Reporting and Producing for Digital Media (Media and Technology Series) Claudette Guzan Artwick, 2004-08-23 While contemporary journalists must approach each story with the same respect for truth and fairness as their predecessors additional rigors guided by a new skills set must now also be navigated A pervasive online and cross media presence defines journalism today More than 4 000 newspapers in the United States alone have online sites Academic programs in journalism and mass communication are reconfiguring their curricula to better prepare students for this media era As digital journalism rapidly evolves Reporting and Producing for Digital Media emerges as the definitive textbook Author Artwick integrates sound journalistic perspective with the skills needed to research report write and present news in a world of digital and converging media The most recent title in Blackwell Publishing's Media and Technology series featured topics in this volume include functions of the press in a digital society case studies illustrating core journalistic values legal and ethical issues specific to the Internet examples and exercises of interactive techniques that set digital storytelling apart strategies from print and broadcast media that are appropriate for the Web and those that aren't framing stories and storytelling tools for the Web working with photographs shooting and editing digital video creating still images from digital video and planning Flash presentations working and competing in convergent media Fully illustrated and complete with chapter ending activities for further learning Reporting and Producing for Digital Media is the ideal text for emerging digital converged journalism curricula as well programs including digital media in their print and broadcast tracks Digital Forensics Processing and Procedures David Lilburn Watson, Andrew Jones, 2013-08-30 This is the first digital forensics book that covers the complete lifecycle of digital evidence and the chain of custody This comprehensive handbook includes international procedures best practices compliance and a companion web site with downloadable forms Written by world renowned digital forensics experts this book is a must for any digital forensics lab It provides anyone who handles digital evidence with a guide to proper procedure throughout the chain of custody from incident response through analysis in the lab A step by step guide to designing building and using a digital forensics lab A comprehensive guide for all roles in a digital forensics laboratory Based on international standards and certifications Content Production for Digital Media Jay Daniel Thompson, John Weldon, 2022-02-11 This book provides an introduction to digital media content production in the twenty first century It explores the kinds of content production that are undertaken in professions that include journalism public relations and marketing The book provides an insight into content moderation and addresses the legal and ethical issues that content producers face as well as how these issues can be effectively managed Chapters also contain interviews with media professionals and quizzes that allow readers to consolidate the knowledge they have gathered through their reading of that chapter *The BBC's management of digital media initiative* Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2011-04-07 This report examines the management of the contract with Siemens and the BBC's in house

development of the Digital Media Initiative Programme The Programme is designed to transform the way in which BBC staff create use and share video and audio material It involves the development of new technology to allow staff to manage content efficiently on their desktops in order to give greater accessibility of digital content for audiences on TV online and radio The BBC has made good progress in delivering the programme in house since it terminated its contract with Siemens It is now on course to deliver the complete technology by summer 2011 With hindsight the BBC should not have let the contract for its Digital Media Initiative to Siemens without testing the contractor against other suppliers especially as there was a high degree of innovation involved The Programme is no longer expected to deliver the overall net financial benefit of 17.9 million originally anticipated The BBC approved the Programme on the basis that it would cost 81.7 million and deliver benefits of 99.6 million but now forecasts costs of 133.6 million and benefits of 95.4 million a net cost of 38.2 million The Committee welcomes the Trust's assurance that it would now take a more challenging approach when considering procurements but are concerned with the ease with which the BBC found over 50 million in savings to make up for the losses it suffered through late delivery of the project and its own increased delivery costs This suggests the need for a more vigilant approach to value for money

Digital Media and Reporting Conflict Daniel Bennett, 2013-07-18 This book explores the impact of new forms of online reporting on the BBC's coverage of war and terrorism Informed by the views of over 100 BBC staff at all levels of the corporation Bennett captures journalists shifting attitudes towards blogs and internet sources used to cover wars and other conflicts He argues that the BBC's practices and values are fundamentally evolving in response to the challenges of immediate digital publication Ongoing challenges for journalism in the online media environment are identified maintaining impartiality in the face of calls for more open personal journalism ensuring accuracy when the power of the former audience allows news to break at speed and overcoming the limits of the scale of the BBC's news operation in order to meet the demands to present news as conversation While the focus of the book is on the BBC's coverage of war and terrorism the conclusions are more widely relevant to the evolving practice of journalism at traditional media organizations as they grapple with a revolution in publication

Digital Media, Cultural Production and Speculative Capitalism Freya Schiwy, Alessandro Fornazzari, Susan Antebi, 2013-10-31 This collection of essays explores the interfaces between new information technologies and their impact on contemporary culture and recent transformations in capitalist production From a transnational frame the essays investigate some of the key facets of contemporary global capitalism the ascendance of finance capital and the increasing importance of immaterial labor understood here as a post Fordist notion of work that privileges the art of communication affect and virtuosity The contributors address these transformation by exploring their relation to new digital media YouTube MySpace digital image

and video technology information networks etc and various cultural forms including the Hispanic television talk show indigenous video production documentary film in Southern California the Latin American stock market German security surveillance transnational videoconferencing and Japanese tourists use of visual images on cell phones The authors argue that the seemingly radical newness and alleged immateriality of contemporary speculative capitalism turns out to be less dramatically new and more grounded in colonial racial histories of both material and immaterial exploitation than one might at first imagine Similarly human interaction with digital media and virtuality ostensibly a double marker for the contemporary and economically privileged subject in fact reveals itself in many cases as transgressive of racial economic and historical categories The Future of Journalism: In an Age of Digital Media and Economic Uncertainty Bob

Digital News and HIV Criminalization Colin Hastings,2024-12-16 For years HIV activists and researchers have expressed deep concerns about the stigmatizing and sensational tone of news stories about HIV criminalization Digital News and HIV Criminalization investigates the everyday

work of journalists and uncovers how newswork routines are hooked into other institutions including the criminal legal system police and public health that regulate the daily lives of people living with HIV This lively institutional ethnography offers key insights into how the digital news media ecosystem is socially organized It reveals that the fast paced conditions of digital news media in the age of convergence journalism require the constant rapid production of sensational news stories that will be consumed widely by online audiences often resulting in news writing that perpetuates social harms connected to stigmatizing racist and anti immigrant views The book illustrates how biased reporting on HIV criminalization reflects broader trends in online news and presents opportunities for HIV activists to form coalitions with other groups negatively affected by the current landscape of convergence journalism Tracing how work that produces and circulates a standard genre of news story about HIV criminalization is coordinated across time and space Digital News and HIV Criminalization offers a groundwork for political action aimed at disrupting the production of stigmatizing news stories
