Australia are now regular destinations Although the UK is much smaller in area than those two countries it is packed with wonderful places to visit so trips at home are still often very much included in our travels Added to that cruising has taken off in the last decade a bit like package deals to Europe did in the 1960s and has provided a very enjoyable new dimension to the journeys made Cruises are featured several times in this book More Journeys of a Lifetime and now Even More Journeys of a Lifetime reflect the further growth in long haul travel and the massive increase in cruising Hope you enjoy my further travels around this small world of ours going on from those early dreams of mine and continuing to do so

Ecopsychology Peter H. Kahn, Jr.,Patricia H. Hasbach,2012-07-20 An ecopsychology that integrates our totemic selves our kinship with a more than human world with our technological selves We need nature for our physical and psychological well being Our actions reflect this when we turn to beloved pets for companionship vacation in spots of natural splendor or spend hours working in the garden Yet we are also a technological species and have been since we fashioned tools out of stone Thus one of this century s central challenges is to embrace our kinship with a more than human world our totemic self and integrate that kinship with our scientific culture and technological selves This book takes on that challenge and proposes a reenvisioned ecopsychology Contributors consider such topics as the innate tendency for people to bond with local place a meaningful nature language the epidemiological evidence for the health benefits of nature interaction the theory and practice of ecotherapy Gaia theory ecovillages the neuroscience of perceiving natural beauty and sacred geography Taken together the essays offer a vision for human flourishing and for a more grounded and realistic environmental psychology

The Rediscovery of the Wild Peter H. Kahn,

Jr., Patricia H. Hasbach, 2013-01-25 A compelling case for connecting with the wild for our psychological and physical well being and to flourish as a species We often enjoy the benefits of connecting with nearby domesticated nature a city park a backyard garden But this book makes the provocative case for the necessity of connecting with wild nature untamed unmanaged not encompassed self organizing and unencumbered and unmediated by technological artifice We can love the wild We can fear it We are strengthened and nurtured by it As a species we came of age in a natural world far wilder than today s and much of the need for wildness still exists within us body and mind The Rediscovery of the Wild considers ways to engage with the wild protect it and recover it for our psychological and physical well being and to flourish as a species The contributors offer a range of perspectives on the wild discussing such topics as the evolutionary underpinnings of our need for the wild the wild within including the primal passions of sexuality and aggression birding as a portal to wildness children s fascination with wild animals wildness and psychological healing the shifting baseline of what we consider wild and the true work of conservation
