Person To Person

William A. Shaw, William Arthur Shaw

Person To Person:

The Free Person and the Free Economy Anthony J. Santelli, 2002-01-01 Foundations of Economic Personalism is a series of three book length monographs each closely examining a significant dimension of the Center for Economic Personalism's unique synthesis of Christian personalism and free economic market theory In the aftermath of the momentous geo political and economic changes of the late 1980s a small group of Christian social ethicists began to converse with free market economists over the morality of market activity This interdisciplinary exchange eventually led to the founding of a new academic subdiscipline under the rubric of economic personalism These scholars attempt to integrate economic theory history and methodology with Christian personalism's stress upon human dignity humane social structures and social justice This final volume in the series systematically applies the praxeological from the first volume and theoretical from the second volume foundations of the personalist tradition to free market economic theory Unlike the previous two this work defends economic liberty in theologically sensitive terms that reference the personalist tradition without compromising the disciplinary integrity of either economics or social ethics

The Problem of the Idea of Culture in John Paul II John Corrigan, 2019-11-13 In The Problem of the Idea of Culture in John Paul II Exposing the Disruptive Agency of the Philosophy of Karol Wojtyla John Corrigan provides a new lens with which to view and understand the philosophy of Karol Wojtyla John Paul II He exposes Wojtyla as a major player in contemporary philosophical debates The work reformulates the problem of experience in light of the questions surrounding our idea of culture Corrigan argues that for Wojtyla the drama of the problem of experience manifests in the apparently divergent accounts of the meaning of human experience as presented by the philosophies of being and of consciousness Solving this conundrum results in an idea of the person capable of explaining human experience in relation to human culture unfolding the experiences of self knowledge conscience and the ontic causal relationship of the person to human culture The first part of the book concerns formal considerations regarding the constitutive aspects of Wojtyla's approach while the second part deals with pragmatic considerations drawn from his comments on culture
