- Risks feared more:
  - new
  - human-made
  - imposed upon them
  - associated with death
  - from untrustworthy source
  - directly affect you
  - affect our children
  - high uncertainty

- Risks feared less:
  - natural
  - choice involved
  - may also provide benefit
  - under your control
  - from trusted source
  - we are less aware of
  - threatens others

## Perception Of Risk:

*Risk is a Construct*, 1993      **The Feeling of Risk** Paul Slovic, 2013-03-07 The Feeling of Risk brings together the work of Paul Slovic one of the world's leading analysts of risk to describe the extension of risk perception research into the first decade of this new century In this collection of important works Paul Slovic explores the conception of risk as feelings and examines the interaction of feeling and cognition in the perception of risk He also examines the elements of knowledge cognitive skill and communication necessary for good decisions in the face of risk The first section of the book looks at the difficulty of understanding risk without an emotional component for example that disaster statistics lack emotion and thus fail to convey the true meaning of disasters and fail to motivate proper action to prevent them The book also highlights other important perspectives on risk arising from cultural worldviews and concerns about specific hazards pertaining to blood transfusion biotechnology prescription drugs smoking terrorism and nanotechnology Following on from *The Perception of Risk* 2000 this book presents some of the most significant research on risk perception in recent years providing essential lessons for all those involved in risk perception and communication      *The Perception of Risk* Paul Slovic, 2016-10-06 The concept of risk is an outgrowth of our society's great concern about coping with the dangers of modern life *The Perception of Risk* brings together the work of Paul Slovic one of the world's leading analysts of risk risk perception and risk management to examine the gap between expert views of risk and public perceptions Ordered chronologically it allows the reader to see the evolution of our understanding of such perceptions from early studies identifying public misconceptions of risk to recent work that recognizes the importance and legitimacy of equity trust power and other value laden issues underlying public concern      Risk Perception Theodore Spencer, 2016 The study of risk perception started when experts in these matters figured out that common people often disagreed about how they envisage risk even in how people observed that risk There are many theories about risk perception Some are exclusively related to risk perception while others are adaptations from perception theories Many of these theories date back to last century others are more recent Chapter One of this book discusses the reasons there are many different theories of risk perception Chapter Two studies community vulnerability in risk analysis task using multi source data statistics Chapter Three offers a thorough analysis of risk perception and psychosocial vulnerability in a health context from a theoretical perspective and based on current scientific evidence in order to open research lines for both of these constructs both separately and collectively Chapter Four establishes a relationship between the consumption of drugs like cannabis cocaine and designer drugs in young university and non university populations with the young people's perception of risks associated with such consumption Chapter Five provides an analysis of consumers choice of pay television and car insurance services based on the perceived risk model      Cross-Cultural Risk Perception Ortwin Renn, Bernd Rohrmann, 2013-03-14 Cross Cultural Risk Perception demonstrates the richness and wealth of theoretical insights and practical information that risk perception studies can offer to policy makers risk experts and

interested parties The book begins with an extended introduction summarizing the state of the art in risk perception research and core issues of cross cultural comparisons The main body of the book consists of four cross cultural studies on public attitudes towards risk in different countries including the United States Australia New Zealand France Germany Sweden Bulgaria Romania Japan and China The last chapter critically discusses the main findings from these studies and proposes a framework for understanding and investigating cross cultural risk perception Finally implications for communication regulation and management are outlined The two editors sociologist Ortwin Renn Center of Technology Assessment Germany and psychologist Bernd Rohrmann University of Melbourne Australia have been engaged in risk research for the last three decades They both have written extensively on this subject and provided new empirical and theoretical insights into the growing body of international risk perception research

**Psychology of Risk Perception** Joana G. Lavino, 2010-01-01 Risk perception is the subjective judgment that people make about the characteristics and severity of a risk The phrase is most commonly used in reference to natural hazards and threats to the environment or health such as nuclear power Several theories have been proposed to explain why different people make different estimates of the dangerousness of risks Three major families of theory have been developed psychology approaches heuristics and cognitive anthropology sociology approaches cultural theory and interdisciplinary approaches social amplification of risk framework This new book presents the latest original research in this field

**How Risky Is It, Really?: Why Our Fears Don't Always Match the Facts** David Ropeik, 2010-03-05 Clear balanced and lively Steven Pinker bestselling author of *How the Mind Works* ARE YOU AFRAID OF THE RIGHT RISKS Do you worry more about radiation from nuclear power or from the sun Are you more afraid of getting cancer than heart disease Are you safer talking on your cell phone or using a hands free device when you drive Do you think global warming is a serious threat to your health GET THE FACTS BEHIND YOUR FEARS AND DISCOVER HOW RISKY IS IT REALLY International risk expert David Ropeik takes an in depth look at our perceptions of risk and explains the hidden factors that make us unnecessarily afraid of relatively small threats and not afraid enough of some really big ones This read is a comprehensive accessible and entertaining mixture of what's been discovered about how and why we fear too much or too little It brings into focus the danger of The Perception Gap when our fears don't match the facts and we make choices that create additional risks This book will not decide for you what is really risky and what isn't That's up to you HOW RISKY IS IT REALLY will tell you how you make those decisions Understanding how we perceive risk is the first step toward making wiser and healthier choices for ourselves as individuals and for society as a whole TEST YOUR OWN RISK RESPONSE IN DOZENS OF SELF QUIZZES

**Risk**, 1992 This report from a group of scientists engineers and social scientists is published by the Royal Society to open up discussion on risk It re states the principles by which the risks to human health and life are measured and shows the changes over the last ten years The object is to provide guides to decisions on priorities for action Risks from transport employment sport radiation smoking food and HIV are compared Life
