
AC1.5 - Impact of media representation on the public perception of crime

MORAL PANIC

- The media often reports crimes in a certain way in order to cause moral panic which causes an overly exaggerated reaction by society to a problem. The media usually finds a particular group to target as folk devils (folk devil is a person or group of people who are portrayed in folklore or the media as outsiders and deviant, and who are blamed for crimes or other sorts of social problems)
- The seriousness of the crime is often exaggerated and blown out of proportion to the actual event.

Negative impact

- An example of this is the **mods and rockers**, where two different groups of youths got involved in a disturbance in 1964 which resulted in minor property damage.
- The media's coverage of this event blew the actual events of the crime out of proportion. The media highlighted the difference in the groups.
- They distorted the number of people involved and the seriousness.
- Other examples – panic buying COVID, Petrol incident.

DEVIANCE AMPLIFICATION MODEL

- The media can also amplify deviance, sometimes when authorities try to maintain deviance, it can actually end up producing more deviance.
- With the mod and rockers the media made it seem like the problem was out of control of the police which resulted in the public calling to suggest a more forceful way of controlling the juvenile delinquents.

Positive impact

- Moral panics can help bring police attention to certain crimes and pressure the government to make a change.
- With the Momo challenge that was trending online, the moral panic helped warn the public specifically schools and parents with young children to be careful online. Also helped authorities discover the challenge was actually a hoax.

CHANGING PUBLIC CONCERNS

- The way the media represents certain groups can also affect and change the public's attitudes. This can also be linked with causing moral panic amongst the public as well.

Negative impact

- Media representation of mod and rockers caused anxiety, public thought the youth were out of control and a potential threat to them.

Perception In Criminology:

Perception in Criminology Robert A. Silverman, 1975 Perception in Criminology, 1975 Criminology and Victimology in Practice - International Perspectives Anni Hesselink, 2025-07-02

Criminology and Victimology International Perspectives elucidates the practical contributions, engagements, focal areas, and applications of expertise, knowledge, and skills by criminologists and victimologists in practice, thereby extending towards an invaluable enhancement of intellectually enriching multidisciplinary fields within the realms of human and social sciences, the criminal justice system, and both the formal and informal sectors of society. This book highlights the role and contributions of criminologists in formulating pre-sentence reports for the judiciary and informing sentencing decisions. It also highlights the acumen and capabilities of rural criminologists along with their analytical endeavors and initiatives concerning rural environments, as well as the risks and victimization of livestock. Profound insights can be derived from criminological and victimological assessments of sexual and gender minority men, SGMM, including individuals from the lesbian, gay, bisexual, transgender, and queer LGBTQ community who face victimization and stigma within correctional contexts. Sociological inquiries from Montenegro unveil critical risk factors associated with juvenile offenders, correlating these risks with unstable family dynamics and exposure, thereby illuminating the offender-victim nexus and applying practical skills concerning these individuals. In Iran, criminology and victimology remain heavily reliant on criminal law, which stifles the professionalization and career prospects within the judicial sphere, thereby accentuating the necessity for advancing criminology and victimology as autonomous disciplines with tangible career trajectories. They are frequently subject to misapprehension. This book, Criminology and Victimology International Practices, endeavors to elucidate the academic and theoretical frameworks that have evolved into a compelling and pragmatic application of knowledge and expertise. It entails that while firmly anchored in scientific theories, principles, and research, the fields of criminology and victimology have matured to furnish invaluable and pragmatic insights and contributions to multidisciplinary teams.

The Routledge International Handbook of Life-Course Criminology Arjan Blokland, Victor van der Geest, 2017-03-16 Since its introduction in the latter half of the 1980s the meticulous study of distinct criminal career

dimensions like onset frequency and crime mix has yielded a wealth of information on the way crime develops over the life span Policymakers in turn have used this information in their efforts to tailor criminal justice interventions to be both effective and efficient Life course criminology studies the ways in which the criminal career is embedded in the totality of the individual life course and seeks to clarify the causal mechanisms governing this process The Routledge International Handbook of Life Course Criminology provides an authoritative collection of international theoretical and empirical research into the way that criminal behavior develops over the life span which causal mechanisms are involved in shaping this development and to what degree criminal justice interventions are successful in redirecting offenders criminal trajectories Drawing upon qualitative and quantitative research this handbook covers theory describes and compares criminal career patterns across different countries tests current explanations of criminal development and using cutting edge methods assesses the intended and unintended effects of formal interventions This book is the first of its kind to offer a comprehensive overview of state of the art developments in criminal career and life course research providing unique perspectives and exclusive local knowledge from over 50 international scholars This book is an ideal companion for teachers and researchers engaged in the field of developmental and life course criminology *Encyclopedia of Criminology* J. Ryan Proctor, Richard E. Niemeyer, 2019-05-23 The science of criminology is at a crossroads Despite accumulating a dizzying array of facts about crime the field has yet to identify a body of theories that allows for the adequate prediction explanation and control of phenomena of central interest to criminologists Mechanistic Criminology locates this problem within the field's failure to conform to the expectations of scientific fields and reliance on antiquated methods of theory construction The authors contend that this failure has resulted in an inability of

criminologists to engage in theory falsification and competition two central activities of science that produce the forms of reliable knowledge that are unique to scientific fields Mechanistic Criminology advocates for the adoption of a mechanistic mode of theorizing to allow criminologists to engage in theory falsification and competition and ignite rapid scientific discovery in the field The proposed method is the same one employed within the biological sciences which is responsible for their rapid scientific progress in the late twentieth and early twenty first centuries Should criminologists adopt this mechanistic approach criminology could experience the same scientific revolution that is occurring in the biological sciences and criminologists would generate the knowledge necessary for the prediction explanation and control of crime

Handbook of Scales for Research in Crime and Delinquency Stanley L. Brodsky,H. O'Neal Smitherman,2013-06-29 In contrast to the great diversity of other crime and delinquency research measures those drawn from the CPI and the MMPI have much in common They are taken from standardized instruments administered under controlled conditions with known stimulus properties and validity indicators The CPI and MMPI measures will frequently be instruments of choice in research on personality and psychodynamics of offenders CHAPTER 6 Law Enforcement and Police This chapter encompasses a variety of scales that refer to law enforcement or police agencies Unfortunately in the case of many scales these terms are used simply with the assumption that the respondents understand the concepts and use them in the same way as researchers In other cases however specific policing functions are identified and described As noted in Chapter 3 a standard order of scale presentation is followed First the attitudes scales are presented followed by the behavior ratings per sonality measures milieu ratings prediction measures and finally the very broad category of description After the reviews are completed within each subcategory other scales in that category are listed See Chapter 2 for a description of the criteria that were used in deciding upon whether a scale would be reviewed or simply listed Listed scales are presented by title and bibliographic reference followed by a very brief description Student Handbook of Criminal Justice and Criminology John Muncie,David Wilson,2013-02-01 Written by some of the leading criminologists in the country this new title is a one stop shop for those who teach study or are interested in criminology and the criminal justice systems of the UK **The Future of Criminology** Rolf Loeber,Brandon C. Welsh,2012-08-16 The Future of Criminology takes stock of the major advances and developments that have taken place in the past several decades and asks where the field of criminology is headed In thirty three brief essays the field s leading scholars provide their views into the future of what needs to be done in research policy and practice in the discipline
