Persistent Permeability Regionalism Localism And Global:

Global and Regional Problems Vilho Harle, 2016-04-22 Distinctive due to explicit and systematically developed links between international relations IR and related disciplines this book addresses global and regional interactions and the complex policy problems that often characterise this agenda Such enhanced communication is crucial for improving the capacity of IR to engage with concrete issues that today are of high policy relevance for international organisations states diplomats mediators and humankind in general Whilst the authors do not reject the present IR they offer a wider research agenda with new directions intended not only for those IR scholars who are unsatisfied with the analytical power of the current discipline but also for those working on international foreign global or interregional issues in other disciplines and fields of research In this instance they pay particular attention to linking up with peace research international political economy IPE and cultural political economy CPE sociology political geography development studies linguistics cultural studies environmental studies and energy research gender studies and traditions of area studies **The EU and World**

Regionalism Michael Schulz, 2016-02-17 Much has been said about the driving forces of region building processes or regionalization worldwide yet few systematic and comparative studies have been conducted on how regions can contribute to the building of other regions and more concretely how the European Union has pushed for regionalization worldwide This comparative book investigates the impact that the EU has on regionalization elsewhere through its inter regional relations Covering agriculture trade ASEAN NAFTA MERCOSUR and Commonwealth amongst other topics it investigates whether the EU contributes directly as well as indirectly to increased regional integration in different parts of the world

Regionalism, Globalisation and International Order Jens-Uwe Wunderlich, 2016-03-23 New regionalism and globalization have been prominent themes in academic and political debates since the beginning of the 1990s Despite the considerable amount of scholarly attention that the new regionalism has received in recent years its full empirical and theoretical potential has yet to be fully investigated This illuminating study provides an overview of new avenues in theorizing regionalism and proposes a consolidated framework for analysis and comparison Offering a comparative historical perspective of European and Southeast Asian regionalism it presents new and imaginative insights into the theory and practice of regionalism and the links between regional developments globalization and international order **China and**

the Global Politics of Regionalization Emilian Kavalski, 2016-05-23 This volume examines the prominent role of China in global politics and the relevance of the new regionalism paradigm to China s international outreach It provides a comprehensive and critical assessment of China s impact on the global politics of regionalization offers a novel application of analytical models investigates the aspects of the Chinese practice of regionalization that set it apart and demonstrates China s transformative potential in international life Addressing the need to re Orient the research and policy agenda of international relations this comprehensive study demonstrates both the lack of language to engage with existing norms and

standards and the difficulty of applying them to an evaluation of the global politics of China's non-Western international agency

The Geopolitics of Regional Power Sören Scholvin, 2016-03-09 In the last two decades various states from the Global South have emerged as important players in international relations. Most popular among them is China. Brazil, India, and South Africa have also taken essential roles in global and regional politics. Compared to traditional great powers, they can be labelled regional great powers or regional powers because their influence is, with the exception of China, concentrated on their neighbourhood. The impact of regions, meaning the impact of geography on the economics and politics of regional powers, is surprisingly understudied. This book analyses how geographical conditions influence the regional economics and politics of South Africa, allowing the author to delineate its region of influence.

EU Development Policy and Poverty Reduction Wil Hout, 2016-04-22 This inspiring collection analyzes the contribution of EU development policy to poverty reduction. It focuses on various aspects of the policy: trade, agriculture, and food security, and modes of policy making and implementation, and covers three geographical areas in relation to Europe: Latin America, Asia, and Africa. Middle East. The volume concludes with practical recommendations for improving EU development policy with a view to enhancing its effectiveness.

International Relations of the Middle East Louise L'Estrange Fawcett, 2016 Now in its fourth edition, *International Relations of the Middle East* provides a thematic overview of the subject, combining a history of the region with analysis of key themes, actors, and conflicts, as well as topical material and perspectives.

Sectarianization Nader Hashemi, Danny Postel, 2017-03-15 As the Middle East descends ever deeper into violence and chaos, sectarianism has become a catch-all explanation for the region's troubles. The turmoil is attributed to ancient sectarian differences, putatively primordial forces that make violent conflict intractable. In media and policy discussions, sectarianism has come to possess trans-historical causal power. This book trenchantly challenges the lazy use of sectarianism as a magic bullet explanation for the region's ills, focusing on how various conflicts in the Middle East have morphed from non-sectarian or cross-sectarian and nonviolent movements into sectarian wars. Through multiple case studies, including Syria, Iraq, Lebanon, Saudi Arabia, Bahrain, Yemen, and Kuwait, this book maps the dynamics of sectarianisation, exploring not only how but also why it has taken hold. The contributors examine the constellation of forces, from those within societies to external factors such as the Saudi-Iran rivalry, that drive the sectarianisation process and explore how the region's politics can be de-sectarianised. Featuring leading scholars and including historians, anthropologists, political scientists, and international relations theorists, this book will redefine the terms of debate on one of the most critical issues in international affairs today.

