Representations Of Youth The Study Of Youth And Adolescence In Britain And America:

Representations of Youth Christine Griffin, 2013-04-25 *Representations of Youth* examines the various constructions of youth and adolescence in recent British and North American research. Mainstream and radical approaches have presented a series of crises about young people in relation to among other things unemployment, teenage pregnancy and delinquency. This book considers research in psychology, sociology, education, criminology and cultural studies in order to assess these accounts. The author offers a critical review of a wide range of findings about young people in areas as diverse as education and training, leisure, family life and sexuality. She shows that whilst youth research texts do not reflect young people's experiences in any straightforward manner, they do indicate the various complex and contradictory ways in which youth, adolescence and specific groups of young people are represented in contemporary western societies. In so arguing, she presents new terms for thinking about the position of young people today. This is an important new text accessibly written for students of sociology, social psychology and contemporary culture in both Britain and the USA. It will also be of great interest to social science researchers in a range of other disciplines.

Marketisation and Privatisation in Criminal Justice Kevin Albertson, Mary Corcoran, Jake Phillips, 2020-07-03 This collection offers a comprehensive review of the origins, scale and breadth of the privatisation and marketisation revolution across the criminal justice system. Leading academics and researchers assess the consequences of market-driven criminal justice in a wide range of contexts from prison and probation to policing, migrant detention, rehabilitation and community programmes. Using economic, sociological and criminological perspectives illuminated by accessible case studies, they consider the shifting roles and interactions of the public, private and voluntary sectors. As privatisation, outsourcing and the impact of market cultures spread further across the system, the authors look ahead to future developments and signpost the way to reform in a post-market criminal justice sphere.

Seven Going on Seventeen Jacqueline Reid-Walsh, 2005 The tween is the new girl on the block in girlhood studies. Although the study of tween life may have derived from a particular marketing orientation at the end of the twentieth century, it is not limited by it. On the contrary, this collection of essays shows that tween is not a simple or unified concept nor is it limited to a certain class of girls in a few countries. This collection by an international group of authors highlights specific methodologies for working with and studying tween-age girls, provides challenges to the presumed innocence of girlhood and engages in an analysis of marketing in relation to girlhood. In so doing, this book offers a reading on these three or four years in a girl's life that suggests that this period is as fascinating as the teen years and as generative in its implications for girlhood studies as studies of both younger and adolescent girls.

Rogan,2022-07-01 Digital Femininities The Gendered Construction of Cultural and Political Identities Online examines the role of new media technologies in the production of girls cultural and political identities The book argues that the varied and complex spaces which make up our social media should be conceptualised as important terrains upon which neoliberal and postfeminist subjectivities can be both reproduced and subverted In doing so the book explores many key issues underpinning current debates around gender politics and digital media including gendered spatial politics visibility surveillance and regulation beauty politics and civic and political engagement and activism Over the last decade the position of girls and young women within the digital landscape of social media has been a topic of much debate On the one hand girls social media practices are presented as a key site of concern wherein new digital technologies are said to have produced an

intensification of individualised neoliberal and postfeminist identities Conversely others have championed access to social media for young people as a potentially useful political tool enabling previously marginalised political subjects such as girls to access and participate within new and exciting political cultures Locating itself at the intersection of these two approaches this book offers a fresh contribution to these debates Based upon the findings from focus groups with girls and young women aged between 12 and 18 in England the book offers an in depth analysis of the digital cultures that emerged from the study This timely book will be essential reading for anyone interested in contemporary femininity and feminism and the role of digital media in the production of cultural political and gendered identities **From Education to Work** Walter R.
