**De Gruyter Handbook of Creative Industries** Louis-Etienne Dubois,Laurent Simon,Bérangère Szostak,2025-09 This handbook offers rich and diverse discussions of key topics in the field and is disciplinary agnostic and in tune with empirical manifestations It spans multiple perspectives including but not limited to management cultural studies economic geography sociology gender studies critical race disability and communication studies A range of contributions is included from historical perspectives to emerging debates in addition to work on key current issues It moves beyond the industry of creative industries to also document and examine the ways that industry shapes identity and community and how industry is shaped by external forces In a sector that is particularly prone to disruptions be they social cultural legal or economical this handbook reflects the current state of the creative industries **The Future of Post-Human Performing Arts** Peter Baofu,2013-01-03 Are the performing arts really supposed to be so radical that as John Cage once said in the context of music there is no noise only sound since he argued that any sounds we can hear can be music WK 2007a D Harwood 1976 This radical tradition in performing arts with music as an example here can be contrasted with an opposing view in the older days when Greek philosophers and medieval theorists in music defined music as tones ordered horizontally as melodies and vertically as harmonies Music theory within this realm is studied with the presupposition that music is orderly and often pleasant to hear WK 2007a Contrary to these opposing traditions and other views as will be discussed in the book performing arts in relation to both the body and its presence is neither possible nor desirable to the extent that the respective ideologues on different sides would like us to believe Needless to say the challenge to these opposing traditions in performing arts does not imply that performing arts are worthless human endeavors or that those fields of study related to performing arts like aesthetics acoustics communication studies psychology culture studies sociology religion morality and so on should be rejected too Of course neither of these extreme views is reasonable Instead this book provides an alternative better way of understanding the future of performing arts especially in the dialectic context of the body and its presence while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not

necessarily compatible with each other In other words this book offers a new theory that is the transdisciplinary theory of performing arts to go beyond the existing approaches in a novel way If successful this seminal project will fundamentally change the way that we think about performing arts from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate [The SAGE Handbook of Performance Studies](#) D. **Audience Engagement in the Performing Arts** Ben Walmsley, 2019-09-11 This book explores the concept of audience engagement from a number of complementary perspectives including cultural value arts marketing co creation and digital engagement It offers a critical review of the existing literature on audience research and engagement and provides an overview of established and emerging methodologies deployed to undertake research with audiences The book focusses on the performing arts but draws from a rich diversity of academic fields to make the case for a radically interdisciplinary approach to audience research The book's underlying thesis is that at the heart of audience research there is a mutual exchange of value wherein audiences ideally play the role of strategic partners in the mission fulfilment of arts organisations Illustrating how audiences have traditionally been sidelined homogenised and vilified it contends that the future paradigm of audience studies should be based on an engagement model wherein audiences take their rightful place as subjects rather than objects of empirical research

[Making the Scene](#) Alexander Stewart, 2007-08-02 The received wisdom of popular jazz history is

that the era of the big band was the 1930s and 40s when swing was at its height But as practicing jazz musicians know even though big bands lost the spotlight once the bebop era began they never really disappeared Making the Scene challenges conventional jazz historiography by demonstrating the vital role of big bands in the ongoing development of jazz Alex Stewart describes how jazz musicians have found big bands valuable He explores the rich rehearsal band scene in New York and the rise of repertory orchestras Making the Scene combines historical research ethnography and participant observation with musical analysis ethnic studies and gender theory dismantling stereotypical views of the big band
