The Child as Natural Phenomenologist Talia Welsh, 2013-03-31 Maurice Merleau Ponty 1908 1961 is well known for his work in phenomenology but his lectures in child psychology and pedagogy have received little attention probably because Talia Welsh translated the lectures in their entirety only in 2010 The Child as Natural Phenomenologist summarizes Merleau Ponty s work in child psychology shows its relationship to his philosophical work and argues for its continued relevance in contemporary theory and practice Welsh demonstrates Merleau Ponty s unique conception of the child s development as inherently organized meaningful and engaged with the world contrary to views that see the child as largely internally preoccupied and driven by instinctual demands Welsh finds that Merleau Ponty s ideas about human psychology remain relevant in today s growing field of child studies and that they provide important insights for philosophers sociologists and psychologists to better understand the human condition

Developmental Perceptual World Charles Marion Solley, Gardner Murphy, 1960-01-21 In his pioneering treatise on education the great French philosopher Jean Jacques Rousseau 1712 1778 presents concepts that had a significant influence on the development of pedagogy in the eighteenth century and yet many of his ideas still sound radical today Written in reaction to the stultifying system of rote learning and memorization prevalent throughout Europe at the time Emile is a utopian vision of child centered education full of the sentiments of Romanticism a movement that Rousseau inspired Imagining a typical boy named Emile

Rousseau creates an ideal model of one on one tutelage from infancy to manhood with himself as the child's mentor As in so many of his other famous works here too Rousseau asserts his main thesis that human beings are by nature good it is only the distorting influences of civilization that have corrupted them Educators as well as students of philosophy will find much to admire in Rousseau's still fresh and innovative ideas

Simms, 2008 The Child in the World builds a bridge between continental philosophers who tend to overlook child existence and developmental psychologists who often fail to consider the philosophical assumptions underlying their work In this volume author Eva M Simms draws on both psychological and phenomenological research to investigate child existence in its cultural and historical context and explore the ways children interact with the world around them Simms examines key experiences of childhood with special attention to the non dualistic nature of the child's consciousness and the understanding that there is more to the child's experiences than cognitive processes In chapters that proceed from infancy to early childhood Simms considers how children live their embodiment coexist with others experience and the spaces and places of their neighborhoods have deeply felt relations to things grasp time intuitively and often in contradiction to adult clock time and are transformed by the mystery of the symbolic order of play and language Simms's approach is particularly informed by the philosophy of Maurice Merleau-Ponty which allows for a descriptive and grounded understanding of child experience as well as sophisticated and critical philosophical thinking about human existence in general By respecting and celebrating the magical non dualistic relationship child consciousness has to the world The Child in the World offers readers a unique opportunity to expand their understanding of human existence Students and teachers of psychology and philosophy early childhood educators psychotherapists as well as general readers who are parents of young children will enjoy this fascinating volume
