

Ever since the earliest days, railways have been surrounded by specialised buildings. Of these, the station offices are the most familiar, for all passengers make use of these. There are, in addition, the various goods sheds and warehouses, signal boxes, engine sheds and a variety of other special purpose structures. Many of these, built a century or more ago, are still in daily use.

In this book, Vivien Thompson describes how she builds her wonderful 4mm scale models of these attractive old buildings from plastic sheet. The book is profusely illustrated with scale drawings and photographs, and will be absolutely invaluable to every railway modeller.
