

PREFACE TO THE ORIGINAL PORTUGUESE EDITION

Discussion whether to use or not Agile Methods in conjunction with software process maturity models is frequent and ongoing.

Some consider that the requirements of maturity models cannot be implemented at all in organizations with Agile development. Others consider that installing these models will hurt the agility of the development. This incompatibility is discussed, therefore, by defenders of the use of Agile Methods and by defenders of maturity models.

It is in this context that the book “The Story of Tahini-Tahini: Software Process Improvement with Agile Methods and the MPS Model” by Jorge Boria, Viviana Rubinstein and Andrés Rubinstein.

The book originated in a call made in December of 2011 by the Secretaria de Política de Informática – SEPIN, del Ministério de Ciência, Tecnologia e Inovação – MCTI do Brasil¹, who is responsible for the Programa Brasileiro de Qualidade e Produtividade em Software² – PBQP Software, for its 2012 Cycle of their Program “Série de Livros do PBQP Software”³. From several proposals it became the text of choice for publication.

And it was, without a doubt, an excellent choice. In it, the authors, based on their vast experience as consultants, avaliadores⁴ MPS and lead appraisers of the CMMI, show us that there are no contradictions among maturity models, process improvement and Agile Methods. On the contrary, what there exists is an excellent road that can be followed with success by organizations until they have reached a very high level of quality and maturity in their software processes.

In line with the authors, the book has as its objective to show how consulting techniques interrelate with Agile Methods to achieve the expected results of the MR-MPS-SW⁵. They use four of the Agile Methods for this: Kanban, Scrum, XP and FDD (Feature Driven Development), and the story of Tahini-Tahini, a fictitious enterprise that all of us would certainly like to exist.

It is a technical book, but fascinating and easy to read. It even makes us laugh at times, such the good humor of the authors in dealing with their subject. It will certainly become a success story in this excellent initiative of the MCTI.

I thank the authors their invitation to write the preface to such an interesting book and with such important contributions to Quality and Software Engineering.
