Person Readings In Human Nature:

The Person William O. Stephens, 2006 For courses in Introductory Philosophy and Philosophy of Man and Human Nature The vitally important concept of the person is featured in this anthology of readings from the history of Western philosophy This text which is philosophically more serious yet still reader friendly offers a variety of authors and a wide historical scope in the Philosophy of Human Nature market that generally neglects this topic Persons Antonia LoLordo, 2019 What is a person Why do we count certain beings as persons and others not How is the concept of a person distinct from the concept of a human being or from the concept of the self When and why did the concept of a person come into existence What is the relationship between moral personhood and metaphysical personhood How has their relationship changed over the last two millennia This volume presents a genealogy of the concept of a person It demonstrates how personhood like the other central concepts of philosophy law and everyday life has gained its significance not through definition but through the accretion of layers of meaning over centuries We can only fully understand the concept by knowing its history Essays show further how the concept of a person has five main strands persons are particulars roles entities with special moral significance rational beings and selves Thus to count someone or something as a person is simultaneously to describe it as a particular a role a rational being and a self and to prescribe certain norms concerning how it may act and how others may act towards it A group of distinguished thinkers and philosophers here untangle these and other insights about personhood asking us to reconsider our most fundamental assumptions of the self **The Observer and the Observed** Chris Steed, 2024-11-05 This book approaches the God question in a different way than normal from the perspective of psychotherapy In a world of machine intelligence the key idea is an analogy of being between human personhood and divine personhood as the only satisfactory way of showing that our inner conscious awareness nourished by the validation of the self is responded to in ultimate terms It aims to extrapolate from below from our psychological experience to asking ultimate questions drawing lines between Observation in quantum physics The maternal gaze Recognition in social worlds that confer perception in place of invisibility The power of inter subjectivity in relational neurobiology and therapy What has to be accounted for is our sense of personhood and how that fits in with a cosmos that is at best neutral The metaphor of a wifi universe is proposed but rather than a soulless device being switched on how a human psyche comes to a sense of consciousness of its own value is the issue here A personal God is the best explanation for the evidence of how our personhood and subject status requires correspondence As engaging with a neutral AI entity is bound to be soulless the first person perspective requires an I thou relationship A universe constructed from nature by itself or one where the ultimate is impersonal energy just does not cut it or respond adequately to what is inside us This book offers an account of how the realm described by physics and our inner world can tie up perhaps the only way they can *Shakspearian Readings* William Shakespeare, 1839 **Readings in Later Chinese Philosophy** Justin Tiwald, Bryan W. Van Norden, 2014-09-03 An exceptional contribution to the teaching and

study of Chinese thought this anthology provides fifty eight selections arranged chronologically in five main sections Han Thought Chinese Buddhism Neo Confucianism Late Imperial Confucianism and the Twentieth Century The editors have selected writings that have been influential that are philosophically engaging and that can be understood as elements of an ongoing dialogue particularly on issues regarding ethical cultivation human nature virtue government and the underlying structure of the universe Within those topics issues of contemporary interest such as Chinese ideas about gender and the experiences of women are brought to light Introductions to each main section provide an overview of the period while brief headnotes to selections highlight key points The translations are the works of many distinguished scholars and were chosen for their accuracy and accessibility especially for students general readers and scholars who do not read Chinese Special effort has been made to maintain consistency of key terms across translations Also included are a glossary bibliography index of names and an index locorum of The Four Books

Introduction to the Philosophy of Being George Klubertanz, 2022-10-18 The human intellect must begin with sensible things and hence all principles must somehow be found in sense experience The discovery of principles in an induction But there is no danger of empiricism or sensism if we remember that point on which Aristotle and Aquinas were ready to stake their whole philosophy namely that sensible things are potentially intelligible This means that sensible things can be understood as being

Who is Who? Kevin S. Decker, 2013-09-03 When you have been wandering the cosmos from one end of eternity to another for nearly a thousand years what's your philosophy of life the universe and everything Doctor Who is 50 years old in 2013 Through its long life on television and beyond it has inspired much debate due to the richness and complexity of the metaphysical and moral issues that it poses This is the first in depth philosophical investigation of Doctor Who in popular culture From 1963's *An Unearthly Child* through the latest series it considers continuity and change in the pictures that the programme paints of the nature of truth and knowledge science and religion space and time good and evil including the uncanny the problem of evil the Doctor's complex ethical motivations questions of persisting personal identity in the Time Lord processes of regeneration the nature of time travel through wibbly wobbly timey wimey stuff how quantum theory affects our

understanding of time and the nature of the mysterious and irrational in the Doctor's universe **Introduction to the Philosophy of Being, Second Edition** George P. Klubertanz, 2005-07-01 This is an introductory textbook of metaphysics whose aim is to help a beginning student According to St Thomas the human intellect must begin with sensible things and hence all principles must somehow be found in sense experience The discovery of principles is an induction as I hope to prove in this text But there is no danger of empiricism or sensism if we remember that point on which Aristotle and St Thomas were ready to stake their whole philosophy namely that sensible things are potentially intelligible With regard to the manner of presentation this book is not St Thomas made simple St Thomas's thought is not simple and attempted simplifications usually end by simplifying the positions and letting the reasoning go The method of this book attempts to provide for the necessary introductory character of the course by selecting only a few of the problems of metaphysics for study and by giving as concrete a presentation of the evidence as possible from the Preface *The Palgrave Handbook of*

