Controversies in Psychotherapy and Counselling

Colin Feltham, 1999-08-12 My congratulations to Colin Feltham for assembling a set of contentious issues and lively authors which together made me forget my surroundings Person Centred Practice Editor Colin Feltham's choice of topics shows an astute on the ground awareness of the issues that dog the industry while still making lively reading New Therapist In this book leading practitioners critics and commentators take sides on many topical and core debates including Theoretical issues Does the unconscious really exist Is birth trauma a fiction Should one believe in false memories Clinical issues Is therapy effective Is the relationship central to success Do therapists pathologize their clients Are boundaries necessary Professional issues Do trainees need therapy Is professionalization of the field desirable Are counselling and psychotherapy really distinguishable Social issues Can therapy be proven necessary Does therapy benefit individuals or contribute to social control Does stress really exist

The Future of Training in

Psychotherapy and Counselling John Rowan, 2014-02-25 The Future of Training in Psychotherapy and Counselling presents a revealing and stimulating account of the current state of training that demonstrates how training will have to adapt if it is to successfully meet the needs and challenges of the future In an attempt to look afresh at the whole question of training John Rowan proposes that there are three ways of doing therapy and any examination of training has to consider each of these the instrumental where the main emphasis is on the treating the client or patient the authentic way where the main emphasis is on meeting the client or patient the transpersonal way where main emphasis is on linking with the client in a more personal way Each approach makes different assumptions about the self about the relationship and about the level of consciousness involved in doing therapy By challenging the basic precepts of traditional training John Rowan encourages the reader to reconsider subjects including the difference between counselling and psychotherapy culture and ethics the origins of disturbance in clients and child development The Future of Training in Psychotherapy and Counselling provides a much needed new perspective that will compel all psychotherapists and counsellors to take a closer look at training in the field

The Therapist's Use of Self John Rowan, Michael Jacobs, 2002-10-16 Most therapists regardless of theoretical approach intuitively recognize that their sense of self intimately influences their work Using this elemental truth as a launching pad Rowan and Jacobs articulate the different avenues through which the self informs therapy and how each can be used to improve therapeutic effectiveness Along the way the authors provide a masterful exposition of transference countertransference and projective identification throwing much needed light on topics that have long been mired in controversy and confusion The book is a priceless resource for experienced therapists and those just beginning the journey Professor Sheldon Cashadan author of Object Relations Therapy and The Witch Must Die The Hidden Meaning of Fairy Tales Outstandingly in the current literature this book meets the conditions for integrative psychotherapy to fulfil its undoubted

potential as the therapy pathway of the future Much has to change in our field First people have to become better informed and more respectful of other traditions than their own engaging with all kinds of taboo topics Next vigorous but contained dispute has to take place without having a bland synthesis as its goal Finally the current situation in which integration runs in one direction only humanistic and transpersonal therapists learning from psychoanalysis has to be altered Rowan and Jacobs each a master in his own field have done a wonderful collaborative job The book s focus on what different ways of being a therapist really mean in practice guarantees its relevance for therapists of all schools or none and at every level Andrew Samuels Professor of Analytical Psychology University of Essex and Visiting Professor of Psychoanalytic Studies Goldsmith s College University of London There is no question in psychotherapy more important than the degree to which the practitioner should be natural and spontaneous Would it be sensible to leave one s ordinary everyday personality behind when entering the consulting room and adopt a stance based on learned techniques This is the question addressed by Rowan Jacobs in *The Therapist s Use of Self* approaching it from various angles and discussing the relevant ideas of different schools of thought The authors are very well informed and write with admirable clarity directness and wisdom and have made an impressive contribution to a problem to which there is no easy solution Dr Peter Lomas author of *Doing Good Psychotherapy Out of Its Depth* This book deals with what is perhaps the central question in therapy who is the therapist And how does that actually come across and manifest itself in the therapeutic relationship A good deal of the thinking about this in psychoanalysis has come under the heading of countertransference Much of the thinking in the humanistic approaches has come under such headings as empathy genuineness nonpossessive warmth presence personhood These two streams of thinking about the therapist s own self provide much material for the bulk of the book but other aspects of the therapist also enter the picture including the way a therapist is trained and uses supervision in order to make fuller use of her or his own reactions responses and experience in working with any one client The book is aimed primarily at counsellors and psychotherapists or trainees in these disciplines It has been written in a way that is accessible to students at all levels but it is also of particular value to existing practitioners with an interest in the problems of integration

