Peripheralisation And Industrial Change:

Peripheralisation and Industrial Change G. J. R. Linge, 1988 Current changes in the world economy are having a profound effect on many peripheral regions most are becoming weaker and more marginal still This book examines this peripheralisation process and considers how it might be reversed Mapping Modernities Alan Dingsdale, 2013-02-01 When the communist governments of Eastern Europe and the Soviet Union collapsed between 1989 and 1991 there was a revived interest in a region that had been largely neglected by western geographers Mapping Modernities draws on the resulting work and other original theoretical and empirical sources to describe interpret and explain the place and spatial order of modernities in Central and Eastern Europe since 1920 to give a theoretically underpinned regional geography of the area The book interprets the geography of Central and Eastern Europe from 1920 to 2000 in terms of spatial modernity It details the individual and collective development of places produced within the three modernising projects of Nationalism

Communism and Neo liberalism **Long-Term Conflict Prevention and Industrial Development** Ralf Bredel, 2003 After decades of striving to prevent international conflict major armed conflicts in the 1990s have taken place within national boundaries After the series of national independence wars in the 1950s and 1960s and frequent geopolitical wars in the 1970s and 1980s a category of wars of the third kind prevailed The aim of this book is to consider the root causes of recent internal conflicts and to develop long term conflict prevention strategies from here New insights suggest the central role of politico economic inequalities in ethnic religious and cultural conflict The United Nations system has just started to adjust to this new reality of conflict and make long term conflict prevention a priority issue on international agendas Whereas development practitioners should principally conceive their work through a conflict prevention lens there is a shift in focus to United Nations agencies that deal with the economic characteristics of conflict The unbroken significance of a sustainable industrial development process in developing countries may allow the United Nations Industrial Development Organization UNIDO a particular vantage point and role in the long term prevention of conflict **Industrial Development Through**

Industrialization in Developing and Peripheral Regions F. E. Ian Hamilton, 2017-09-05 The ten years before this book was originally published in 1986 saw major restructuring in the economies of the developed world This was often closely related to industrial development in newly industrializing and third world countries This book examines the performance of these developing countries and includes studies of peripheral regions less developed regions within more advanced economies The overall findings are that whilst some areas and countries have success stories to tell such as Korea many so called newly industrializing countries and regions have had serious problems **Understanding Geographies of Polarization and**
