*Figures of Memory* Zsolt Komaromy, 2011-04-01 Zsolt Komaromy's *Figures of Memory* From the Muses to Eighteenth Century British Aesthetics affects a rapprochement between memory studies and eighteenth century British aesthetics It argues that the assessment of memory in the history of aesthetics and criticism has been determined by the ideological import of the creative imagination based on the dichotomies of imitative versus creative or reproductive versus productive mental and artistic procedures The legacy of such an opposition can still be felt in the way the literary relevance of memory is based on either viewing it as a representational reproductive imitative power that is a counter term to the creative sense of the imagination or as a constructive productive creative power that is assimilated by the creative imagination The notion of memory however harbors problems that unsettle such dichotomies This book does the timely work of employing insights offered by memory studies in reconsidering memory in the history of aesthetics it suggests that memory's literary relevance is explained precisely by the problems that make it resistant to the reproductive productive opposition These problems are explored through various figures representing senses of memory such as the Muses or metaphors for memory in philosophical and critical discourse Tracing figures of memory from the Muses through Plato and Descartes to works by Pope Addison Gerard and Kames Komaromy reveals an undercurrent of thought in eighteenth century British aesthetics that questions memory's nominal opposition to the imagination and that exploits memory's simultaneously reproductive and constructive nature in the emerging theory of the imagination By thus claiming that the tradition of memory's literary relevance is not marginalized but in fact perpetuated in eighteenth century British critical thought *Figures of Memory* gives a powerful new perspective on the history of memory in aesthetics and criticism A theoretical work with claims for historical generalization *Figures of Memory* will appeal to those interested in the history of aesthetics and criticism in memory studies in literary theory to students of literature and memory of literature and psychology and to scholars of the eighteenth century with theoretical interests
