Persian Garden Echoes Of Paradise:

The Persian Garden Mehdi Khansari, M. Reza Moghtader, Minouch Yavari, 2003-12-30 For more than three thousand years the Persian garden has been a focus of Iran's national imagination influencing its art literature and even religion. The Persian garden's inspirational role has however extended far beyond the land of its origin; its precepts have exerted a profound influence on garden design around the world. *The Persian Garden Echoes of Paradise* chronicles the history of the Persian garden from the magnificent sanctuaries and hunting parks of fifth century b.c. Persepolis to the magical nightingale gardens of nineteenth century Tehran. All were seen as a kind of earthly paradise. The English word paradise has its roots in the old Persian word pairi daeza meaning a walled space. To an astonishing extent that vision seems justified. This book was meticulously researched and created over a period of six years in Paris, Tehran and Washington by photographer Mehdi Khansari and architect Minouch Yavari together with the renowned Persian architect and architectural historian Reza Moghtader. It explains the philosophy behind Persian garden design and offers an authoritative account of its development, introducing new historical material in the process. This extraordinary story is enhanced by vivid descriptions of Persian gardens as seen through the eyes of travelers to Iran during the past five hundred years. Over 240 illustrations in full color complement the text. They include magnificent color photographs, old plates and engravings as well as exquisite architectural renderings and plans of the sites and the gardens. A selection of the finest Persian garden carpets, textiles, miniature paintings, stone reliefs, painted tiles, pottery and poetry augment the reader's experience of an ancient art form that for centuries has sought to meld the physical and the spiritual. **Islamic Gardens and Landscapes** D. Ruggles, 2011-12-30 Western admirers have long seen the Islamic garden as an earthly reflection of the paradise said to await the faithful. However, such simplification Ruggles contends, denies the sophistication and diversity of the art form. *Islamic Gardens and Landscapes* immerses the reader in the world of the architects of the great gardens of the Islamic world from medieval Morocco to contemporary India. Just as Islamic culture is historically dense, sophisticated and complex, so too is the history of its built landscapes. Islamic gardens began from the practical need to organize the surrounding space of human civilization: tame nature, enhance the earth's yield and create a legible map on which to distribute natural resources. Ruggles follows the evolution of these early farming efforts to their aristocratic apex in famous formal gardens of the Alhambra in Spain and the Taj Mahal in Agra. Whether in a humble city home or a royal courtyard, the garden has several defining characteristics which Ruggles discusses. Most notable is an enclosed space divided into four equal parts surrounding a central design element. The traditional Islamic garden is inwardly focused, usually surrounded by buildings or in the form of a courtyard. Water provides a counterpoint to the portioned green sections. Ranging across poetry, court documents, agronomy manuals and early garden representations, and richly illustrated with pictures and site plans, *Islamic Gardens and Landscapes* is a book of impressive scope, sure to interest scholars and enthusiasts alike. Sinclair, AI, 2025-03-29 Persian Gardens explores the rich history and profound influence of these meticulously designed landscapes revealing them as earthly representations of paradise Persian Gardens originating in ancient Persia are more than just beautiful spaces they are cultural statements reflecting power faith and identity Intriguingly these gardens often incorporate the charbagh layout a four part design symbolizing the Zoroastrian elements of water earth fire and air demonstrating a deep connection to ancient beliefs The book progresses from the core design principles to specific examples across historical periods examining their evolution and adaptation It then delves into the symbolism and cultural significance of these gardens drawing from textual and archaeological evidence Ultimately Persian Gardens traces their impact on global garden design particularly in Islamic and European traditions By combining architectural analysis with cultural history the book offers a unique perspective on these historical landscapes

Gardens Robert Pogue Harrison, 2010-10 Humans have long turned to gardens both real and imaginary for sanctuary from the frenzy and tumult that surrounds them Those gardens may be as far away from everyday reality as Gilgamesh's garden of the gods or as near as our own backyard but in their very conception and the marks they bear of human care and cultivation gardens stand as restorative nourishing necessary havens With Gardens Robert Pogue Harrison graces readers with a thoughtful wide ranging examination of the many ways gardens evoke the human condition Moving from the gardens of ancient philosophers to the gardens of homeless people in contemporary New York he shows how again and again the garden has served as a check against the destruction and losses of history The ancients explains Harrison viewed gardens as both a model and a location for the laborious self cultivation and self improvement that are essential to serenity and enlightenment an association that has continued throughout the ages The Bible and Qur'an Plato's Academy and Epicurus's Garden School Zen rock and Islamic carpet gardens Boccaccio Rihaku Cao Xueqin Italo Calvino Ariosto Michel Tournier and Hannah Arendt all come into play as this work explores the ways in which the concept and reality of the garden has informed human thinking about mortality order and power Alive with the echoes and arguments of Western thought Gardens is a fitting continuation of the intellectual journeys of Harrison's earlier classics Forests and The Dominion of the Dead Voltaire famously urged us to cultivate our gardens with this compelling volume Robert Pogue Harrison reminds us of the nature of that responsibility and its enduring importance to humanity

