Perdida D:

PERDIDA DE NUTRIENTES DEL SUELO POR EFECTO DE LA EROSION HIDRICA, BAJO DIFERENTES SISTEMAS DE SIEMBREA EN EL CULTIVO DE AVENA WILFRIDO V NARVAEZ R, Alternative Food Networks for Sustainable, Just, Resilient and Productive Food Systems José Luis Vicente-Vicente, Lukas Egli, Felix Zoll, Simona Zollet, 2024-10-01 There is growing evidence that the current globalised agri food system is neither sustainable nor resilient. It is responsible for around one third of the global GHG emissions and is a major driver of biodiversity loss. Furthermore its structure and distribution mode do not provide food security for all and foster socio economic inequalities between different parts of the planet. Consequently an increasing number of scientists and members of the civil society are demanding a radical transformation of agri food systems. The creation of alternative food networks (AFNs) represent a possible first step towards agri food system transformation. AFNs can incorporate local indigenous and innovative knowledge and bring together a diversity of actors to connect food production and consumption and create new practices and relationships around food. The creation of AFNs and ultimately of Alternative Food Systems (AFS) should involve different actors from farmers to social movements from policymakers to scientists. AFNs have the potential to contribute to a transformation towards sustainable, just, resilient and productive food systems but even though they have increased in numbers and organisational forms in recent years they still remain in a niche. Consequently scientific evidence of their performance is still limited. This research topic will contribute to a comprehensive multi scalar and critical e.g. including potential counter effects understanding of the current state and future potential of AFNs. It will address multiple aspects ranging from social economic and environmental aspects to productivity participation and justice. Moreover it will highlight the role of governance power relations and institutions as well as barriers and ways forward to promote AFNs and their role in food system transformation. “La Madre Ausente En La Novela Femenina De La Posguerra Española: Pérdida Y Liberación”. Guadalupe María Cabedo, 2014-03-07 La literatura española de posguerra ya se ha analizado mucho y afortunadamente bastantes de las previamente olvidadas escritoras de posguerra se han ido recuperando y estudiando. Sin embargo todavía queda mucho por desarrollar. Hoy día en España es vital recuperar la labor de la memoria colectiva para poder ver y entender mejor el pasado pues no se puede construir un futuro sin haber reconstruido y entendido ese pasado. Este libro es un análisis de tres novelas de la posguerra escritas por mujeres: Nada de Carmen Laforet, Entre visillos de Carmen Martín Gaité y Primera memoria de Ana María Matute. Estas escritoras a las que la crítica ha incluido dentro de la denominada Generación de Posguerra conforman una suerte de grupo literario ya que comparten sus obras una serie de características comunes. Dichos rasgos vienen dados por una temática centrada en las preocupaciones, problemas e inquietudes de las mujeres de su generación. Este libro analiza temas comunes de estas tres obras: la ausencia de la madre, soledad y aislamiento, galaxia femenina y por último identidad e independencia. No es mi intención mostrar una teoría feminista que defienda la existencia de una escritura o estética femenina basada en el hecho biológico de ser mujer. Creo que existe lo denominado literatura de mujeres pero las coordenadas que las definen vienen dadas por el hecho de ser mujer como constructo social y no biológico. Algunos acercamientos teóricos sobre los efectos de la ausencia de la madre como los estudios de Carol Gilligan, Marianne Hirsch y Nancy Chodorow entre otros nos ayudan a tener una mejor comprensión de lo que estas teorías feministas y psicoanalíticas han aportado a las obras literarias a través de la historia y especialmente a la narrativa femenina de estas autoras de la posguerra investigadas aquí. Mi objetivo principal ha sido retratar la rebeldía de las protagonistas femeninas de estas tres novelas contra la madre sustituta que tienen dada la idealización que se tiene de la madre en España en esta época y a causa del inconformismo que sentían estas escritoras y muchísimas más mujeres de la posguerra española ante el gobierno patriarcal y androcéntrico del franquismo.

Calls for new thinking that integrates predictable disaster risks into development programs. Concludes that it is possible to anticipate where many natural disasters will strike yet expresses concerns that the World Bank's disaster assistance efforts are underutilizing these vital lifesaving forecasts.
