Day,G. Paul Kemp,Angelina M. Freeman,David P. Muth,2014-05-16 Human impacts and emerging mega trends such as climate change and energy scarcity will impact natural resource management in this century This is especially true for deltas because of their ecological and economic importance and their sensitivity to climate change The Mississippi delta is one of the largest in the world and has been strongly impacted by human activities Currently there is an ambitious plan for restoration of the delta This book by a renown group of delta experts provides an overview of the challenges facing the delta and charts a way forward to sustainable management *British Books* ,1908 Poole's Index to Periodical Literature ,1897 Intelligence and the State Jonathan House,2022-04-15 In the eighty years since Pearl Harbor the United States has developed a professional intelligence community that is far more effective than most people acknowledge in part because only intelligence failures see the light of day while successful collection and analysis remain secret for decades Intelligence and the State explores the relationship between the community tasked to research and assess intelligence and the national decision makers it serves The book argues that in order to accept intelligence as a profession it must be viewed as a non partisan resource to assist key players in understanding foreign societies and leaders Those who review these classified findings are sometimes so invested in their preferred policy outcomes that they refuse to accept information that conflicts with preconceived notions Rather than demanding that intelligence evaluations conform to administration policies a wise executive should welcome a source of information that has not drunk the Kool Aid by supporting a specific policy decision

Jonathan M House offers a brief overview of the nature of national intelligence and especially of the potential for misperception and misunderstanding on the part of executives and analysts Furthermore House examines the rise of intelligence organizations first in Europe and then in the United States In those regions fear of domestic subversion and radicalism drove the need for foreign surveillance This perception of a domestic threat tempted policy makers and intelligence officers alike to engage in covert action and other policy based partisan activities that colored their understanding of their adversaries Such biases go far to explain the inability of Nazi Germany and the Soviet Union to predict and deal effectively with their opponents The development of American agencies and their efforts differed to some degree from these European precedents but experienced some of the same problems as the Europeans especially during the early decades of the Cold War By now however the intelligence community has become a stable and effective part of the national security structure House concludes with a historical examination of familiar instances in which intelligence allegedly failed to warn national leaders of looming attacks ranging from the 1941 German invasion of the USSR to the Arab surprise attack on Israel in 1973 *The Critic* ,1889 *The Dramatic Mirror, and Literary Companion* James Rees,1842
