

MX6000 Series

Multi Function Controller

- Single Ethernet 100Mb interface expands into six RS485 buses
- Directly controls up to six continuous particle counters
- Provides RS485 bus for Series 8000 Air Samplers
- Provides RS485 bus for Series 2000 Environmental modules
- Provides RS485 bus for Alarm Message Displays
- Provides RS485 bus for Watchdog Module
- Six independent RS485 communications interfaces
- Real Time Clock
- Micro SD card support
- High performance ARM® processor

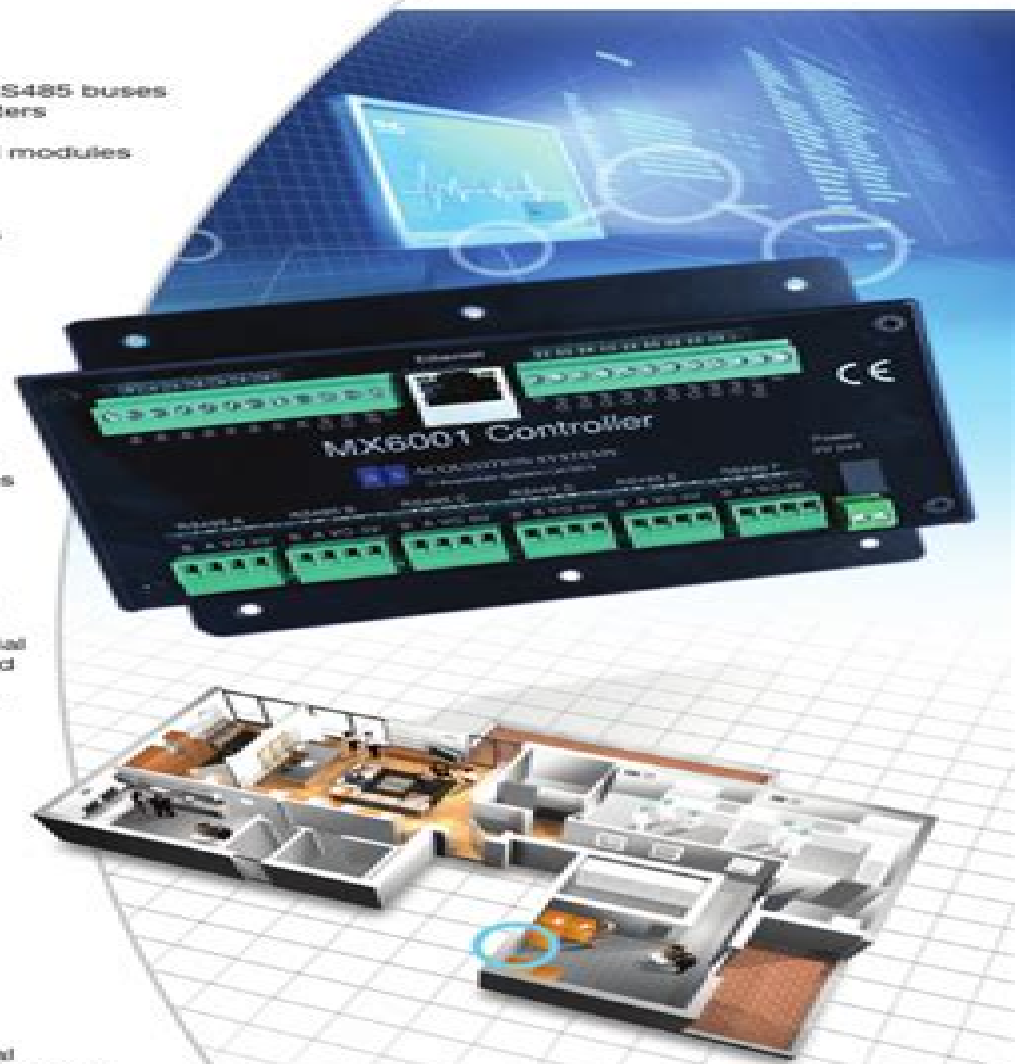

The MX6000 series provides unparalleled flexibility and functionality in a single compact module. By simply connecting a single Ethernet cable from the host PC and supplying 24Vdc power, this powerful module provides all the functionality to drive 'swappable' particle counters, alarm message displays, environmental inputs, Air Sampler controllers, a beacon stack and watchdog subsystems simultaneously.

A single physical Ethernet port expands into six physical RS485 serial buses. The RS485 buses appear within the host PC as virtualised COM ports and behave like local COM ports on the PC. Perfectly matched to enVigil FMS and enVigil PnP, this single module combines the functionality of an Ethernet Serial Device Server, multiple particle counter controllers and an alarm beacon interface. Available in two versions; one with screw terminals for the six RS485 buses and one with RJ45 connectors for the RS485 buses.

The MX6000 series supports up to six particle counters directly and offer a pass-through mode to additional MX6000 modules that act as expanders each supporting up to six particle counters. The pass-through mode automatically recognises serial protocol requests for particle counters beyond its local capability and transparently redirects them via Ethernet to the appropriate MX6000 module.

The on-board real-time clock and Micro SD storage make it possible for data to be logged local to the MX6000 during communications loss or failure of the host PC and results retrieved later via FTP.

MX6000 is configured using a utility that defines global settings such as IP address and selects the 'task' or function associated with each RS485 port.
