Precis Vol 2:

Précis of the Lectures on Architecture Jean-Nicolas-Louis Durand, 2000-01-01 Jean Nicolas Louis Durand 1760 1834 regarded the *Précis of the Lectures on Architecture* 1802 5 and its companion volume the *Graphic Portion* 1821 as both a basic course for future civil engineers and a treatise Focusing the practice of architecture on utilitarian and economic values he assailed the rationale behind classical architectural training beauty proportionality and symbolism His formal systematization of plans elevations and sections transformed architectural design into a selective modular typology in which symmetry and simple geometrical forms prevailed His emphasis on pragmatic values to the exclusion of metaphysical concerns represented architecture as a closed system that subjected its own formal language to logical processes Now published in English for the first time the *Précis* and the *Graphic Portion* are classics of architectural education *The Autopoiesis of Architecture, Volume II* Patrik Schumacher, 2012-04-24 This is the second part of a major theoretical work by Patrik Schumacher which outlines how the discipline of architecture should be understood as its own distinct system of communication Autopoiesis comes from the Greek and means literally self production it was first adopted in biology in the 1970s to describe the essential characteristics of life as a circular self organizing system and has since been transposed into a theory of social systems This new approach offers architecture an arsenal of general comparative concepts It allows architecture to be understood as a distinct discipline which can be analyzed in elaborate detail while at the same time offering insightful comparisons with other subject areas such as art science and political discourse On the basis of such comparisons the book insists on the necessity of disciplinary autonomy and argues for a sharp demarcation of design from both art and engineering Schumacher accordingly argues controversially that design as a discipline has its own sui generis intelligence with its own internal logic reach and limitations Whereas the first volume provides the theoretical groundwork for Schumacher's ideas focusing on architecture as an autopoietic system with its own theory history medium and its unique societal function the second volume addresses the specific contemporary challenges and tasks that architecture faces It formulates these tasks looking specifically at how architecture is seeking to organize and articulate the complexity of post fordist network society The volume explicitly addresses how current architecture can upgrade its design methodology in the face of an increasingly demanding task environment characterized by both complexity and novelty Architecture's specific role within contemporary society is explained and its relationship to politics is clarified Finally the new global style of Parametricism is introduced and theoretically grounded **A Précis of Modern Tactics** Robert Home, 1882 **The précis book: or Lessons in accuracy of statement [&c.]. [With] Key** William Cosmo Monkhouse, 1878 *Imagined Orphans* Lydia Murdoch, 2006 With a critical eye to social issues of the period Murdoch urges readers to reconsider the complex situations of families living in poverty Jacket **Précis of an Action at Common Law** Herbert E. Boyle, 1881 NASA Technical Paper , 1983 **Précis and Précis Writing** Arthur William Ready, 1904 *Catalogue of the Library of the Late*

Richard Heber, 1834 **Speaking With Their Own Voices** Jerzy Zdanowski, 2014-06-12 This book presents an analysis of the slavery and manumission practiced in the Persian Gulf region in the first half of the 20th century. It is unique as it exposes the life stories of several hundred slaves speaking with their own voices. A striking aspect of the majority of studies on slavery is that they provide the reader with excellent statistics and describe the mechanism of enslavement, the routes of slave trading, and the economic and social conditions of enslaved people, but slaves themselves generally remain anonymous. The premise of this book is to give voice directly to the slaves by presenting in full length their statements made at the British Agencies in Kuwait, Bahrain, Muscat, Sharjah, and Bushire. Altogether around 1 000 statements were made by slaves asking for manumission certificates, and the analysis of these statements sheds light on various aspects of social, economic, and political life on the Arabian shore of the Gulf. Given that it uncovers new aspects of the everyday life of the Arabian Peninsula, this book will also be of help to people of this region who are looking for their roots.
