Perils Of Patient Government Professionals And Patients In A Chronic Care Hospital:

The Perils of Patient Government Joseph W. Lella, 1986 In 1964 the Senate Committee on Aging reported that once admitted to an institution the veteran begins to show signs of social and physical degeneration a phenomenon that has not escaped the attention of clinicians social scientists veterans and other chronic care patients Assuming that social withdrawal in the institutional setting was avoidable and that a strictly medical model of chronic care was inappropriate Lella and his collaborators established a patient government project designed to give thirty elderly men in a large veterans hospital who suffered from various degrees of social withdrawal an opportunity to express their individuality and independence and to shape institutional decisions The Perils of Patient Government goes well beyond a description and analysis of the project's successful side a general improvement in the lives of the veterans on Ward 23 it also exposes and analyzes the project's failures portraying negotiation and conflict among change oriented and conservative staff of varying professional identities ideologies and career strategies While struggling over the idea and practice of patient self government nurses and other professionals did make progress but also set severe limits on what patients could achieve for themselves As well Lella's study tackles the larger question of how change affects organizations and institutions Lively and well written this is an enlightening work for students of gerontology and geriatrics for professionals and para professionals administrators and policy makers involved in chronic care and for researchers probing the fields of medical sociology and institutional organization
