Time and Clocks (Illustrations) Sir Henry H. Cunynghame, When we read the works of Homer or Virgil or Plato or turn to the later productions of Dante of Shakespeare of Milton and the host of writers and poets who have done so much to instruct and amuse us and to make our lives good and agreeable we are apt to look with some disappointment upon present times And when we turn to the field of art and compare Greek statues and Gothic or Renaissance architecture with our modern efforts we must feel bound to admit our inferiority to our ancestors And this leads us perhaps to question whether our age is the equal of those which have gone before or whether the human intellect is not on the decline This feeling however proceeds from a failure to remember that each age of the world has its peculiar points of strength as well as of weakness During one period that self denying patriotism and zeal for the common good will be developing which² is necessary for the formation of society During another the study of the principles of morality and religion will be in the ascendant During another the arts will take the lead during another poetry tragedy and lyric poetry and

prose will be cultivated during another music will take its turn and out of rude peasant songs will evolve the harmony of the opera To our age is reserved the glory of being easily the foremost in scientific discovery Future ages may despise our literature surpass us in poetry complain that in philosophy we have done nothing and even deride and forget our music but they will only be able to look back with admiration on the band of scientific thinkers who in the seventeenth century reduced to a system the laws that govern the motions of worlds no less than those of atoms and who in the eighteenth and nineteenth founded the sciences of chemistry electricity sound heat light and who gave to mankind the steam engine the telegraph railways the methods of making huge structures of iron the dynamo the telephone and the thousand applications of science to the service of man And future students of history who shall be familiar with the conditions of our life will I think be also struck with surprise at our estimate of our own peculiar capabilities and faculties They will note with astonishment that a gentleman of the 19th century an age mighty in science and by no means pre eminent in art literature and philosophy should have considered it disgraceful to be ignorant of the accent with which a Greek or a Roman thought fit to pronounce a word should have been ashamed to be unable to construe a Latin aphorism and yet should have considered it no shame at all not to know how a telephone was made and why it worked They will smile when they observe that our highest university degrees our most lucrative rewards were given for the study of dead languages or arch ological investigations and that science our glory and that for which we have shown real ability should only have occupied a secondary place in our education They will smile when they learn that we considered that a knowledge of public affairs could only be acquired by a grounding in Greek particles or that it could ever have been thought that men could not command an army without a study of the tactics employed at the battle of Marathon But the battle between classical and scientific education is not in reality so much a dispute regarding subjects to be taught as between methods of teaching It is possible to teach classics so that they become a mental training of the highest value It is possible to teach science so that it becomes a mere enslaving routine The one great requirement for the education of the future is firmly to grasp the fact that a study of words is not a study of things and that a man cannot become a carpenter merely by learning the names of his tools To be continue in this ebook [Sailing Knots](#) Geoffrey Budworth,2000 [Why Knot?](#) Philippe Petit,2013-04-09 Mr Petit is the perfect teacher in this fascinating educational volume on knot tying an art and science that has held civilization together The Wall Street Journal Philippe Petit is known for his astounding feat of daring when on August 7 1974 he stepped out on a wire illegally rigged between the World Trade Center s twin towers in New York City But beyond his balance courage and showmanship there was one thing Petit had to be absolutely certain of his knots Without the confidence that his knots would hold he never would have left the ground In fact while most of us don t think about them beyond tying our shoelaces the humble knot is crucial in countless contexts from sailing to sports to industrial safety to art agriculture and more In this truly unique book Petit offers a guide to tying over sixty of his essential knots with practical sketches illustrating his methods and clear tying instructions Filled with

photos in which special knots were used during spectacular high wire walks quirky knot trivia personal anecdotes helpful tips magic tricks and special tying challenges Why Knot will entertain and educate readers of all ages In reading Philippe s book we are cogently reminded that without the ability to secure a rope or tether a goat or make fast the sheets of a galley much of the civilization that we take for granted would disappear as easily as a slipknot in the hands of a Vegas conjuror Sting musician and activist His descriptions are clear he deploys humor frequently and he makes his points with anecdotes that are colorful and memorable Explaining the purpose and creation of knots and thanks to those flawless drawings Mr Petit earns perfect marks The Wall Street Journal Sailing Knots Alexander Meyer,2017-02-25 Sailing knots are a fundamental part of a sailing course and of the skipper exam because on a boat there is always a line that has to be tied somewhere Or lines have to be tied to each other For every situation there is a perfectly secure knot one that is easy to tie and easy to loosen In this little booklet of 58 pages the most important sailor s knots are explained through word and pictures 75 black and white illustrations show how to tie the nautical knots step by step This is the optimal preparation for your sailing course and the skipper exam The following knots are explained Figure eight knot Square knot Bowline knot Cleat knot Clove hitch Sheet bend Double Sheet bend Round turn and two half hitches Rolling hitch Cleat with bowline knot It is recommended to also order the DVD Sailing Knots by Alexander Meyer which is a very useful addition to the book **The Nautical Magazine** ,1948 *MotorBoating* ,1997-01 **Reeds Eastern Almanac 2017** Perrin Towler,Mark Fishwick,2016-08-25 Available as an ebook exclusively from Bloomsbury com Reeds Eastern Almanac is provided in Web PDF format for viewing on all compatible devices including tablets laptop and desktop computers PLEASE NOTE this ebook is NOT compatible with Amazon Kindle devices The Reeds Eastern Almanac covers the UK east coast from Ramsgate to Cape Wrath including the Shetland and Orkney Islands and from Nieuport to Delfzijl and Helgoland It is the complete guide for North Sea mariners offering ready access to essential navigation information by virtue of its clear layout and user friendly format Completely updated for 2017 topics include seamanship pilotage tide tables safety procedures navigation tips radio lights waypoints weather forecast information around UK and European waters communications Mayday and distress procedures The spiral binding allows the Almanac to be opened flat on the chart table and the large type and clear layout makes information easy to read even in adverse conditions This handy volume is ideal for anyone cruising the North Sea The ebook incorporates the free Reeds Marina Guide Also available free supplements of up to date navigation changes from January to June at www.reedsnauticalalmanac.co.uk There are some things I would not go to sea without Reeds is one of them Sir Chay Blyth The Merchant Marine Manual Eugene O Donnell,2015-03-12 This manual first published in 1918 was prepared for the guidance and instruction of Apprentices on the Training Ships It covers any aspect of traditional seamanship **Chapman Essential Marine Knots** Dominique Le Brun,2004 Here is every important knot that a boater will need exquisitely illustrated in a stay open spiral bound book Starting with a fascinating history of rope and its nautical uses the guide contains pictures of
