The Passion Paradox Brad Stulberg, Steve Magness, 2019-03-19 The coauthors of the bestselling Peak Performance dive into the fascinating science behind passion showing how it can lead to a rich and meaningful life while also illuminating the ways in which it is a double edged sword Here's how to cultivate a passion that will take you to great heights while minimizing the risk of an equally great fall Common advice is to find and follow your passion A life of passion is a good life or so we are told But it's not that simple Rarely is passion something that you just stumble upon and the same drive that fuels breakthroughs whether they're athletic scientific entrepreneurial or artistic can be every bit as destructive as it is productive Yes passion can be a wonderful gift but only if you know how to channel it If you're not careful passion can become an awful curse leading to endless seeking suffering and burnout Brad Stulberg and Steve Magness once again team up this time to demystify passion showing readers how they can find and cultivate their passion sustainably harness its power and avoid its dangers They ultimately argue that passion and balance that other virtue touted by our culture are incompatible and that to find your passion you must lose balance And that's not always a bad thing They show readers how to develop the right kind of passion the kind that lets you achieve great things without ruining your life Swift compact and powerful this thought provoking book combines captivating stories of extraordinarily passionate individuals with the latest science on the biological and

The Sensorium of God Stuart Clark, 2012-02-02. It is the late seventeenth century and still the movement of the planets remains a mystery despite the revolutionary work of Johannes Kepler, Galileo Galilei, and Tycho Brahe almost a hundred years previously. Edmond Halley, dynamic adventurer and astronomer, seeks the help of Isaac Newton in unravelling the problem, but though obsessed with understanding the orbits of the planets, Newton has problems of his own which could undermine the essential work. The reclusive mathematician and alchemist has a guilty secret. He stole some of his ideas from Robert Hooke, and the quarrelsome experimentalist is demanding recognition. While capable of the loftiest ideals and theorising, the three men are just as quick to bicker and hold petty grudges which could derail scientific advancement. The men's lives and work clash as Europe is pushed headlong towards the Age of the Enlightenment and science is catapulted into its next seismic collision with religion.