Isfahan Farshid Emami, 2024-04-02 A vibrant urban settlement from medieval times and the royal seat of the Safavid dynasty the city of Isfahan emerged as a great metropolis during the seventeenth century Using key sources this book reconstructs the spaces and senses of this dynamic city Focusing on nuances of urban experience Farshid Emami expands our understanding of Isfahan in a global context He takes the reader on an evocative journey through the city's markets promenades and coffeehouses bringing to life the social landscapes that animated the lives of urban dwellers and shaped their perceptions of themselves and the world In doing so

Emami reveals seventeenth century Isfahan as more than a cluster of beautiful monuments and gardens It was a cosmopolitan city where senses and materials nature and artifice and ritual and sociability acted in unison engendering urban experiences that became paramount across the globe during the early modern period Drawing extensively on Persian literary and visual sources including the Guide for Strolling in Isfahan this book casts new light on the history of a major Eurasian city and opens up new possibilities for cross cultural studies of urban experience in the early modern period

Spectacle and Topophilia David R. Castillo, Bradley J. Nelson, 2012 Significant places and spaces from Granada and Catalonia to Buenos Aires and the Chicago Columbian Exposition **Strange and Wonderful** Karen Polinger Foster, 2020-05-04 Ever since the creation of the world's first botanical and zoological gardens five thousand years ago people have collected displayed and depicted plants and animals from lands beyond their everyday experience Some did so to demonstrate power over distant territories others to enhance prestige by possessing something no one had seen before Exotica also satisfied intellectual curiosity furthered scientific research and educated and entertained In addition exotica especially their state sponsored representation were often instruments of political persuasion and in turn exerted considerable influence over expansionist policies More than an account of gardens and menageries from antiquity to the present *Strange and Wonderful* explores the imagery of exotic flora and fauna in Western art seeking answers to certain fundamental and universal questions How do artists schooled in traditional modes of rendering the familiar deal with the new and strange Why are rare species deliberately introduced into images otherwise devoid of the unusual What is the pictorialized relationship between exotic reality and artistic imagination Karen Polinger Foster takes readers on a journey across millennia and around the globe telling fascinating stories and meeting along the way such characters as Hatshepsut's baboons Charlemagne's elephant Durer's rhinoceros and Victoria's hippopotamus What emerges is a sense of just how strong and far reaching the pull of the unknown and exotic has been across time and space Ultimately images of the wonderful reveal as much about the indigenous as they do about the strange enabling us to glimpse more vividly the power of imagination to mold the unknown to its purposes This dazzling and richly illustrated volume offers a thoughtful much needed inquiry into a very human phenomenon **Sehregiz, Urban Rituals and Deviant Sufi Mysticism in Ottoman Istanbul** B. Deniz Çalis-Kural, 2016-04-01 *ehregiz* is an Ottoman genre of poetry written in honor of various cities and provincial towns of the Ottoman Empire from the early sixteenth century to the early eighteenth century This book examines the urban culture of Ottoman Istanbul through *ehregiz* as the Ottoman space culture and traditions have been shaped by a constant struggle between conflicting groups practicing political and religious attitudes at odds By examining real and imaginary gardens landscapes and urban spaces and associated ritualized traditions the book questions the formation of Ottoman space culture in relation to practices of orthodox and heterodox Islamic practices and imperial politics The study proposes that *ehregiz* was a subtext for secret rituals performed in city spaces carrying dissident ideals of Melami mysticism following

after the ideals of the thirteenth century Sufi philosopher Ibn al Arabi who proposed a theory of creative imagination and a three tiered definition of space the ideal the real and the intermediary barzakh In these rituals marginal groups of guilds emphasized the autonomy of individual self and suggested a novel proposition that the city shall become an intermediary space for reconciling the orthodox and heterodox worlds In the early eighteenth century liminal expressions of these marginal groups gave rise to new urban rituals this time adopted by the Ottoman court society and by affluent city dwellers and expressed in the poetry of Ned m The author traces how a tradition that had its roots in the early sixteenth century as a marginal protest movement evolved until the early eighteenth century as a movement of urban space reform

