Representation Of Lie Groups And Special Functions:

Representation of Lie Groups and Special Functions N.Ja. Vilenkin,A.U. Klimyk,2012-12-06 This is the first of three major volumes which present a comprehensive treatment of the theory of the main classes of special functions from the point of view of the theory of group representations This volume deals with the properties of classical orthogonal polynomials and special functions which are related to representations of groups of matrices of second order and of groups of triangular matrices of third order This material forms the basis of many results concerning classical special functions such as Bessel MacDonald Hankel Whittaker hypergeometric and confluent hypergeometric functions and different classes of orthogonal polynomials including those having a discrete variable Many new results are given The volume is self contained since an introductory section presents basic required material from algebra topology functional analysis and group theory For research mathematicians physicists and engineers

Representation of Lie Groups and Special Functions N. Ja. Vilenkin,A. U. Klimyk,2014-01-15 **Representation of Lie Groups and Special Functions** Naum I. A. Kovlevich Vilenkin,Anatoliĭ Ul'iĭanovich Klimyk,1995 The present book is a continuation of the three volume work Representation of Lie Groups and Special Functions by the same authors Here they deal with the exposition of the main new developments in the contemporary theory of multivariate special functions bringing together material that has not been presented in monograph form before The theory of orthogonal symmetric polynomials Jack polynomials Macdonald's polynomials and others and multivariate hypergeometric functions associated to symmetric polynomials are treated Multivariate hypergeometric functions multivariate Jacobi polynomials and harmonic polynomials connected with root systems and Coxeter groups are introduced Also the theory of Gel'fand hypergeometric functions and the theory of multivariate hypergeometric series associated to Clebsch Gordan coefficients of the unitary group U_n is given The volume concludes with an extensive bibliography For research mathematicians and physicists postgraduate students in mathematics and mathematical and theoretical physics

Representation of Lie Groups and Special Functions N.Ja. Vilenkin,A.U. Klimyk,2013-04-18 This is the last of three major volumes which present a comprehensive treatment of the theory of the main classes of special functions from the point of view of the theory of group representations This volume deals with q analogs of special functions quantum groups and algebras including Hopf algebras and representations of semi simple Lie groups Also treated are special functions of a matrix argument representations in the Gel'fand Tsetlin basis and finally modular forms theta functions and affine Lie algebras The volume builds upon results of the previous two volumes and presents many new results Subscribers to the complete set of three volumes will be entitled to a discount of 15%