Limits to Regional Integration Søren Døsenrode, 2016-03-09 Regionalization in general and regional integration in particular have taken place at a growing pace since the end of the Cold War, when states were set free from various security overlays. Regional integration is logical as it is supposed to advance wealth and peace. Still, the picture is far from clear, and the process of regional integration is not automatic. Disintegration takes place as we saw in the cases of the Soviet Union, Yugoslavia, and Czechoslovakia, to mention a

few This is the case not only in states recently brought together but also in traditional states like Britain The Netherlands and Spain where strong groups strive for independence In some places regionalization is flourishing but regional integration is not Some regional integration projects like the North American Free Trade Agreement and Mercosur seem to stagnate Certainly there are limits to regional integration This comprehensive volume written by high profiled academics covers these themes by examining eleven cases ranging from the lack of integration in the Arctic and the Middle East to ongoing or progressing integration in Europe to uncover what blocks regional integration the results of which are used for developing new theoretical insights *Routledge Handbook of International Relations in the Middle East* Shahram

Akbarzadeh,2019-03-26 This handbook examines the regional and international dynamics of the Middle East It challenges the state society dichotomy to make sense of decision making and behavior by ruling regimes The 33 chapter authors include the world s leading scholars of the Middle East and International Relations IR in order to make sense of the region This synthesis of area studies expertise and IR theory provides a unique and rigorous account of the region s current dynamics which have reached a crisis point since the beginning of the Arab Spring The Middle East has been characterized by volatility for more than a century Although the region attracts significant scholarly interest IR theory has rarely been used as a tool to understand events The constructivist approach in IR highlights the significance of state identity shaped by history and culture in making sense of international relations The authors of this volume consider how IR theory can elucidate the patterns and principles that shape the region in order to provide a rigorous account of the contemporary challenges of the Middle East The Routledge Handbook of International Relations in the Middle East provides comprehensive coverage of International Relations issues in the region Thus it offers key resources for researchers and students interested in International Relations and the Middle East Beyond Regionalism? Matteo Legrenzi,2016-04-15 Regional cooperation regionalism and regionalization in the Middle East are usually considered to be weak and rather ceremonial However since September 11 2001 a new regional order is emerging and the impact of geostrategic changes in the international environment has yet to be satisfactorily studied With older regional organizations suffering from weaknesses new forms appear to be developing and flourishing due either to European support or growing sub regional identities This volume offers refined theoretical models and approaches which are attuned to the new dynamics and contradictions of a wide range of regionalist projects in the contemporary Middle East Case studies of the most important regional organizations in different policy fields offer comprehensive overviews of the main actors institutions historical development and current issues

Regionalism and Regional Security in South Asia Zahid Shahab Ahmed,2016-04-08 Zahid Shahab Ahmed evaluates the progress of the South Asian Association for Regional Cooperation SAARC This study goes beyond economic integration to present a detailed appraisal of cooperation under the overarching themes of economic cooperation environmental security human welfare and cooperation in security matters According to the author SAARC is making progress in addressing the

myriad of issues on its agenda The transition from agreements to actions and frequent interactions among the member states has boosted confidence The progress of SAARC is more evident in the less controversial areas of human security such as poverty alleviation health and safety human resources development and higher education Notwithstanding enthusiastic commitments reflected in agreements and action plans there is a gulf between rhetoric and implementation most notably in sensitive areas relating to traditional security In the light of the findings of this study the author proposes that greater cooperation in common human security areas has a potential to pave the way for a cooperation on issues of a contentious nature particularly terrorism

Exploring the New South American Regionalism (NSAR) Ernesto Vivares, 2016-04-15 The events and processes that have taken place in the last decade in South America have given way to one of the most interesting regional phenomena under a global crisis and within a changing world order From the traditional status of Washington's backyard and reign of economic and political stability South America has increasingly turned into a region marked by a heterodox development in the light of other dominant regional tendencies of development the European Union NAFTA and the Asia Pacific The political economic nature of the new South American regionalism NSAR is far from echoing the dominant interpretations about it which reflects the major regional projects today Given the reach and scope of the existing literature on the topic of the NSAR there is an important gap concerning its academic exploration in relation to its nature of development political economic complexity challenges and orientations In this sense this book explores from a wider and pluralist political economic perspective the developmental dimensions of the NSAR within a changing hemispheric and world order in transformation It analyses a set of specific debates regionalism in the Americas then and now social and economic development and regional integration and organized crime intelligence and defence An in depth and critical reflection on the complex and heterogeneous path of regionalization taking place in South America from different perspectives and in key issues of regional development

