Mauroni, 2006-11-27 A thorough handbook covering the facts history and controversies surrounding our most controversial and misunderstood unconventional weapons Unlike most books on this topic the expanded second edition of Mauroni's popular reference handbook is neither sensationalistic nor moralistic Instead it offers readers a reasoned thorough and fact based introduction to this highly charged issue Covering the period from World War I through the Iraq War Chemical and Biological Warfare not only describes the development of key chemical and biological agents such as anthrax tularemia brucellosis VEE Q fever and botulinum toxin it also assesses the threats we face compares military CB warfare with terrorist incidents explains effective defensive measures and clarifies the responsibilities of the various federal agencies charged to address these issues With extensive new material this edition provides an authoritative and up to date introduction to this vitally important topic

D. Smith, 2024-09-04 The gripping untold story of the doomsday bomb the ultimate weapon of mass destruction Chillingly compelling New Scientist In 1950 Hungarian born scientist Leo Szilard made a dramatic announcement on American radio science was on the verge of creating a doomsday bomb For the first time in history mankind realized that he had within his grasp a truly God like power the ability to destroy life itself The shockwave from this statement reverberated across the following decade and beyond If detonated Szilard's doomsday device a huge cobalt clad H bomb would pollute the atmosphere with radioactivity and end all life on earth The scientific creators of such apocalyptic weapons had transformed the laws of nature into instruments of mass destruction and for many people in the Cold War there was little to distinguish real scientists from that fictional master of megadeath Stanley Kubrick's Dr Strangelove Indeed as P D Smith's chilling account Doomsday Men shows the dream of the superweapon begins in popular culture This is a story that cannot be told without the iconic films and fictions that portray our deadly fascination with superweapons from H G Wells's The War of the Worlds to Nevil Shute's On the Beach and Kubrick's Dr Strangelove or How I Learned to Stop Worrying and Love the Bomb Although scientists admitted it was possible to build the cobalt bomb no superpower would admit to having created one However it remained a terrifying possibility striking fear into the hearts of people around the world The story of the cobalt

bomb is an unwritten chapter of the Cold War but now P D Smith reveals the personalities behind this feared technology and shows how the scientists responsible for the twentieth century s most terrible weapons grew up in a culture dreaming of superweapons and Wellsian utopias He argues that in the end the doomsday machine became the ultimate symbol of humanity s deepest fears about the science of destruction Weaving together biography science and art Smith has created a compelling history of physics in the twentieth century focusing on the long lasting search for ever more destructive weapons from the development of chemical warfare in World War I Germany through the arms race of the Cold War Captivating and thoroughly referenced this chronicle should interest a wide audience from science and history buffs to armchair politicians Publishers Weekly *Military Chaplains' Review* ,1991 *The Search for Weapons of Mass Destruction in Iraq* Barbara Moe,2004-12-15 Discusses the first Gulf War the weapons inspections and the invasion of Iraq in March 2003 all in an effort to protect the region and the world from weapons of mass destruction **Jihadists and Weapons of Mass Destruction** Gary Ackerman,Jeremy Tamsett,2009-02-03 Explores the Nexus Formed When Malevolent Actors Access Malignant MeansWritten for professionals academics and policymakers working at the forefront of counterterrorism efforts Jihadists and Weapons of Mass Destruction is an authoritative and comprehensive work addressing the threat of weapons of mass destruction WMD in the hands of jihadists *Brigade Battle Staff Training System (BDE-BSTS) Program Design/critical Tasks* Charles R.