Persian Gardens and Pavilions Mohammad Gharipour, 2013-04-02 From Timur s tent in Samarqand to Shah Abbas s palace in Isfahan and Humayun s tomb in Delhi the pavilion has been an integral part of Persianate gardens since its earliest appearance at the Achaemenid garden in Pasargadae in the sixth century BC Here Mohammad Gharipour places both the garden and the pavilion within their historical literary and artistic contexts emphasizing the importance of the pavilion which has hitherto been overlooked in the study of Iranian historical architecture Starting with an examination of the depictions and representations of gardens in religious texts Gharipour analyses the how the idea of the garden developed from the model of pre Islamic gardens in Achaemenid and Sassanian Persia to its mentions in the Zoroastrian text of Aban Yasht and on to its central role as paradise in the Qur an Continuing on with an exploration of gardens and pavilions in Persian poetry Gharipour offers in depth analysis of their literal and metaphorical values It is in the poetry of major Persian poets such as Ferdowsi Naser Khosrow Sa di Rumi and Hafez that Gharipour finds that whilst gardens are praised for their spiritual values they also contain significant symbolic worth in terms of temporal wealth and power Persian Gardens and Pavilions then goes onto examine the garden and the pavilion as reflected in Persian miniature painting sculpture and carpets as well as accounts of travelers to Persia With masters such as Bizhad representing daily life as well as the more mystical prose and poetry in for example Sa di s Bustan The Orchard and Golestan The Rose Garden the garden and the pavilion can be seen to have crucial semiotic significances and cultural meanings But in addition to this they also point to historical patterns of patronage and ownership which were of central importance in the diplomatic and social life of the royal courts of Persia Gharipour thereby highlights the metaphorical spiritual symbolic and religious aspects of gardens as well as their more materialistic and economic functions This book reaches back through Persia s rich history to explore the material and psychological relationships between human beings pavilions and gardens and will be a valuable resource for Art History Architecture and Iranian Studies

The Urban Archetypes of Jane Jacobs and Ebenezer Howard Abraham Akkerman, 2020-01-09 Ebenezer Howard an Englishman and Jane Jacobs a naturalized Canadian personify the twentieth century's opposing outlooks on cities Howard had envisaged small towns newly built from scratch fashioned on single family homes with small gardens Jacobs embraced existing inner city neighbourhoods emphasizing the verve of the living street From Howard's idea the American Dream of garden suburbs had emerged yet his conceptualization of a modern city received criticism for being uniform and alienated from the rest of the city Similarly at the turn of the new century Jacobs inner city neighbourhoods came to be recognized as the result of commodification vacillating between poverty and newly discovered hubs of urban authenticity Presenting Howard and Jacobs within a psychocultural context The Urban Archetypes of Jane Jacobs and Ebenezer Howard addresses our urban crisis in the recognition that city form is a gendered allegorical medium expressing femininity and masculinity within two founding features of the built environment void and volume Both founding contrasts bring tensions but also the opportunities of fusion between pairs of urban polarities human scale against superscale gait against speed and spontaneity against surveillance Jacobs and Howard in their respective attitudes have come to embrace the two ancient archetypes the Garden and the Citadel leaving it to future generations to blend their two contrarian stances

The Proper Order of Things Heather L. Ferguson, 2018-06-12 The natural order of the state was an early modern mania for the Ottoman Empire In a time of profound and pervasive imperial transformation the ideals of stability proper order and social harmony were integral to the legitimization of Ottoman power And as Ottoman territory grew so too did its network of written texts a web of sultanic edicts aimed at defining and supplementing imperial authority in the empire's disparate provinces With this book Heather L. Ferguson studies how this textual empire created a unique vision of Ottoman legal and social order and how the Ottoman ruling elite via sword and pen articulated a claim to universal sovereignty that subverted internal challengers and external rivals The Proper Order of Things offers the story of an empire at once familiar and strange told through the shifting written vocabularies of power deployed by the Ottomans in their quest to thrive within a competitive early modern environment Ferguson transcends the question of what these documents said revealing instead how their formulation of the proper order of things configured the state itself Through this textual authority she argues Ottoman writers ensured the durability of their empire creating the principles of organization on which Ottoman statecraft and authority came to rest
