Koninck,2017-05-19 Ever since Singapore became an independent nation in 1965 its government has been intent on transforming the island s environment This has led to a nearly constant overhaul of the landscape whether still natural or already manmade Not only are the shape and dimensions of the main island and its subsidiary ones constantly modified so are their relief and hydrology No stone is left unturned literally and one could add nor is a single cultural feature be it a house a factory a road or a cemetery Given one of Singapore s unique feature namely that the state is the sole landlord all types of property in all parts of the island rural as well as urban were and remain subject to expropriation fortunately always with due compensation This atlas illustrates essentially through diachronic mapping of the changing distribution of all forms of land use the universality of what has become a tool of social management By constantly replanning the rules of access to space the Singaporean State is thus redefining territoriality even in its minute details This is one reason it has been able to consolidate its control over civil society peacefully and to an extent rarely known in history Manila Street Atlas First Edition Periplus Editors,2014-07-15
