Navigators Universe Libro De Cosmographi:

Cosmographers and Pilots of the Spanish Maritime Empire Ursula Lamb, 2024-10-28 These essays deal with questions of navigation and more broadly the intellectual challenges posed by Spain's acquisition of an empire across the Atlantic. Crudely they had to find out what was where and how to get there. The first section of the volume looks at the 16th century Sevillian cosmographers and pilots charged with this task, their achievements, the social and political context in which they worked and the methods used to establish scientific truths including the resort to litigation. Ursula Lamb then turns to examine specific problems from the routing of transatlantic shipping to the application of cartographic coordinates to allocate unexplored territories. The final articles move forward to the time when after a lapse of two centuries Spanish nautical science became revitalised and the Spanish Hydrographic Office was established.

Explorers, Fortunes and Love Letters New Netherland Institute, 2010-04-01 When Henry Hudson sailing on the Half Moon for the Dutch East India Company first laid eyes on the entrance to the Hudson River in 1609, a world of seemingly infinite possibilities lay before him and his crew. In 1624 the Dutch would take advantage of these opportunities and create the colony of New Netherland, building homes and communities that stretched from the Delaware Bay up along the Hudson River Valley to present-day Albany, New York. The story of New Netherland is often overlooked in tales of the founding of America. The essays in *Explorers, Fortunes and Love Letters* offer a new perspective that takes the spotlight off the Puritans of New England and the settlers of Jamestown, Virginia, and instead offers striking arguments for casting the Dutch as central players in the American narrative. These twelve essays, written by preeminent historians of New Netherland, pull from diverse perspectives: social, cultural, intellectual, economic, and political, to weave together the dynamic and diverse history of the Dutch in America. These scholars explore all aspects of Dutch life, ranging from sailing methods to factional politics to written expressions of love. The authors discuss how settlers retained traditions from the Netherlands, such as the baking of bread, and how these traditions changed over time and became engrained in American culture, including the transformation of the Dutch St. Nicholas into today's Santa Claus. The colony of New Netherland was marked by its diversity, and this topic is explored in discussions of the relationship between Native Americans and Dutch settlers in the Mohawk Valley, the role of Jews in New Netherland, and the practice of slavery throughout the colony. The Dutch perspective on child-rearing practices is also examined, as well as the dream of attaining fortune in the New World. The Dutch colony of New Netherland and the development of America are not separate stories but are inextricably linked together through historical moments and present realities. Dutch settlers played critical roles in building the nation; their influences are not lost and forgotten but are clearly evident even today. *Explorers, Fortunes and Love Letters* brings the reader into the everyday life of New Netherland and displays just how prominently the Dutch shaped America.

Medieval

Ethnographies Joan-Pau Rubies, 2017-05-15 From the twelfth century a growing sense of cultural confidence in the Latin West at the same time that the central lands of Islam suffered from numerous waves of conquest and devastation was accompanied by the increasing importance of the genre of empirical ethnographies From a global perspective what is most distinctive of Europe is the genre's long term impact rather than its mere empirical potential or its ethnocentrism all of which can also be found in China and in Islamic cultures Hence what needs emphasizing is the multiplication of original writings over time their increased circulation and their authoritative status as a scientific discourse The empirical bent was more characteristic of travel accounts than of theological disputations in fact the less elaborate the theological discourse the stronger the ethnographic impulse although many travel writers were clerics This anthology of classic articles in the history of medieval ethnographies illustrates this theme with reference to the contexts and genres of travel writing the transformation of enduring myths ranging from oriental marvels to the virtuous ascetics of India or Prester John the practical expression of particular encounters from the Mongols to the Atlantic and the various attempts to explain cultural differences either through the concept of barbarism or through geography and climate Literature 1974, Part 1 S. Phillips,Carla Rahn Phillips,1992 When Columbus was born in the mid fifteenth century Europe was largely isolated from the rest of the Old World Africa and Asia and ignorant of the existence of the world of the Western Hemisphere The voyages of Christopher Columbus opened a period of European exploration and empire building that breached the boundaries of those isolated worlds and changed the course of human history This book describes the life and times of Christopher Columbus on the 500th anniversary of his first voyage across the Atlantic Ocean in 1492 Since ancient times Europeans had dreamed of discovering new routes to the untold riches of Asia and the Far East what set Columbus apart from these explorers was his single minded dedication to finding official support to make that dream a reality More than a simple description of the man this new book places Columbus in a very broad context of European and world history Columbus s story is not just the story of one man s rise and fall Seen in its broader context his life becomes a prism reflecting the broad range of human experience for the past five