The Psychology of Chronic Fatigue Syndrome R. Paul Gregory, 2010

The Therapeutic Use of Self Val Wosket, 2002-05-03

The Therapeutic Use of Self is a ground breaking examination of the individual therapist s contribution to process and outcome in counselling Using many powerful case examples and extensive research findings from the author s own work this book presents the counsellor s evaluation of their own practice as the main vehicle for the development of insight and awareness in to individual therapeutic characteristics It addresses many of the taboos and infrequently discussed aspects of therapy such as the value of therapist failure breaking the rules of counselling working beyond the accepted boundaries of counselling *The Therapeutic Use of Self* will act as a spur to individual counsellors to acknowledge develop and value their own unique contribution to the counselling profession

Therapy Beyond Modernity Richard House, 2018-06-12 This book draws

together radical critiques of therapy and shows how therapists have become too willing administrators of the mind and how they then delight in the bureaucratic management of therapeutic practice The Reality Game, second edition John Rowan,2014-02-04 The Reality Game is for people who are or who want to be counsellors or psychotherapists It is particularly useful for those training in humanistic or integrative psychotherapy and counselling Discussing the skills and techniques used in both individual and group therapy this is an essential guide to good practices for the professional humanistic counsellor or psychotherapist and also responds to the questions most often asked by those training in these disciplines *The Resonance of Emptiness* Gay Watson,2013-11-19 This work presents an exploration of Buddhist philosophy and practice as a potential resource for an approach to psychotherapy which is responsive to the needs of its time and context and attempts to open up a three way dialogue between Buddhism psychotherapy and contemporary discourse to reveal a meaningful theory and practice for a contemporary psychotherapy **The Wing of Madness** Daniel Burston,1996 In The Wing of Madness Daniel Burston chronicles R D Laing s meteoric rise to fame as one of the first media psycho gurus of the 20th century and his spiralling decline in the late 70s and 80s The Buddhist Forum T. Skorupski,2005-08-09 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company The Reality Game John Rowan,2016-05-05 In the years since it was first published The Reality Game has become a classic text For all those training and practising in humanistic and integrative psychotherapy it is an essential guide to good practice and an excellent introduction to the skills used in individual and group therapy This new edition has been updated to take into account changes in the field and John Rowan s own work while still providing guidance on establishing and developing the relationship between counsellor and client and covering assessment the initial interview the opening session aims transference resistance and supervision With the student s needs always at the forefront this extensively revised new edition responds to the questions most often asked by trainees in these disciplines and includes discussions of ethics and new chapters on transpersonal psychology and on dialogical self theory It will be a must read for psychotherapists and counsellors in practice and training especially those involved in humanistic and integrative psychotherapy Balancing Acts Hazel Johns,2002-09-11 This book examines the philosophy and constructs of counselling training and the means by which students and trainers manage the complex demands placed upon them during the training process The three main sections of the book explore key aspects of being trainers the pressures and stresses involved issues of gender and power the complexities of co training elements of training academic and voluntary settings negotiated and reflective learning assessment issues arising from the functions of groups experiences of being trainees first hand accounts from practitioners of the challenges they faced in their training The counsellors trainers and supervisors who share their research and experience as reflective practitioners provide a clear analysis of the balancing act involved in any adult learning Executive Coaching Halina Brunning,2018-04-24 Executive Coaching focuses on the coaching applications of systemic psychodynamic theory in

the context of organizational life that is both goal orientated and held in a managerial leadership context *Regulating the Psychological Therapies* Denis Postle, 2007 Keeping track of the arguments for and against state regulation and how if or why the psychological therapies should become state sponsored has been an onerous task in recent years For many practitioners the institutional politics and disinformation around the regulation topic have tended to breed boredom and apathy to seem out of the question And that considering the work we do this is perceived as incongruous civic accountability for the psychological therapies He shows how vested interests which in the last decade successfully seduced an otherwise uninterested government into bringing forward state regulation now find that they have got their wish but tragically for clients and practitioners alike not in the form they sought The Psychologist, 2008 **Assessments and Measures in Psychotherapy Research: Going Beyond Self-Report Data** Jessica Uhl, Brian Schwartz, 2023-10-31 Tailoring the treatment to the individual patient can improve the effectiveness of psychotherapy To do so the treatment or strategy with the best prognosis for the individual patient can be selected at the beginning of therapy Furthermore the therapeutic approach can be adapted during the course of treatment To support the therapist in such decisions prediction algorithms are used which are able to process complex and comprehensive data precision mental health Statistical methods used in psychotherapy research to analyze data and develop predictive models have recently become more advanced However algorithms cannot do better than what the underlying data provide them in terms of information Therefore our predictions and recommendations could benefit from a broader range of data beyond the traditional patient or therapist rated questionnaires **Hearings, Reports and Prints of the Senate Committee on Labor and Human Resources** United States. Congress. Senate. Committee on Labor and Human Resources, 1980 Failing Students in Higher Education Moira T. Peelo, Terry Wareham, 2002 This work incorporates new empirical data along with practitioner experience and analyzes practice issues within a policy framework that takes into account past and current political trends Cover
