**Critical Directions in Comics Studies** Thomas Giddens, 2020-08-25 Contributions by Paul Fisher Davies Lisa DeTora Yasemin J Erden Adam Gearey Thomas Giddens Peter Goodrich Maggie Gray Matthew J A Green Vladislav Maksimov Timothy D Peters Christopher Pizzino Nicola Streeten and Lydia Wysocki Recent decades have seen comics studies blossom but within the ecosystems of this growth dominant assumptions have taken root assumptions around the particular methods used to approach the comics form the ways we should read comics how its system works and the disciplinary relationships that surround this evolving area of study But other perspectives have also begun to flourish These approaches question the reliance on structural linguistics and the tools of English and cultural studies in the examination and understanding of comics In this edited collection scholars from a variety of disciplines examine comics by addressing materiality and form as well as the wider economic and political contexts of comics creation and reception

Through this lens influenced by poststructuralist theories contributors explore and elaborate other possibilities for working with comics as a critical resource consolidating the emergence of these alternative modes of engagement in a single text This opens comics studies to a wider array of resources perspectives and modes of engagement Included in this volume are essays on a range of comics and illustrations as well as considerations of such popular comics as Deadpool Daredevil and V for Vendetta and analyses of comics production medical illustrations and original comics Some contributions even unfold in the form of comics panels

**Women, Imagination and the Search for Truth in Early Modern France** Rebecca M. Wilkin, 2016-12-05 Grounded in medical juridical and philosophical texts of sixteenth and seventeenth century France this innovative study tells the story of how the idea of woman contributed to the emergence of modern science Rebecca Wilkin focuses on the contradictory representations of women from roughly the middle of the sixteenth century to the middle of the seventeenth and depicts this period as one filled with epistemological anxiety and experimentation She shows how skeptics including Montaigne Marie de Gournay and Agrippa von Nettesheim subverted gender hierarchies and or blurred gender difference as a means of questioning the human capacity to find truth while positivists who strove to establish new standards of truth for example Johann Weyer Jean Bodin and Guillaume du Vair excluded women from the search for truth The book constitutes a reevaluation of the legacy of Cartesianism for women as Wilkin argues that Descartes opening of the search for truth even to women was part of his appropriation of skeptical arguments This book challenges scholars to revise deeply held notions regarding the place of women in the early modern search for truth their role in the development of rational thought and the way in which intellectuals of the period dealt with the emergence of an influential female public

**Disjointed Perspectives on Motherhood** Catalina Florina Florescu, 2013-10-29 Disjointed Perspectives on Motherhood presents the accounts of mothers who have suffered a major physical and or psychically traumatic accident and as a consequence their minds and bodies have been drastically changed They live under the pressure of having discovered the alter ego of their traumatized personality and now distressed cannot embrace their unconditional maternal love Instead they enter into a phase where they face the challenge of revealing who they are as persons before accepting or motivating themselves as mothers The mothers presented in this volume also seem to have another thing in common their transnational fluid female identity as they enter into an imaginary dialog that transcends geographical and temporal perspectives on womanhood and motherhood This collection introduces and analyzes recurrent words that define a woman s body and mind today fear competition motherhood and career rights selfishness ambition destruction distance and identity By using unprecedented comparative critical approaches such as phenomenological medical feminist and re enchantinent theories and by analyzing works from literature cinema and visual arts this collection attempts to reestablish and redefine a canonical concept with the intention to revitalize an otherwise taken for granted image and role

Bodies Politic Roy Porter, 2021-03-08 In this historical tour de force Roy Porter takes a critical look at representations of the body in health disease and death in Britain

from the mid seventeenth to the twentieth century Porter argues that great symbolic weight was attached to contrasting conceptions of the healthy and diseased body and that such ideas were mapped onto antithetical notions of the good and the bad the beautiful and the ugly With these images in mind he explores aspects of being ill alongside the practice of medicine paying special attention to self presentations by physicians surgeons and quacks and to changes in practitioners public identities over time Porter also examines the wider symbolic meanings of disease and doctoring and the body politic Porter's book is packed with outrageous and amusing anecdotes portraying diseased bodies and medical practitioners alike *Cat Call* Kristen J. Moss,2017-03-02 This collection of essays makes an important contribution to scholarship by examining how the myths and practices of medical knowledge were interwoven into popular entertainment on the early modern stage Rather than treating medicine the theater and literary texts separately the contributors show how the anxieties engendered by medical socio scientific investigations were translated from the realm of medicine to the stage by Renaissance playwrights especially Shakespeare As a whole the volume reconsiders typical ways of viewing medical theory and practice while individual essays focus on gender and ethnicity theatrical impersonation medical counterfeit and malfeasance and medicine as it appears in the form of various political metaphors **Feminist and Anti-Psychiatry Perspectives on 'Social Anxiety Disorder'**

Katie Masters,2024-07-17 This book conceptualises the diagnosis Social Anxiety Disorder SAD in women as a rational response to life in postfeminist neoliberal twenty first century Britain By speaking to women with this diagnosis and drawing on the author s lived experience it investigates the interplay between women s social anxiety and Western culture It argues that societal factors are implicated in women s mental distress to a far greater extent than dominant especially psychiatric narratives would hold narratives which premised on individual pathology often present a biologically reductionist and medicalised account Through deploying a unique blend of feminism and anti psychiatry this book critiques the framework which exists around diagnosing and treating SAD but without dismissing distress Inspired by feminist critiques of other gendered psychiatric diagnoses such as Anorexia Nervosa it conceptualises SAD in women as a culture bound syndrome This book will interest students and scholars of gender studies and sociology **The Trotula** ,2013-07-17 The Trotula was the

most influential compendium on women s medicine in medieval Europe Scholarly debate has long focused on the traditional attribution of the work to the mysterious Trotula said to have been the first female professor of medicine in eleventh or

twelfth century Salerno just south of Naples then the leading center of medical learning in Europe Yet as Monica H Green reveals in her introduction to this first edition of the Latin text since the sixteenth century and the first English translation of the book ever based upon a medieval form of the text the Trotula is not a single treatise but an ensemble of three independent works each by a different author To varying degrees these three works reflect the synthesis of indigenous practices of southern Italians with the new theories practices and medicinal substances coming out of the Arabic world Arguing that these texts can be understood only within the intellectual and social context that produced them Green analyzes them against the background of historical gynecological literature as well as current knowledge about women's lives in twelfth century southern Italy She examines the history and composition of the three works and introduces the reader to the medical culture of medieval Salerno from which they emerged Among her findings is that the second of the three texts On the Treatments for Women does derive from the work of a Salernitan woman healer named Trota However the other two texts On the Conditions of Women and On Women's Cosmetics are probably of male authorship a fact indicating the complex gender relations surrounding the production and use of knowledge about the female body Through an exhaustive study of the extant manuscripts of the Trotula Green presents a critical edition of the so called standardized Trotula ensemble a composite form of the texts that was produced in the mid thirteenth century and circulated widely in learned circles The facing page complete English translation makes the work accessible to a broad audience of readers interested in medieval history women's studies and premodern systems of medical thought and practice

contemporaries such as Isabella Andreini Moderata Fonte and Veronica Franco As this bilingual first ever critical edition of Flori illustrates this neglect is decidedly unwarranted Flori is a work of great literary and cultural interest noteworthy in particular for the intensity of its focus on the experiences and perceptions of its female protagonists and their ideals of female autonomy Flori will be read by those involved in the study of early modern literature and drama women s studies and the study of gender and sexuality in this period *Breast Cancer in the Eighteenth Century* Marjo Kaartinen,2015-10-06