hundred years Respected historians of medieval Spain and early America the authors examine Columbus s quest for funds first in Portugal and then in Spain where he finally won royal backing for his scheme Through his successful voyage in 1492 and three subsequent journeys to the new world Columbus reached the pinnacle of fame and wealth and yet he eventually lost royal support through his own failings William and Carla Rahn Phillips discuss the reasons for this fall and describe the empire created by the Spaniards in the lands across the ocean even though neither they nor anyone else in Europe know precisely where or what those lands were In examining the birth of a new world this book reveals much about the times that produced these intrepid explorers The Cambridge History of Latin America Leslie Bethell,1984-12-06 This volume looks at the history of colonial Latin America A Supplement (1971-1986) to Robert G. Pilots Alison Deborah Sandman, 2001 *The Atlantic World* Thomas Benjamin, 2009-02-16 From 1400 to 1900 the Atlantic Ocean served as a major highway allowing people and goods to move easily between Europe Africa and the Americas These interactions and exchanges transformed European African and American societies and led to the creation of new peoples cultures economies and ideas throughout the Atlantic arena The Atlantic World provides a comprehensive and lucid history of one of the most important and impactful cross cultural encounters in human history Empires economies and trade in the Atlantic world thrived due to the European drive to expand as well as the creative ways in which the peoples living along the Atlantic s borders adapted to that drive This comprehensive cohesively written textbook offers a balanced view of the activity in the Atlantic world The 40 maps 60 illustrations and multiple excerpts from primary documents bring the history to life Each chapter offers a reading list for those interested in a more in depth look at the period

Sailing School Margaret E. Schotte, 2019-07-30 Hands on science in the Age of Exploration Winner of the John Lyman Book Award in Naval and Maritime Science and Technology by the North American Society for Oceanic History and the Leo Gershoy Prize by the American Historical Association Throughout the Age of Exploration European maritime communities bent on colonial and commercial expansion embraced the complex mechanics of celestial navigation They developed schools textbooks and instruments to teach the new mathematical techniques to sailors As these experts debated the value of theory and practice memory and mathematics they created hybrid models that would have a lasting impact on applied science In Sailing School a richly illustrated comparative study of this transformative period Margaret E Schotte charts more than two hundred years of navigational history as she investigates how mariners solved the challenges of navigating beyond sight of land She begins by outlining the influential sixteenth century Iberian model for training and certifying nautical practitioners She takes us into a Dutch bookshop stocked with maritime manuals and a French trigonometry lesson devoted to the idea that navigation is nothing more than a right triangle The story culminates at the close of the eighteenth century with a young British naval officer who managed to keep his damaged vessel afloat for two long months thanks largely to lessons he learned as a keen student This is the first study to trace the importance for the navigator s art of the world of print Schotte interrogates a wide variety of archival records from six

countries including hundreds of published textbooks and never before studied manuscripts crafted by practitioners themselves Ultimately Sailing School helps us to rethink the relationship among maritime history the Scientific Revolution and the rise of print culture during a period of unparalleled innovation and global expansion

Flattening the Medieval Earth Pablo de Felipe, 2025-08-08

Flattening the Medieval Earth explores the origin of the flat error i.e. the false accusation that ancient and medieval Christians believed in a flat Earth and what this implies in terms of a conflict between science and Christianity Engaging with scientific and religious debates this book includes a reception study of two key figures of the 4th century AD Lactantius and Augustine This study demonstrates that the mistaken dark image of medieval scholars as flat earthers started very early c. 1600 as an internal Christian debate in the context of new geographical and astronomical views The author draws on extensive research including many primary and secondary sources from different countries and languages not previously put into conversation Combining history of science church history science and religion history of navigation and historiography this book gives the most updated explanation of the origin of the flat error finding paradoxes and unexpected answers along the way to understand the past and to reflect on some current approaches in science and religion