The European Union after Lisbon Søren Dosenrode, 2016-02-17 A few years have passed since the Lisbon Treaty came into force but the question still remains of what the Lisbon Treaty has actually brought about Was it just relatively insignificant as some scholars have claimed or was it something more This book sets out to look at this question and it does so by applying a classical division polity politics and policy One of the book's conclusions is that the Lisbon Treaty might have been plan b compared to the aborted Constitutional Treaty but it is certainly a substantial step forward on the European path of integration The Lisbon Treaty strengthened the EU both as a polity its stateness and in its politics the rules and procedures and in spite of the fact that the treaty was not really a policy treaty it has extended the Union's field by federalizing most of the policies within the area of Justice and Home Affairs This anthology brings together scholars from four European countries each of them a specialist within the fields they are analyzing Each scholar adds insights from their area of competence to the book leaving it an important contribution to the study of today's European Union

A New Scramble for Africa? Sören Scholvin, 2016-03-03 Global energy consumption will increase rapidly in the next decades The discrepancy between demand and supply is worrisome within the old and new cores of the world economy Sub Saharan Africa meanwhile possesses vast potential for energy resources to be further exploited Whilst the Global North is a traditional player in the sub Saharan energy sector new actors from emerging economies especially China's state owned enterprises but also Brazilian Indian and South African giants have entered what appears to be a scramble for the largely untapped energy resources of the region This book is the first to bring together comparative perspectives on The strategies of state and non state actors involved in the exploitation of sub Saharan energy resources The potential and pitfalls of new forms of cooperation on energy southwards of the Sahara The domestic opportunities and challenges of the present energy resource boom Dynamics on the international level are brought together with local developments to provide up to date insights on the scramble for energy resources in sub Saharan Africa This book also advances a materialist approach applicable in geographical and political scientific research showing that much insight can be gained by concentrating on the material environment that shapes economic and political phenomena

Reconfiguring Global Climate Governance in North America Marcela Lopez-Vallejo, 2016-04-08 Global climate governance has presented problems that have led to failures yet it has also opened the door to new transregional governance schemes especially in North America This book introduces an environmental dimension into the concept of governance Almost fifteen years after the climate global governance concept emerged results worldwide have not been as favorable as expected This book details previous discussions about the concept of global climate

governance and its limits It highlights how the Kyoto Protocol has a limited design taking into account a national approach to global regional and transnational problems had no obligatory mechanisms for implementation and explains the emergence of new polluters not committed under it such as China and India Furthermore this book explores other levels of authority such as regional institutions the North American agreement on trade NAFTA and on environment NAAEC as well as the regional energy working group NAEWG The author puts forward a theoretical proposal for re territorialization and coordination of policies for climate change into new forms of articulating interests in what she terms transnational green economic regions TGERs and tests this on two case studies the Regional Greenhouse Gas Initiative RGGI and the Western Climate Initiative WCI This study presents the challenges and opportunities of a transregional approach in North America

The Rise of China and the Capitalist World Order Li Xing, 2016-03-03 China's rise within global society and politics has brought it into the spotlight for social scientists the country's long and dramatic transformations in the twentieth and twenty first centuries make it an ideal case study for research on political and economic development and social changes China's size integration and dynamism are impacting on the functioning of the capitalist world system This book offers a non conventional analysis of the possible outcomes from China's transformation and provides a dialectical understanding of the complexities and underlying dynamics brought about by the rise of modern day China The theoretical and methodological approaches will prove useful for students and researchers of development studies and international relations

The Rise of the Networking Region Harald Baldersheim, Are Vegard Haug, Morten Øgård, 2011 Covering the four Nordic countries of Denmark Finland Norway and Sweden plus the Faroe Islands this volume charts the changes in networking activities and related development initiatives that have taken place over the last ten years

From Resilience to Revolution Sean L. Yom, 2015-12-01 Based on comparative historical analyses of Iran Jordan and Kuwait Sean L Yom examines the foreign interventions coalitional choices and state outcomes that made the political regimes of the modern Middle East A key text for foreign policy scholars From Resilience to Revolution shows how outside interference can corrupt the most basic choices of governance who to reward who to punish who to compensate and who to manipulate As colonial rule dissolved in the 1930s and 1950s Middle Eastern autocrats constructed new political states to solidify their reigns with varying results Why did equally ambitious authoritarians meet such unequal fates Yom ties the durability of Middle Eastern regimes to their geopolitical origins At the dawn of the postcolonial era many autocratic states had little support from their people and struggled to overcome widespread opposition When foreign powers intervened to bolster these regimes they unwittingly sabotaged the prospects for long term stability by discouraging leaders from reaching out to their people and bargaining for mass support early coalitional decisions that created repressive institutions and planted the seeds for future unrest Only when they were secluded from larger geopolitical machinations did Middle Eastern regimes come to grips with their weaknesses and build broader coalitions
