Periods From Menarche To Menopause:

Periods Sharon Golub, 1992-02-14 Menarche to Menopause belongs in the library of all researchers and scholars involved in psychology nursing and women's studies Professionals who work with women in clinical settings nurses social workers physicians and psychologists will also find this volume of special interest *Menopause, Me and You* Ann Mae Voda, 1997 Voda treats menopause as a natural event in women's lives not as an estrogen deficiency disease Full of important suggestions for self care Back cover *From Menarche to Menopause* Joan Chrisler, 2014-06-11 From Menarche to Menopause The Female Body in Feminist Therapy examines the latest research on the menstrual cycle and women's reproductive health This timely volume focuses on women in therapy who are disconnected from or even repelled by their own bodies due to cultural attitudes abuse trauma or the natural aging process Experts in the fields of psychology and women's health unite to celebrate the physical life stages of women and girls and to offer practical advice for therapists to use when addressing negativity caused by appearance age menstrual symptoms or reproductive concerns In this book you will gain new understanding about the effects on a woman's mental health that transitional life stages can cause from preadolescence through the childbearing years to menopause The suggestions in From Menarche to Menopause can help women resist the bombardment of negative messages and misleading information they receive about their bodies and their reproductive concerns This helpful resource can also assist you in opening new lines of communication between mothers and daughter women and men and women and other women From Menarche to Menopause discusses how to handle topics such as self loathing caused by media and cultural messages that affect women's acceptance of their bodies overcoming a daughter's reluctance to discuss sensitive topics of bodily maturation menstruation and emerging sexual development helping women men and couples cope with infertility assisting women in overcoming a disappointing birth experience providing therapeutic care to women and couples who experience perinatal loss addressing perimenopause in midlife women and the concerns negative attitudes and uncertainty of this transition This unique book fills the gap in feminist therapy literature with practical advice concerning the functions of women's bodies that can be used within the therapy context From Menarche to Menopause includes extensive references and several book reviews to further your research and provide reading and other resources you can recommend to your clients This practical resource on women's reproductive health as it relates to mental health is an important addition to the bookshelves of feminist psychologists clinical practitioners social workers and health practitioners as well as faculty and students of these disciplines *Fibroids, Menstruation, Childbirth, and Evolution* Fred Burbank, 2009 In the ancestral environment a human female typically carried at least half a dozen babies to term The fact that modern women are able to limit the number of children they bear has dramatic consequences for the incidence of uterine fibroids as well as the clinical care of fibroids patients Fibroids Menstruation Childbirth and Evolution explores these connections integrating a vast amount of medical knowledge about the uterus into one volume During pregnancy the mother

s blood prepares for an enormous hemostatic event the delivery of the placenta That fetal organ is the vascular link between mother and offspring At childbirth one tenth of mother s cardiac output flows through the placenta feeding the growing child When the placenta is sheared away from its attachment to the uterus two hundred large uteroplacental arteries are ripped apart and bleed profusely into the uterine cavity For many hours following delivery uterine contractions slow blood flow within the uterus allowing the high concentration of clotting factors built up in the mother s blood during pregnancy to solidify throughout the uterine circulation and stop blood loss Then hours later the tide reverses most of these uterine blood clots dissolve and more normal blood flow returns to the uterus This amazing process occurs with each pregnancy During this process the uterus is ischemic and hypoxic Unlike brain and heart which can only survive minutes of decreased blood flow the uterus can withstand dramatically diminished blood flow for hours In fact it is natural for this to occur once every few years Uterine ischemia and hypoxia are a natural part of every woman s genetic makeup In 1995 a group of French physicians discovered that it was possible to emulate the physiology of childbirth by stopping blood flow to the uterus with small plastic particles Initially they injected these particles to diminish blood loss during subsequent fibroid surgery However they soon learned that the injection of these particles was therapeutic in and of itself for women with symptomatic fibroids Unbeknownst to this French group earlier in 1964 an American physician surgically occluded the uterine arteries to treat women without fibroids who had excessive monthly menstrual blood loss Subsequent physicians have occluded the uterine arteries in various ways to treat a third common disorder adenomyosis Finally these clinical successes suggest that future episodes of endometriosis may be preventable in some women treated with uterine artery closure Dr Fred Burbank s comprehensive book provides insight into how physicians can use uterine artery closure techniques to more effectively treat uterine disorders In addition his book contains short courses on magnetic resonance imaging hemodynamics uterine artery embolization and the hemostatic and hemolytic systems making it possible for readers less familiar with these complex subjects to understand the text without referring to outside sources About the Author Dr Burbank is an epidemiologist a psychiatrist a diagnostic radiologist a cardiovascular interventionalist and an expert in women s health He is also an inventor entrepreneur For recreation he flies swims and reads For more information please visit his bio on www.saltcreekmedical.com
