Sustainability through Participation? Birgit Peters, Eva Julia Lohse, 2023-07-03 Can and should participation be a means of achieving sustainability? The concepts of sustainability and participation are both in vogue and many international, supranational and national legal texts and standards refer to these two concepts. However, there are still several unanswered questions that invite legal inquiry: which sustainability? Which kinds of participation? Participation by whom? How are the two concepts of sustainability and participation effectively interlinked in legal provisions? This book approaches the interconnection between sustainability and participation inductively and precisely in areas of law which are commonly associated with sustainability and sustainable development: national, European and international environmental and economic law.

The Routledge Handbook of State-Owned Enterprises Luc Bernier, Massimo Florio, Philippe Bance, 2020-05-27 State-owned enterprises make up roughly 10 percent of the world economy yet they are woefully understudied. This handbook offers the first synthesis of the topic since the 1980s and offers a comprehensive reference for a generation. The authors provide a detailed explanation of the theory that underpins the expansion of state-owned enterprises in the 21st century. Each chapter delivers an overview of current knowledge as well as identifying issues and relevant debates for future research. The authors explain how state-owned enterprises are used in both developed and developing countries and offer an insight into complex and fascinating organizations such as the German municipal conglomerates or the multinational companies owned by states. New modes of governance and regulation have been invented to make sure they act in the public interest. This handbook brings together a wealth of international scholars offering multiple theoretical perspectives to help shape a brave new world. It will be of interest to teachers and students of Economics, Public Administration and Business academics, established researchers and PhD students seeking rigorous literature reviews on specific aspects of SOEs as well as practitioners and decision makers in international organizations.