Posthumanism in Film and Television Michael Hauskeller, Curtis D. Carbonell, Thomas D. Philbeck, 2016-01-13 What does popular culture's relationship with cyborgs robots vampires and zombies tell us about being human Insightful scholarly perspectives shine a light on how film and television evince and portray the philosophical roots the social ramifications and the future visions of a posthumanist world **Interactive Storytelling** Andrew Glassner, 2017-08-02 We are on the verge of creating an exciting new kind of interactive story form that will involve audiences as active participants This book provides a solid foundation in the fundamentals of classical story structure and classical game structure and explains why it has been surprisingly difficult to bring these two activities together With this foundation in place the book presents several ideas for ways to move forward in this appealing quest The author has a conversational and friendly style making reading a pleasure

Law and Philosophy in the Late Roman Republic René Brouwer, 2021-06-03 The middle of the second until the middle of the first century BCE is one of the most creative periods in the history of human thought and an important part of this was the interaction between Roman jurists and Hellenistic philosophers In this highly original book Ren Brouwer shows how jurists transformed the study of law into a science with the help of philosophical methods and concepts such as division rules and persons and also how philosophers came to share the jurists' preoccupations with cases and private property The relevance of this cross fertilization for present day law and philosophy cannot be overestimated in law its legacy includes the academic study of law and the Western models of dispute resolution while in philosophy the method of casuistry and the concept of just property *Readings in General Psychology* Edward Stevens Robinson, Florence Richardson-Robinson, 1929

Catastrophe Theology Francis Kai,2017-05-15 The Catastrophe Theology is a theology learned by Francis Kai throughout the years he was thrown into the Valley of Achor Although he had been a Catholic from ten years old Francis did not know to receive grace from God in deep suffering when his wife Martha was diagnosed with brain cancer During his search for spiritual help Francis discovered Martin Luther was the first theologian to preach suffering Luthers doctrine of justification by faith alone is the doctrine of salvation by grace alone through faith alone Grace is the free gift of God to mankind A Christian must learn the way to receive grace through his faith in Christ Francis learned to receive grace by learning Luthers teaching Submit totally to God He was transformed from living his church life to Christian life God calls us to bear great fruit for his glory in this suffering world Francis learned the verse of John 14 12 from Pastor Scott Scruggs to do greater things than Jesus by telling his readers about the theology of suffering A church that does not preach suffering is not Gods church Francis learned to be a godly man from living a life in doctrine Christology and Metaphysics in the Seventeenth Century Richard Cross,2022 Richard Cross explores the largely uncharted territory of seventeenth century Christology paying close attention to its metaphysical and semantic presuppositions and consequences He shows that theologians of all stripes develop and expand theories that are associated respectively with the medieval theologians Thomas Aquinas and Duns Scotus Italian and French Dominicans follow Aquinas closely read through the lens of Cardinal Cajetan But most Iberian Dominicans incorporate Suarez s theory of modes into their account and Suarez whose account is a modification of Scotus s is in turn followed by his fellow Jesuits Lutherans use Cajetan s account to fill explanatory gaps in their own accounts and Reformed theologians by and large adapt the position associated with Scotus The study ends with an account of Leibniz s Christology in its historical and conceptual context **The Word of the Lord: Reflections on the Mass**

for The Season of Christmas The Season of Lent The Sacred Triduum The Season of Easter And Solemnities and Feasts of the Lord and His Saints Series Description The Lectionary guides our reading of Scripture through the liturgical year presenting Old and New Testament readings that together reveal God's unfolding plan for our salvation In The Word of the Lord series biblical scholar Dr John Bergsma provides commentary on each Sunday's selection of readings Whether you are a homilist seeking insight into the meaning of difficult scriptural passages or a Catholic desiring a deepened understanding of the readings you hear at Mass The Word of the Lord series is an invaluable guide

Communicatio Idiomatum Richard Cross, 2019 This study offers a radical reinterpretation of the sixteenth century Christological debates between Lutheran and Reformed theologians on the ascription of divine and human predicates to the person of the incarnate Son of God the *communicatio idiomatum* It does so by close attention to the arguments deployed by the protagonists in the discussion and to the theologians metaphysical and semantic assumptions explicit and implicit It traces the central contours of the Christological debates from the discussion between Luther and Zwingli in the 1520s to the Colloquy of Montbeliard in 1586 Richard Cross shows that Luther's Christology is thoroughly Medieval and that innovations usually associated with Luther in particular that Christ's human nature comes to share in divine attributes should be ascribed instead to his younger contemporary Johannes Brenz The discussion is highly sensitive to the differences between the various Luther groups followers of Brenz and the different factions aligned in varying ways with Melancthon and to the differences between all of these and the Reformed theologians By locating the Christological discussions in their immediate Medieval background Cross also provides a comprehensive account of the continuities and discontinuities between the two eras In these ways it is shown that the standard interpretations of the Reformation debates on the matter are almost wholly mistaken
